Portfolio holdings subject to change daily without notice and may not represent current or past portfolio composition. The holdings represented above include those directly held by the Fund and exclude cash, cash equivalents and certain other assets and liabilities. Unlike the fund's regulatory filings, the portfolio data and its presentation in this document are not required to conform to Generally Accepted Accounting Principles (GAAP) and Securities and Exchange Commission (SEC) presentation requirements. Therefore, the information may differ from the fund's holdings disclosed in its annual/semi-annual report and Form N-Q due to the exclusions noted above.

For information related to the Fund's cash equivalents and other items mentioned above, please refer to the most recent Form N-Q or the annual/semi-annual report, which are available on the SEC's website at www.sec.gov.

HSBC Global Asset Management (USA), Inc. serves as investment adviser. Foreside Distributors, LLC, member of FINRA is the distributor and is not affiliated with the adviser.

Bond funds will tend to experience smaller fluctuations in value than stock funds. However, investors in any bond fund should anticipate fluctuations in price especially for longer term issues and in environments of rising interest rates. Investments in the fund are subject to possible loss due to the financial failure of underlying securities and their inability to meet their client obligations.

High yield, lower rated securities involve greater price volatility and present greater risk than higher rated fixed income securities. At times, due to market conditions, the fund may be unable to sell certain of its portfolio securities without substantial drop in price. Prices of fixed income securities are generally inversely correlated to interest rates. Investments in the fund are subject to possible loss due to the financial failure of underlying securities and their inability to meet their debt obligations. These risks may increase the funds share price volatility.

Prices of securities in emerging markets can fluctuate more significantly than the prices of companies in more developed countries. Securities of greater emerging market issuers generally have more risk than securities issued by issuers in more developed markets. The less developed the country, the affect the risks may have in an investment, and as a result, an investment may exhibit a higher degree of volatility than either the general domestic securities market or the securities markets of developed foreign countries.

Derivatives may be riskier than other types of investments and could result in losses that significantly exceed the Fund's original investment.

The portfolio data is for information only. It does not constitute a recommendation or an offer for a particular security or fund, nor should it be taken as a solicitation or a recommendation to buy or sell securities or other investments.

An investor should consider the fund's investment objectives, risks and charges and expenses carefully before investing or sending money. This and other important information about the investment company can be found in the fund's prospectus.

To obtain a prospectus, please call 1-800-782-8183 or visit www.investorfunds.us.hsbc.com. Please read the prospectus carefully before investing.
