HSBC Investor Aggressive Growth Strategy Fund

Who should invest in this Fund?

Investors with long-term goals and risk tolerance to ride out the market's ups and downs. The HSBC Investor Aggressive Growth Strategy Fund seeks long-term growth of capital.

Investor Considerations

Equity securities (stocks) are more volatile and carry more risk, than other forms of investments, including investments in high-grade fixed income securities. The net asset value per share of the Fund will fluctuate as the value of the securities in the portfolio changes. Common stocks, and funds investing in common stocks, generally provide greater return potential when compared with other types of investments.

Value-based investments are subject to the risk that the broad market may not recognize their intrinsic value.

Small capitalization funds typically carry additional risks, since smaller companies generally have a higher risk of failure and historically have experienced a greater degree of market volatility than average.

There are risks associated with investing in a fund that invests in securities of foreign countries, such as erratic market conditions, economic and political instabilities and fluctuations in currency exchanges.

An investment in money market funds is not insured or guaranteed by the FDIC or any other government agency. Although the funds seek to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the funds.

What does this Fund invest in?

This portfolio invests virtually all of its assets in equity securities, both U.S. and international.

What is the strategy?

The HSBC Investor Aggressive Growth Strategy Fund invests in a combination of HSBC Investor Funds and Portfolios:

Target asset class allocation:

1%	Money Market
21%	Large Cap Growth
21%	Large Cap Value
34%	Small-cap
23%	International Equity

Actual asset allocation as of September 30, 2009:

1%	Money Market
20%	Large Cap Growth
21%	Large Cap Value
34%	Small-cap
24%	International Equity

The Fund will rebalance at its fiscal quarter end (January, April, July and October) to ensure that it is within range of its target asset allocation.

AVERAGE ANNUAL TOTAL RETURNS AS OF SEPTEMBER 30, 2009

Expense Ratio³ (Gross/Net): 1.98%/1.50%

HSBC Investor Aggressive Growth Strategy Fund - Class A [†]	3 Month**	YTD**	1 Year	3 Years	Inception (2/14/05)
without sales charge	18.39%	29.73%	-0.28%	-2.60%	2.70%
with sales charge (5.00%)	12.46%	23.22%	-5.29%	-4.25%	1.56%
Aggressive Growth Blended Portfolio Index ¹	17.09%	27.24%	-2.61%	-3.51%	1.77% ²

Past performance does not guarantee future results. The performance data quoted represents past performance and current returns may be lower or higher. The investment return and principal value will fluctuate so that an investor's shares, when redeemed may be worth more or less than the original cost. To obtain performance information current to the most recent month end, please call 1-800-782-8183, or visit our website at www.investorfunds.us.hsbc.com.

The performance above reflects any fee waivers that have been in effect during the applicable periods as well as any expense reimbursements that have periodically been made. Absent such waivers and reimbursements, returns would have been lower. Currently, contractual fee waivers are in effect from March 1, 2009 through March 1, 2010.

* Sales charges for Class B and Class C Shares may be assessed on redemptions. The exact amount of these charges, if any, depends on the amount of time the shares have been held by the investor. See Prospectus for more information.

**Aggregate returns.

† During October 2008, certain HSBC Investor Portfolios in which the Fund invests in received certain litigation settlements which enhanced performance. Without the receipt of this payment, the returns for the applicable periods would be lower.

¹ The performance of the HSBC Investor Aggressive Growth Strategy Fund is compared to a Blended Portfolio Index, which is a hypothetical combination of broad-based indexes. The components of the Blended Portfolio Index and their weighting are as follows: The 90-Day T-Bill (1%); Russell 1000[®] Growth Index (21%); Russell 1000[®] Value Index (21%); Russell 2500[™] Growth Index (34%) and the MSCI EAFE Index (23%). These indices

are unmanaged and do not reflect the fees and expenses associated with a mutual fund, and investors cannot directly invest in an index. The 90-Day T-Bill is government guaranteed and offers a fixed rate of return. Return and principal of stocks and bonds will vary with market conditions. Treasury bills are less volatile than longer-term fixed-income securities and are guaranteed as to timely payment of principal and interest by the U.S. Government. The Russell 1000[®] Growth Index measures the performance of those Russell companies with higher price-to-book ratios and higher forecasted growth values. The Russell 1000[®] Value Index measures the performance of those Russell companies with lower price-to-book ratios and lower forecasted growth values. The Russell 2500[™] Growth Index measures the performance of those Russell 2500 companies with higher price-to-book ratios and higher forecasted growth values. The MSCI EAFE Index is a market capitalization-weighted equity index comprising 21 of the 48 countries in the MSCI universe and representing the developed world outside of North America.

² Return for the period 1/31/05 to 9/30/09.

³ Reflects the expense ratio as reported in the prospectus dated February 27, 2009.

HSBC Global Asset Management (USA) Inc. serves as investment adviser for the HSBC Investor LifeLine Funds. Foreside Distribution Services, L.P., the distributor, is not affiliated with the adviser.

An investor should consider a fund's investment objectives, risks, and charges and expenses carefully before investing or sending money.
