GENERAL INFORMATION

The HSBC U.S. Government Money Market Fund (“Government Money Market Fund”) and HSBC U.S. Treasury Money Market Fund (“U.S. Treasury Money Market Fund”), are separate series of the Trust, an open-end management investment company. Each Fund is a money market fund that must comply with the requirements of the SEC’s Rule 2a-7 under the Investment Company Act of 1940, as amended (the “1940 Act”) and, by virtue of compliance with the diversification requirements of Rule 2a-7, is deemed to have satisfied the diversification requirements of the 1940 Act. Each Fund has its own distinct investment objective and policies. Each Fund is described in this SAI. The Trust includes certain equity and fixed income funds that are covered in separate SAIs. Shares of the Funds are divided into eight separate classes: Class A (the “Class A Shares”), Class C (the “Class C Shares”), Class D (the “Class D Shares”), Class E (the “Class E Shares”), Institutional Shares (the “Class I Shares”), Intermediary Class (the “Intermediary Shares”), Intermediary Service Class (the “Intermediary Service Shares”), and Class Y (the “Class Y Shares”). See the Prospectus and “Purchase of Shares” for information about the various classes and eligibility to invest therein.

INVESTMENT OBJECTIVE, POLICIES AND RESTRICTIONS

The following information supplements the discussion of the investment objective, policies, and risks of each Fund in the Funds’ Prospectus.

Each Fund covered by this SAI is a money market fund that follows investment and valuation policies designed to maintain a stable net asset value (“NAV”) of \$1.00 per share. There is no assurance that any Fund will be able to maintain a stable NAV of \$1.00 per share. In addition, there can be no assurance that the investment objective of a Fund will be achieved. Except as otherwise indicated, the investment objective and related policies and strategies of a Fund are not fundamental and may be changed by the Board of Trustees of the Trust (the “Board”) without the approval of Fund shareholders. Shareholders will be given advance notice of material changes to a Fund’s investment objective or other non-fundamental investment policies. If there is a change, shareholders should consider whether a Fund remains an appropriate investment in light of their then-current financial position and needs.

U.S. GOVERNMENT MONEY MARKET FUND

The Fund is a government money market fund and seeks to maintain a stable price of \$1.00 per share. The Fund seeks to achieve its investment objective by investing at least 99.5% of its total assets in cash, securities issued or guaranteed by the United States or certain U.S. government agencies or instrumentalities (“U.S. Government Securities”) and/or repurchase agreements that are collateralized fully by these types of obligations. In addition, the Fund must invest, under normal circumstances, at least 80% of its net assets, plus any borrowings for investment purposes, in U.S. Government Securities and repurchase agreements collateralized fully by these types of obligations. This policy is not fundamental and may be changed by the Board upon 60 days’ notice to Fund shareholders. If there is a change, shareholders should consider whether the Fund remains an appropriate investment in light of their then-current financial position and needs. All investments on behalf of the Fund (*i.e.*, 100% of the Fund’s investments) mature or are deemed to mature within 397 days from the date of acquisition, as calculated in accordance with Rule 2a-7. The Fund also must have a dollar-weighted average portfolio maturity of 60 days or less and a dollar-weighted average portfolio life of 120 days or less, each as calculated in accordance with Rule 2a-7.

The Fund invests in obligations of, or obligations guaranteed by, the U.S. Government, its agencies or instrumentalities. These include issues of the U.S. Treasury, such as bills, notes and bonds, and issues of agencies and instrumentalities established under the authority of an Act of Congress. Some of the latter

category of obligations are supported by the “full faith and credit” of the United States, others are supported by the right of the issuer to borrow from the U.S. Treasury, and still others are supported only by the credit of the agency or instrumentality. Examples of each of the three types of obligations described in the preceding sentence are (i) obligations guaranteed by the Government National Mortgage Association (“GNMA”), (ii) obligations of the Federal National Mortgage Association (“FNMA”), and (iii) obligations of the Federal Farm Credit Bank, respectively. The Fund may also invest in securities of other money market funds that primarily invest in U.S. Government Securities and repurchase agreements collateralized by U.S. Government Securities.

U.S. TREASURY MONEY MARKET FUND

The Fund is a government money market fund and seeks to maintain a stable price of \$1.00 per share. The Fund seeks to achieve its investment objective by investing, under normal market conditions, exclusively in direct obligations of the U.S. Treasury. In addition, the Fund must invest, under normal circumstances, at least 80% of its net assets, plus any borrowings for investment purposes, in direct obligations of the U.S. Treasury. This policy is not fundamental and may be changed by the Board upon 60 days’ notice to Fund shareholders. If there is a change, shareholders should consider whether the Fund remains an appropriate investment in light of their then-current financial position and needs. All investments on behalf of the Fund (*i.e.*, 100% of the Fund’s investments) mature or are deemed to mature within 397 days from the date of acquisition, as calculated in accordance with Rule 2a-7. The Fund also must have a dollar-weighted average portfolio maturity of 60 days or less and a dollar-weighted average portfolio life of 120 days or less, as calculated in accordance with Rule 2a-7.

The Fund may not enter into loans of its portfolio securities, invest in obligations issued or guaranteed by agencies or instrumentalities of the U.S. Government, or invest in repurchase agreements under normal conditions. However, the Fund may temporarily invest in repurchase agreements collateralized by U.S. Treasury obligations.

The U.S. Treasury issues various types of marketable securities consisting of bills, notes, bonds and other debt securities. They are direct obligations of the U.S. Government and differ primarily in the length of their maturity. Treasury bills, the most frequently issued marketable U.S. Government security, have a maturity of up to one year and are issued on a discount basis.

QUALIFYING AS A REGULATED INVESTMENT COMPANY

The Trust intends for each Fund to maintain its qualification as a “regulated investment company” under Subchapter M of the Internal Revenue Code of 1986, as amended (the “Code”). In order to maintain such qualification, among other things, at the close of each quarter of each Fund’s taxable year, at least 50% of the Fund’s total assets must be represented by cash, U.S. Government Securities, investment company securities and other securities limited in respect of any one issuer to not more than 5% in value of the total assets of the Fund and not more than 10% of the outstanding voting securities of such issuer. In addition, at the close of each quarter of its taxable year, not more than 25% of a Fund’s total assets may be invested in securities of one issuer (or two or more issuers which are controlled by the Fund and which are determined to be engaged in the same or similar trades or businesses or related businesses) other than U.S. Government securities or the securities of other regulated investment companies or in the securities of one or more “qualified publicly traded partnerships”.

INVESTMENT TECHNIQUES AND RISKS

Each Fund invests in a variety of securities in accordance with its investment objectives and policies (as described in the Prospectus and above in this SAI) and employs a number of investment techniques. Each

type of security and technique involves certain risks. The following is an alphabetical list of the investment techniques used by the Funds as indicated in the table, and the main risks associated with those techniques.

The table below indicates the types of investments and techniques that are material to the investment strategies employed by each Fund. In some cases, the omission of a Fund is not intended to imply that the Fund is precluded from investing in the types of investments or employing the techniques indicated below. Generally, if a particular type of investment or technique is not indicated as being applicable to a particular Fund, the particular type of investment or technique will not be material to the investment strategies employed by the Fund, although any risk factors that are stated more generally with respect to any broader category of investment or technique may still apply.

	U.S. Government Money Market Fund	U.S. Treasury Money Market Fund
<u>Type of Investment Technique or Risk</u>		
Cyber Security Risk	X	X
Fixed Income Securities	X	X
Investments in Other Investment Companies	X

Mortgage-Related Securities	X	
Operational Risk	X	X
Repurchase Agreements	X	X*
Risks of Qualified Financial Contracts	X	X
Selection of Money Market Investments	X	X
U.S. Government Securities	X	X

*The U.S. Treasury Money Market Fund, under adverse market conditions, temporarily may invest in repurchase agreements collateralized by U.S. Treasury obligations.

CYBER SECURITY RISK

The Funds face greater risks of cyber security breaches because of the broad use of technology, such as computer systems and the internet, that has developed in the course of business. In general, cyber-attacks result from deliberate attacks but other events may have effects similar to those caused by cyber-attacks. Cyber-attacks include, among others, stealing, destroying or corrupting data that is maintained online or digitally, denial-of-service attacks on websites, and the unauthorized release of confidential information. Cyber-attacks affecting a Fund or its investment adviser, subadviser, custodian, transfer agent, intermediary or other third-party service provider may adversely impact the Funds. These cyber-attacks have the ability to cause disruptions and impact business operations, to result in financial losses, to prevent shareholders from transacting business, and to lead to violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, and/or additional compliance costs. Similar to operational risk in general, the Funds and their investment adviser have instituted risk management systems designed to minimize the risks associated with cyber security. However, it is not certain that these systems will succeed, especially because the Funds do not directly control the cyber security systems of the service providers to the Funds, their trading counterparties, or the issuers in which a Fund may invest. Moreover, there is a risk that the cyber-attacks will not be detected.

FIXED INCOME INSTRUMENTS

The Funds may invest in fixed income securities. The value of a Fund's investment in fixed income instruments may change as prevailing interest rates fluctuate. When interest rates decline, the value of fixed income securities can be expected to rise. However, a low interest rate environment poses risks to the Funds because low yields on the Funds' portfolio holdings may have an adverse impact on their ability to generate a positive yield to shareholders, pay expenses out of Fund assets, or maintain a stable NAV per share. Conversely, when interest rates rise, the value of fixed income securities can be expected to decline. The Funds' investments in fixed income securities with longer terms to maturity or greater duration are subject to greater volatility than shorter-term obligations. Fluctuations in interest rates may affect the yield, volatility, liquidity and value of investments in income-producing or fixed income securities. A wide variety of factors can cause interest rates to rise (*e.g.*, central bank monetary policies, inflation rates, general economic conditions, etc.). The risks associated with changing interest rates may have unpredictable effects on the markets and a Fund's investments.

Outflows in the fixed income market could impose difficulties on dealers because the recent increase of assets in bond mutual funds and exchange traded funds has not been matched with a proportionate increase in dealer capacity. As such, dealer inventories appear to be at an all-time low, relative to the market size. This reduction in market-making capacity by dealers has the potential to decrease liquidity and increase volatility in fixed income markets.

After purchase by a Fund, a fixed income security may cease to be rated or its rating may be reduced below the minimum required for purchase. A fixed income security which has had its rating downgraded or revoked may be subject to greater risk to principal and income, and often involve greater volatility of price, than instruments in the higher rating categories. Such instruments are also subject to greater credit risks (including, without limitation, the possibility of default by or bankruptcy of its issuers of such securities) than securities in higher rating categories.

INVESTMENTS IN OTHER INVESTMENT COMPANIES

Subject to certain restrictions, the Government Money Market Fund may invest in securities issued by other money market funds that primarily invest in U.S. Government Securities and repurchase agreements collateralized by U.S. Government Securities. Such securities will be acquired by the Fund within the limits prescribed by the 1940 Act and the rules thereunder. Investors should recognize that the purchase of securities of other investment companies results in duplication of expenses such that investors indirectly bear a proportionate share of the operating expenses of such companies, including investment advisory and administrative services fees. In addition, the Fund will be affected by the investment policies, practices, and performance of such money market fund in direct proportion to the amount of assets the Fund invests therein.

The Trust may, in the future, seek to achieve the Government Money Market Fund's investment objective (subject to applicable investment restrictions) by investing all of the Fund's assets in an open-end management investment company having substantially the same investment objective, policies and restrictions as those applicable to the Fund. In such event, the investment advisory contract for the Fund would be terminated and the administrative services fees paid by the Fund would be reduced. Such investment would be made only if the Trustees of the Trust believe that the aggregate per share expenses of the Fund and such other investment company will be less than or approximately equal to the expenses which the Fund would incur if the Trust were to continue to retain the services of an investment adviser for the Fund and the assets of the Fund were to continue to be invested directly in portfolio securities.

In cases where (i) the Fund has an investment policy to invest under normal circumstances at least 80% of its net assets in a particular type or category of securities, and (ii) the Fund invests in another investment company that has a similar investment policy requiring it to invest under normal circumstances at least 80% of its net assets in that type or category of securities, the Fund will treat its investment in the other investment company as meeting the requirements of the Fund's policy concerning the investment of at least 80% of the Fund's net assets.

LIQUIDITY

The Funds will comply with the liquidity requirements under Rule 2a-7, including the weekly and daily liquidity requirements. In addition, each Fund will not acquire an illiquid security (as defined below) if, immediately after the acquisition, the Fund would have invested more than 5% of its total assets in illiquid securities. An illiquid security is a security that cannot be sold or disposed of within seven calendar days in the ordinary course of business at approximately the amount at which a Fund has valued the security.

The policy with respect to the purchase of illiquid securities does not limit the acquisition of securities eligible for resale to qualified institutional buyers pursuant to Rule 144A under the Securities Act of 1933, as amended (the "1933 Act") or commercial paper issued pursuant to Section 4(a)(2) under the 1933 Act that are determined to be liquid in accordance with guidelines established by the Board. There may be delays in selling these securities, and sales may be made at less favorable prices.

The Adviser may determine that a particular Rule 144A or Section 4(a)(2) security is liquid and thus not subject to the limitation on investments in illiquid securities, pursuant to guidelines adopted by the Board. Factors that the Adviser must consider in determining whether a particular Rule 144A security is liquid include the frequency of trades and quotes for the security, the number, diversity, and quality of dealers willing to purchase or sell the security and the number of other potential purchasers, dealer undertakings to make a market in the security, and the nature of the security and the nature of the market for the security (i.e., the time needed to dispose of the security, the method of soliciting offers and the mechanics of transfer). Investing in Rule 144A securities could have the effect of increasing the level of a Fund's illiquidity to the extent that qualified institutions might become, for a time, uninterested in purchasing these securities.

MORTGAGE-RELATED SECURITIES

The Government Money Market Fund may invest in mortgage-backed certificates and other securities representing ownership interests in mortgage pools, including collateralized mortgage obligations ("CMOs"). Interest and principal payments on the mortgages underlying mortgage-backed securities are passed through to the holders of the mortgage-backed securities. Mortgage-backed securities currently offer yields higher than those available from many other types of fixed-income securities, but because of their prepayment aspects, their price volatility and yield characteristics will change based on changes in prepayment rates.

There are two methods of trading mortgage-backed securities. A specific pool transaction is a trade in which the pool number of the security to be delivered on the settlement date is known at the time the trade is made. This is in contrast with the typical mortgage transaction, called a TBA (to be announced) transaction, in which the type of mortgage securities to be delivered is specified at the time of trade but the actual pool numbers of the securities that will be delivered are not known at the time of the trade. For example, in a TBA transaction an investor could purchase \$1 million of 30-year Federal National Mortgage Association ("FNMA") 9% mortgages and receive up to three pools on the settlement date. The pool numbers of the pools to be delivered at settlement will be announced shortly before settlement

takes place. The terms of the TBA trade may be made more specific if desired. For example, an investor may request pools with particular characteristics, such as those that were issued prior to January 1, 1990. The most detailed specification of the trade is to request that the pool number be known prior to purchase. In this case, the investor has entered into a specific pool transaction. Generally, agency pass-through mortgage-backed securities are traded on a TBA basis. The specific pool numbers of the securities purchased do not have to be determined at the time of the trade.

Mortgage-backed securities have yield and maturity characteristics that are dependent on the mortgages underlying them. Thus, unlike traditional debt securities, which may pay a fixed rate of interest until maturity when the entire principal amount comes due, payments on these securities include both interest and a partial payment of principal. In addition to scheduled loan amortization, payments of principal may result from the voluntary prepayment, refinancing or foreclosure of the underlying mortgage loans. Such prepayments may significantly shorten the effective durations of mortgage-backed securities, especially during periods of declining interest rates. Similarly, during periods of rising interest rates, a reduction in the rate of prepayments may significantly lengthen the effective durations of such securities.

Investment in mortgage-backed securities poses several risks, including interest rate, prepayment, market, and credit risk. Interest rate risk reflects the risk that, as interest rates rise, the value of mortgage-backed securities generally can be expected to fall. Prepayment risk reflects the risk that borrowers may prepay their mortgages faster than expected, thereby affecting the investment's average life and perhaps its yield. Whether or not a mortgage loan is prepaid is almost entirely controlled by the borrower. Borrowers are most likely to exercise prepayment options at the time when it is least advantageous to investors, generally prepaying mortgages as interest rates fall, and slowing payments as interest rates rise. Besides the effect of prevailing interest rates, the rate of prepayment and refinancing of mortgages may also be affected by home value appreciation, ease of the refinancing process and local economic conditions.

Market risk reflects the risk that the price of the security may fluctuate over time. The price of mortgage-backed securities may be particularly sensitive to prevailing interest rates, the length of time the security is expected to be outstanding, and the liquidity of the issue. In a period of unstable interest rates, there may be decreased demand for certain types of mortgage-backed securities, and a Fund invested in such securities wishing to sell them may find it difficult to find a buyer, which may in turn decrease the price at which they may be sold.

Credit risk reflects the risk that the Government Money Market Fund may not receive all or part of its principal because the issuer or credit enhancer has defaulted on its obligations. Obligations issued by U.S. Government-related agencies or instrumentalities may not be backed by the full faith and credit of the U.S. Government. The performance of private label mortgage-backed securities, issued by private institutions, is based on the financial health of those institutions.

The financial crisis in 2007—particularly the increase in delinquencies and defaults on residential mortgages, falling home prices, and unemployment—had adversely affected the market for mortgage-related securities. In addition, various market and governmental actions may impair the ability to foreclose on or exercise other remedies against underlying mortgage holders, or may reduce the amount received upon foreclosure. These factors may cause mortgage-related securities to experience lower valuations and reduced liquidity. There is also no assurance that the U.S. Government will take action to support the mortgage-related securities industry, as it has in the past, should the economy experience another downturn. Further, future legislative and other government actions may significantly alter the manner in which the mortgage-related securities market functions. Each of these factors could ultimately increase the risk that the Government Money Market Fund could realize losses on mortgage-related securities.

Mortgage Pass-Through Securities. Interests in pools of mortgage-related securities differ from other forms of debt securities, which normally provide for periodic payment of interest in fixed amounts with principal payments at maturity or specified call dates. Instead, these securities provide a monthly payment that consists of both interest and principal payments. In effect, these payments are a “pass-through” of the monthly payments made by the individual borrowers on their residential or commercial mortgage loans, net of any fees paid to the issuer or guarantor of such securities. Additional payments are caused by repayments of principal resulting from the sale of the underlying property, refinancing or foreclosure, net of fees or costs that may be incurred. Some mortgage-related securities (such as securities issued by the Government National Mortgage Association (“GNMA”)) are described as “modified pass-through.” These securities entitle the holder to receive all interest and principal payments owed on the mortgage pool, net of certain fees, at the scheduled payment dates regardless of whether or not the mortgagor actually makes the payment.

The principal governmental guarantor of mortgage-related securities is GNMA. GNMA is a wholly owned U.S. Government corporation within the Department of Housing and Urban Development. GNMA is authorized to guarantee, with the full faith and credit of the U.S. Government, the timely payment of principal and interest on securities issued by institutions approved by GNMA (such as savings and loan institutions, commercial banks and mortgage bankers) and backed by pools of Federal Housing Administration (“FHA”) insured or Department of Veterans Affairs (“VA”) guaranteed mortgages. Government-related guarantors (*i.e.*, not backed by the full faith and credit of the U.S. Government) include the FNMA and the Federal Home Loan Mortgage Corporation (“FHLMC”). FNMA is a government-sponsored corporation. FNMA purchases conventional (*i.e.*, not insured or guaranteed by any government agency) residential mortgages from a list of approved seller/servicers which include state and federally chartered savings and loan associations, mutual savings banks, commercial banks and credit unions and mortgage bankers. Pass-through securities issued by FNMA are guaranteed as to timely payment of principal and interest by FNMA but are not backed by the full faith and credit of the U.S. Government.

FHLMC was created by Congress in 1970 for the purpose of increasing the availability of mortgage credit for residential housing. It is a government-sponsored corporation formerly owned by the Federal Home Loan Banks. FHLMC issues participation certificates (“PCs”) which represent interests in conventional mortgages from FHLMC’s national portfolio. FHLMC guarantees the timely payment of interest and ultimate collection of principal, but PCs are not backed by the full faith and credit of the U.S. Government.

In September 2008, the Federal Housing Finance Agency (“FHFA”) placed FNMA and FHMLC into conservatorship. As the conservator, FHFA succeeded to all rights, titles, powers and privileges of FNMA and FHLMC and of any stockholder, officer or director of FNMA and FHLMC with respect to FNMA and FHLMC and the assets of FNMA and FHLMC. FHFA selected a new chief executive officer and chairman of the board of directors for each of FNMA and FHLMC. The FHFA has indicated that the conservatorship of each enterprise will end when the director of FHFA determines that FHFA’s plan to restore the enterprise to a safe and solvent condition has been completed. FNMA and FHLMC are continuing to operate as going concerns while in conservatorship and each remain liable for all of its obligations, including its guaranty obligations, associated with its mortgage-backed securities. The steps taken in connection with the conservatorship are both intended to enhance each of FNMA’s and FHLMC’s ability to meet its obligations.

Under the Federal Housing Finance Regulatory Reform Act of 2008 (the “Reform Act”), which was included as part of the Housing and Economic Recovery Act of 2008, FHFA, as conservator or receiver, has the power to repudiate any contract entered into by FNMA or FHLMC prior to FHFA’s appointment as conservator or receiver, as applicable, if FHFA determines, in its sole discretion, that performance of

the contract is burdensome and that repudiation of the contract promotes the orderly administration of FNMA's or FHLMC's affairs. The Reform Act requires FHFA to exercise its right to repudiate any contract within a reasonable period of time after its appointment as conservator or receiver.

FHFA, in its capacity as conservator, has indicated that it has no intention to repudiate the guaranty obligations of FNMA or FHLMC because FHFA views repudiation as incompatible with the goals of the conservatorship. However, in the event that FHFA, as conservator or if it is later appointed as receiver for FNMA or FHLMC, were to repudiate any such guaranty obligation, the conservatorship or receivership estate, as applicable, would be liable for actual direct compensatory damages in accordance with the provisions of the Reform Act. Any such liability could be satisfied only to the extent of FNMA's or FHLMC's assets available therefor.

In the event of repudiation, the payments of interest to holders of FNMA or FHLMC mortgage-backed securities would be reduced if payments on the mortgage loans represented in the mortgage loan groups related to such mortgage-backed securities are not made by the borrowers or advanced by the servicer. Any actual direct compensatory damages for repudiating these guaranty obligations may not be sufficient to offset any shortfalls experienced by such mortgage-backed security holders.

Further, in its capacity as conservator or receiver, FHFA has the right to transfer or sell any asset or liability of FNMA or FHLMC without any approval, assignment or consent. Although FHFA has stated that it has no present intention to do so, if FHFA, as conservator or receiver, were to transfer any such guaranty obligation to another party, holders of FNMA or FHLMC mortgage-backed securities would have to rely on that party for satisfaction of the guaranty obligation and would be exposed to the credit risk of that party.

In addition, certain rights provided to holders of mortgage-backed securities issued by FNMA and FHLMC under the operative documents related to such securities may not be enforced against FHFA, or enforcement of such rights may be delayed, during the conservatorship or any future receivership. The operative documents for FNMA and FHLMC mortgage-backed securities may provide (or with respect to securities issued prior to the date of the appointment of the conservator may have provided) that upon the occurrence of an event of default on the part of FNMA or FHLMC, in its capacity as guarantor, which includes the appointment of a conservator or receiver, holders of such mortgage-backed securities have the right to replace FNMA or FHLMC as trustee if the requisite percentage of mortgage-backed securities holders consent. The Reform Act prevents mortgage-backed security holders from enforcing such rights if the event of default arises solely because a conservator or receiver has been appointed. The Reform Act also provides that no person may exercise any right or power to terminate, accelerate or declare an event of default under certain contracts to which FNMA or FHLMC is a party, or obtain possession of or exercise control over any property of FNMA or FHLMC, or affect any contractual rights of FNMA or FHLMC, without the approval of FHFA, as conservator or receiver, for a period of 45 or 90 days following the appointment of FHFA as conservator or receiver, respectively.

FHFA and the White House have made public statements regarding plans to consider ending the conservatorships of FNMA and FHLMC. In the event that FNMA and FHLMC are taken out of conservatorship, it is unclear how the capital structure of FNMA and FHLMC would be constructed and what effects, if any, there may be on FNMA's and FHLMC's creditworthiness and guarantees of certain mortgage-backed securities. It is also unclear whether the U.S. Treasury would continue to enforce its rights or perform its obligations related to senior preferred stock. Should FNMA's and FHLMC's conservatorship end, there could be an adverse impact on the value of their securities, which could cause losses to the Fund.

The conditions attached to the financial contribution made by the Treasury to FHLMC and FNMA and the issuance of senior preferred stock place significant restrictions on the activities of FHLMC and FNMA. FHLMC and FNMA must obtain the consent of the Treasury to, among other things, (i) make any payment to purchase or redeem its capital stock or pay any dividend other than in respect of the senior preferred stock, (ii) issue capital stock of any kind, (iii) terminate the conservatorship of the FHFA except in connection with a receivership, or (iv) increase its debt beyond certain specified levels. In addition, significant restrictions are placed on the maximum size of each of FHLMC's and FNMA's respective portfolios of mortgages and mortgage-backed securities, and the purchase agreements entered into by FHLMC and FNMA provide that the maximum size of their portfolios of these assets must decrease by a specified percentage each year. The future status and role of FHLMC and FNMA could be impacted by (among other things) the actions taken and restrictions placed on FHLMC and FNMA by the FHFA in its role as conservator, the restrictions placed on FHLMC's and FNMA's operations and activities as a result of the senior preferred stock investment made by the U.S. Treasury, market responses to developments at FHLMC and FNMA, and future legislative and regulatory action that alters the operations, ownership, structure and/or mission of these institutions, each of which may, in turn, impact the value of, and cash flows on, any mortgage-backed securities guaranteed by FHLMC and FNMA, including any such mortgage-backed securities held by a Fund.

Under the direction of the FHFA, FNMA and FHLMC have entered into a joint initiative to develop a common securitization platform for the issuance of a uniform mortgage-backed security (the "Single Security Initiative") that aligns the characteristics of FNMA and FHLMC certificates. The Single Security Initiative seeks to support the overall liquidity of the TBA market. FNMA and FHLMC began issuing uniform mortgage-backed security in June 2019, and the effects it may have on the market for mortgage-backed securities are uncertain.

Commercial banks, savings and loan institutions, private mortgage insurance companies, mortgage bankers and other secondary market issuers also create pass-through pools of conventional residential mortgage loans. Such issuers may, in addition, be the originators and/or servicers of the underlying mortgage loans as well as the guarantors of the mortgage-related securities. Pools created by such non-governmental issuers generally offer a higher rate of interest than government and government-related pools because there are no direct or indirect government or agency guarantees of payments in the former pools. However, timely payment of interest and principal of these pools may be supported by various forms of insurance or guarantees, including individual loan, title, pool and hazard insurance and letters of credit. The insurance and guarantees are issued by governmental entities, private insurers and the mortgage poolers. Such insurance and guarantees and the creditworthiness of the issuers thereof will be considered in determining whether a mortgage-related security meets the Fund's investment quality standards. There can be no assurance that the private insurers or guarantors can meet their obligations under the insurance policies or guarantee arrangements. Although the market for such securities is becoming increasingly liquid, securities issued by certain private organizations may not be readily marketable. The Funds are subject to the liquidity requirements described above.

The assets underlying mortgage-related securities may be represented by a portfolio of first lien residential mortgages (including both whole mortgage loans and mortgage participation interests) or portfolios of mortgage pass-through securities issued or guaranteed by GNMA, FNMA or FHLMC. Mortgage loans underlying a mortgage-related security may in turn be insured or guaranteed by the FHA or the VA. In the case of private issue mortgage-related securities whose underlying assets are neither U.S. Government securities nor U.S. Government-insured mortgages, to the extent that real properties securing such assets may be located in the same geographical region, the security may be subject to a greater risk of default than other comparable securities in the event of adverse economic, political or business developments that may affect such region and, ultimately, the ability of residential homeowners to make payments of principal and interest on the underlying mortgages.

Collateralized Mortgage Obligations (“CMOs”). A CMO is a hybrid between a mortgage-backed bond and a mortgage pass-through security. Similar to a bond, interest and prepaid principal is paid, in most cases, semiannually. CMOs may be collateralized by whole mortgage loans, but are more typically collateralized by portfolios of mortgage pass-through securities guaranteed by GNMA, FHLMC or FNMA, and their income streams.

CMOs are structured into multiple classes, each bearing a different stated maturity. Actual maturity and average life will depend upon the prepayment experience of the collateral. CMOs provide for a modified form of call protection through a de facto breakdown of the underlying pool of mortgages according to how quickly the loans are repaid. Monthly payment of principal received from the pool of underlying mortgages, including prepayments, is first returned to investors holding the shortest maturity class. Investors holding the longer maturity classes receive principal only after the first class has been retired. An investor is partially guarded against a sooner than desired return of principal because of the sequential payments. In a typical CMO transaction, a corporation (“issuer”) issues multiple series (e.g., A, B, C, Z) of CMO bonds (“Bonds”). Proceeds of the Bond offering are used to purchase mortgages or mortgage pass-through certificates (“Collateral”). The Collateral is pledged to a third party trustee as security for the Bonds. Principal and interest payments from the Collateral are used to pay principal on the Bonds in the order A, B, C, Z. The Series A, B and C Bonds all bear current interest. Interest on the Series Z Bond is accrued and added to principal and a like amount is paid as principal on the Series A, B or C Bond currently being paid off. When the Series A, B and C Bonds are paid in full, interest and principal on the Series Z Bond begins to be paid currently. With some CMOs, the issuer serves as a conduit to allow loan originators (primarily builders or savings and loan associations) to borrow against their loan portfolios.

FHLMC CMOs. FHLMC CMOs are debt obligations of FHLMC issued in multiple classes having different maturity dates that are secured by the pledge of a pool of conventional mortgage loans purchased by FHLMC. Unlike FHLMC PCs, payments of principal and interest on the CMOs are made semiannually, as opposed to monthly. The amount of principal payable on each semiannual payment date is determined in accordance with FHLMC’s mandatory sinking fund schedule, which, in turn, is equal to approximately 100% of FHA prepayment experience applied to the mortgage collateral pool. All sinking fund payments in the CMOs are allocated to the retirement of the individual classes of bonds in the order of their stated maturities. Payment of principal on the mortgage loans in the collateral pool in excess of the amount of FHLMC’s minimum sinking fund obligation for any payment date are paid to the holders of the CMOs as additional sinking fund payments. Because of the “pass-through” nature of all principal payments received on the collateral pool in excess of FHLMC’s minimum sinking fund requirement, the rate at which principal of the CMOs is actually repaid is likely to be such that each class of bonds will be retired in advance of its scheduled maturity date.

If collection of principal (including prepayments) on the mortgage loans during any semiannual payment period is not sufficient to meet FHLMC’s minimum sinking fund obligation on the next sinking fund payment date, FHLMC agrees to make up the deficiency from its general funds. Criteria for the mortgage loans in the pool backing the FHLMC CMOs are identical to those of FHLMC PCs. FHLMC has the right to substitute collateral in the event of delinquencies and/or defaults.

Stripped Mortgage-Backed Securities (“SMBS”). SMBS are derivative multi-class mortgage securities. SMBS may be issued by agencies or instrumentalities of the U.S. Government or by private originators of, or investors in, mortgage loans, including savings and loan associations, mortgage banks, commercial banks, investment banks and special purpose entities of the foregoing.

SMBS are usually structured with two classes that receive different proportions of the interest and principal distributions on a pool of mortgage assets. A common type of SMBS will have one class

receiving some of the interest and most of the principal from the mortgage assets, while the other class will receive most of the interest and the remainder of the principal. In the most extreme case, one class will receive all of the interest (the interest-only or IO class), while the other class will receive all of the principal (the principal-only or PO class). The cash flow and yields on IO and PO classes can be extremely sensitive to the rate of principal payments (including prepayments) on the related underlying mortgage assets, and a rapid rate of principal payments may have a material adverse effect on the Government Money Market Fund's yield to maturity from these securities. If the underlying mortgage assets experience greater than anticipated prepayments of principal, the Government Money Market Fund may fail to fully recoup its initial investment in these securities even if the security is in one of the highest rating categories.

Although SMBS are typically purchased and sold by institutional investors through several investment banking firms acting as brokers or dealers, these securities were only recently developed. As a result, established trading markets have not yet developed and, accordingly, these securities may be deemed "illiquid" and subject to the Government Money Market Fund's limitations on investments in illiquid securities.

Mortgage-Backed Securities and Asset-Backed Securities - Types of Credit Support. Mortgage-backed securities and asset-backed securities are often backed by a pool of assets representing the obligations of a number of different parties. To lessen the effect of failure by obligors on underlying assets to make payments, such securities may contain elements of credit support. Such credit support falls into two categories: (i) liquidity protection and (ii) protection against losses resulting from ultimate default by an obligor on the underlying assets. Liquidity protection refers to the provision of advances, generally by the entity administering the pool of assets, to ensure that the pass-through of payments due on the underlying pool occurs in a timely fashion. Protection against losses resulting from ultimate default enhances the likelihood of ultimate payment of the obligations on at least a portion of the assets in the pool. Such protection may be provided through guarantees, insurance policies or letters of credit obtained by the issuer or sponsor from third parties, through various means of structuring the transaction or through a combination of such approaches. However, the Fund is subject to the credit risk of a person or entities providing the credit enhancements.

The ratings of mortgage-backed securities and asset-backed securities for which third-party credit enhancement provides liquidity protection or protection against losses from default are generally dependent upon the continued creditworthiness of the provider of the credit enhancement. The ratings of such securities could be subject to reduction in the event of deterioration in the creditworthiness of the credit enhancement provider even in cases where the delinquency and loss experience on the underlying pool of assets is better than expected.

Examples of credit support arising out of the structure of the transaction include "senior-subordinated securities" (multiple class securities with one or more classes subordinate to other classes as to the payment of principal thereof and interest thereon, with the result that defaults on the underlying assets are borne first by the holders of the subordinated class), creation of "reserve funds" (where cash or investments, sometimes funded from a portion of the payments on the underlying assets, are held in reserve against future losses) and "overcollateralization" (where the scheduled payments on, or the principal amount of, the underlying assets exceed those required to make payment of the securities and pay any servicing or other fees). The degree of credit support provided for each issue is generally based on historical information with respect to the level of credit risk associated with the underlying assets. Delinquency or loss in excess of that which is anticipated could adversely affect the return on an investment in such a security.

OPERATIONAL RISK

The Funds' investments or their service providers may be negatively impacted due to operational risks arising from factors such as processing errors and human errors, inadequate or failed internal or external processes, failures in systems and technology, changes in personnel, and errors caused by third-party service providers or trading counterparties. The use of certain investment strategies that involve manual or additional processing increases these risks. Although the Funds attempt to minimize such failures through controls and oversight, it is not possible to identify all of the operational risks that may affect a Fund or to develop processes and controls that completely eliminate or mitigate the occurrence of such failures. A Fund and its shareholders could be negatively impacted as a result.

In addition, the Funds rely on various sources to calculate their NAV. Therefore, each Fund is subject to certain operational risks associated with reliance on third party service providers and data sources. NAV calculation may be impacted by operational risks arising from factors such as failures in systems and technology. Such failures may result in delays in the calculation of a Fund's NAV and/or the inability to calculate NAV over extended time periods. Each Fund may be unable to recover any losses associated with such failures.

The operation risks could also arise from events that are wholly or partially beyond the Funds' control. These events would include, but are not limited to, armed conflicts, natural disasters, pandemics, epidemics, social unrest, and government shutdowns.

REPURCHASE AGREEMENTS

The Funds may invest in repurchase agreements. The U.S. Treasury Money Market Fund may invest in repurchase agreements only in respect of direct obligations of the U.S. Treasury. A repurchase agreement arises when a buyer purchases an obligation and simultaneously agrees with the vendor to resell the obligation to the vendor at an agreed-upon price and time, which is usually not more than seven days from the date of purchase. The resale price of a repurchase agreement is greater than the purchase price, reflecting an agreed-upon market rate which is effective for the period of time the buyer's funds are invested in the obligation and which is not related to the coupon rate on the purchased obligation. Obligations serving as collateral for each repurchase agreement are delivered to a Fund's custodian bank either physically or in book entry form and the collateral is marked to market daily to ensure that each repurchase agreement is fully collateralized at all times. A buyer of a repurchase agreement runs a risk of loss if, at the time of default by the issuer, the value of the collateral securing the agreement is less than the price paid for the repurchase agreement. A Fund may enter into repurchase agreements only with a vendor which is a member bank of the Federal Reserve System or which is a "primary dealer" (as designated by the Federal Reserve Bank of New York) in U.S. Government obligations. A Fund may also enter into a repurchase agreement with the Federal Reserve Bank of New York, the Fixed Income Clearing Corporation, or certain counterparties approved by the Adviser. The restrictions and procedures that govern the investment of a Fund's assets in repurchase obligations are designed to minimize the Fund's risk of losses from those investments. Repurchase agreements are considered collateralized loans under the 1940 Act.

The repurchase agreement provides that, in the event the seller fails to pay the price agreed upon on the agreed upon delivery date or upon demand, as the case may be, the Fund will have the right to liquidate the securities. If, at the time a Fund is contractually entitled to exercise its right to liquidate the securities, the seller is subject to a proceeding under the bankruptcy laws or its assets are otherwise subject to a stay order, the Fund's exercise of its right to liquidate the securities may be delayed and result in certain losses and costs to the Fund. The Funds have each adopted and follow procedures which are intended to minimize the risks of repurchase agreements. For example, each Fund only enters into repurchase

agreements after the Adviser has determined that the seller is creditworthy, and the Adviser monitors that seller's creditworthiness on an ongoing basis. Moreover, under such agreements, the value of the securities (which are marked to market every business day) is required to be greater than the repurchase price, and the Funds have the right to make margin calls at any time if the value of the securities falls below the agreed upon margin.

All repurchase agreements entered into by the Funds are fully collateralized at all times during the period of the agreement in that the value of the collateral is at least equal to the amount of the loan, reduced by the transaction costs (including the loss of interest) that the Fund reasonably could expect to incur in the event that the Fund must liquidate the collateral, and the Fund or its custodian bank has possession of the collateral, which the Board believes gives the Fund a valid, perfected security interest in the collateral. The Board believes that the collateral underlying repurchase agreements may be more susceptible to claims of the seller's creditors than would be the case with securities owned by a Fund. Repurchase agreements give rise to income which does not qualify as tax-exempt income when distributed to Fund shareholders.

Repurchase agreements involving obligations other than U.S. Government Securities (such as commercial paper, corporate bonds, mortgage loans and equities) may be subject to special risks and may not have the benefit of certain protections in the event of the counterparty's insolvency. Moreover, repurchase agreements secured by obligations that are not eligible for direct investment under Rule 2a-7 under the 1940 Act or a Fund's investment strategies and limitations, may require the Fund to promptly dispose of such collateral if the seller or guarantor becomes insolvent. If the seller or guarantor becomes insolvent, a Fund may suffer delays, costs and possible losses in connection with the disposition of collateral.

RISKS OF QUALIFIED FINANCIAL CONTRACTS

Regulations adopted by federal banking regulators under the Dodd-Frank Act require that certain qualified financial contracts ("QFCs") with counterparties that are part of U.S. or foreign global systemically important banking organizations be amended to include contractual restrictions on close-out and cross-default rights. QFCs include, but are not limited to, repurchase agreements. If a covered counterparty of a Fund or certain of the covered counterparty's affiliates were to become subject to certain insolvency proceedings, the Fund may be temporarily unable to exercise certain default rights, and the QFC may be transferred to another entity. These requirements may impact a Fund's credit and counterparty risks.

SELECTION OF MONEY MARKET INVESTMENTS

The Funds invest in fixed income securities. The value of the fixed income securities in a Fund's portfolio can be expected to vary inversely with changes in prevailing interest rates. Although each Fund's investment policies are designed to minimize these changes and to maintain an NAV of \$1.00 per share, there is no assurance that these policies will be successful. Withdrawals by shareholders could require the sale of portfolio investments at a time when such a sale might not otherwise be desirable.

Securities issued or guaranteed as to principal and interest by the U.S. Government include a variety of Treasury securities, which differ in their interest rates, maturities and dates of issue. Securities issued or guaranteed by agencies or instrumentalities of the U.S. Government may or may not be supported by the full faith and credit of the United States or by the right of the issuer to borrow from the Treasury.

Considerations of portfolio quality, maturity, diversification and liquidity, as well as preservation of capital, mean that a Fund may not necessarily invest in money market instruments paying the highest available yield at a particular time. Consistent with its investment objectives, the Funds will each attempt

to maximize yields by portfolio trading and by buying and selling portfolio investments in anticipation of, or in response to, changing economic and money market conditions and trends. The Funds will each also invest to take advantage of what the Adviser believes to be temporary disparities in yields of different segments of the high-grade money market or among particular instruments within the same segment of the market. In purchasing and selling securities for the Funds, portfolio managers consider the Adviser's credit analysis. With respect to the Government Money Market Fund, portfolio managers select investments from an approved credit list compiled by the Adviser's global credit analysts, who have conducted an independent qualitative and quantitative review of each issuer on the list. Safety is prioritized, with additional emphasis placed on liquidity and yield. These policies, as well as the relatively short maturity of obligations purchased by a Fund, may result in frequent changes in the Fund's portfolio. Portfolio turnover may give rise to taxable gains. The Funds do not usually pay brokerage commissions in connection with the purchase or sale of portfolio securities.

U.S. GOVERNMENT SECURITIES

The Funds may each invest in U.S. Government Securities. U.S. Government Securities include bills, notes, and bonds issued by the U.S. Treasury and securities issued or guaranteed by agencies or instrumentalities of the U.S. Government. The U.S. Treasury Money Market Fund invests only in obligations of the U.S. Treasury and therefore may not invest in obligations issued or guaranteed by agencies or instrumentalities of the U.S. Government.

Some U.S. Government securities are supported by the direct full faith and credit pledge of the U.S. Government; others are supported by the right of the issuer to borrow from the U.S. Treasury; others, such as securities issued by the FNMA, are supported by the discretionary authority of the U.S. Government to purchase the agencies' obligations; and others are supported only by the credit of the issuing or guaranteeing instrumentality. There is no assurance that the U.S. Government will be able or willing to repay any principal or interest when due, or will provide financial support to a U.S. Government agency, authority, instrumentality or sponsored enterprise when it is not obligated by law to do so.

Regarding certain federal agency securities or government sponsored entity securities (such as debt securities or mortgage-backed securities issued by FNMA, FHLMC, Federal Home Loan Banks, Federal Farm Credit Bank and other government sponsored agencies), you should be aware that although the issuer may be chartered or sponsored by an Act of Congress, the issuer is not funded by congressional appropriations, and its securities are neither guaranteed nor insured by the U.S. Treasury. This risk does not apply to the Treasury Money Market Fund, which invests only in obligations of the U.S. Treasury and does not invest in obligations issued or guaranteed by agencies or instrumentalities of the U.S. government.

PORTFOLIO TRANSACTIONS

Portfolio securities normally will be purchased or sold from or to issuers directly or from or to dealers serving as market makers for the securities at a net price. Generally, money market securities are traded on a principal basis and do not involve brokerage commissions. The cost of executing portfolio securities transactions for each Fund primarily consists of dealer spreads and underwriting commissions. The Adviser is primarily responsible for portfolio decisions and the placing of portfolio transactions. The Trust has no obligation to deal with any dealer or group of dealers in the execution of transactions in portfolio securities for each Fund. Allocation of transactions, including their frequency, to various dealers is determined by the Adviser in its best judgment and in a manner deemed to be in the best interest of each Fund's shareholders rather than by any formula. In placing orders for each Fund, the primary consideration is prompt execution of orders in an effective manner at the most favorable price, although

the Fund does not necessarily pay the lowest spread or commission available. Other factors taken into consideration are the dealer's general execution and operational facilities, the type of transaction involved and other factors, such as the dealer's risk in positioning the securities. To the extent consistent with applicable legal requirements, the Adviser may place orders for the purchase and sale of Fund investments for a Fund with a broker-dealer affiliate of the Adviser.

The Adviser may, in circumstances in which two or more dealers are in a position to offer comparable results and subject to certain conditions, give preference to a dealer that has provided statistical or other research services to the Adviser. By allocating transactions in this manner, the Adviser is able to supplement its research and analysis with the views and information of securities firms. These services, which in some cases may also be purchased for cash, include such matters as general economic and security market reviews, industry and company reviews, evaluations of securities and recommendations as to the purchase and sale of securities. Some of these services are of value to the Adviser in advising several of its clients (including the Funds), although not all of these services are necessarily useful and of value in managing each Fund. The management fee paid from each Fund is not reduced because the Adviser and its affiliates receive such services.

Under the 1940 Act, persons affiliated with HSBC Bank USA, the Adviser, the Trust or Foreside Distribution Services, L.P. ("Foreside" or "Distributor") are generally prohibited from dealing with a Fund as a principal in the purchase and sale of securities. A Fund may purchase securities from underwriting syndicates of which the Distributor or other affiliate is a member under certain conditions in accordance with the provisions of a rule adopted under the 1940 Act. Under the 1940 Act, persons affiliated with the Adviser, a Fund or Foreside may act as a broker for the Fund. In order for such persons to effect any portfolio transactions for a Fund, the commissions, fees or other remuneration received by such persons must be reasonable and fair compared to the commissions, fees or other remunerations paid to other brokers in connection with comparable transactions involving similar securities being purchased or sold on an exchange during a comparable period of time. This standard would allow the affiliate to receive no more than the remuneration that would be expected to be received by an unaffiliated broker in a commensurate arms-length transaction. The Trustees of the Trust regularly review any commissions paid by the Funds to affiliated brokers. The Funds will not do business with nor pay commissions to affiliates of the Adviser in any portfolio transactions where they act as principal.

As permitted by Section 28(e) of the Securities Exchange Act of 1934, as amended ("1934 Act"), the Adviser may cause each Fund to pay a broker-dealer which provides "brokerage and research services" (as defined in the 1934 Act) to the Adviser an amount of commission for effecting a securities transaction for the Fund in excess of the commission which another broker-dealer would have charged for effecting that transaction, provided that the Adviser determines in good faith that the greater commission is reasonable in relation to the value of the brokerage and research services provided by the executing broker-dealer viewed in terms of either a particular transaction or its respective overall responsibilities to the Fund or to its other clients. Not all of such services are useful or of value in advising each Fund.

The term "brokerage and research services" includes advice as to the value of securities, the advisability of investing in, purchasing, or selling securities, and the availability of securities or of purchasers or sellers of securities; furnishing analyses and reports concerning issues, industries, securities, economic factors and trends, portfolio strategy and the performance of accounts; and effecting securities transactions and performing functions incidental thereto, such as clearance and settlement. Although commissions paid on every transaction will, in the judgment of the Adviser, be reasonable in relation to the value of the brokerage services provided, commissions exceeding those which another broker might charge may be paid to broker-dealers who were selected to execute transactions on behalf of the Funds and the Adviser's other clients in part for providing advice as to the availability of securities or of purchasers or sellers of securities and services in effecting securities transactions and performing

functions incidental thereto, such as clearance and settlement. The SEC has published interpretative guidance that tightened previously existing standards concerning the types of expenses that qualify for the Section 28(e) safe harbor and set forth certain steps that investment advisers would need to take in order to ensure such qualification.

Investment decisions for each Fund and for the other investment advisory clients of the Adviser are made with a view to achieving their respective investment objectives. Investment decisions are the product of many factors in addition to basic suitability for the particular client involved. Thus, a particular security may be bought for certain clients even though it could have been sold for other clients at the same time, and a particular security may be sold for certain clients even though it could have been bought for other clients at the same time. Likewise, a particular security may be bought for one or more clients when one or more other clients are selling that same security. In some instances, one client may sell a particular security to another client. Two or more clients may simultaneously purchase or sell the same security, in which event each day's transactions in that security are, insofar as practicable, averaged as to price and allocated between such clients in a manner which in the Adviser's opinion is equitable to each and in accordance with the amount being purchased or sold by each. In addition, when purchases or sales of the same security for a Fund and for other clients of the Adviser occur contemporaneously, the purchase or sale orders may be aggregated in order to obtain any price advantage available to large denomination purchases or sales. There may be circumstances when purchases or sales of portfolio securities for one or more clients will have an adverse effect on other clients in terms of the price paid or received or of the size of the position obtainable. It is recognized that, in some cases, this system could have a detrimental effect on the price or volume of the security as far as a Fund is concerned. In other cases, however, the Adviser believes that the Funds' ability to participate in volume transactions will produce better executions for the Funds.

The Board has adopted a policy to ensure compliance with Rule 12b-1(h) under the 1940 Act in the selection of broker-dealers to execute portfolio transactions for the Funds. Generally, Rule 12b-1(h) prohibits the Funds from compensating a broker-dealer for promotion or sale of Fund shares by directing to the broker-dealer securities transactions or remuneration received or to be received from such portfolio securities transactions.

Since the Funds invest primarily in fixed-income securities, it is anticipated that most purchases and sales will be with the issuer or with underwriters of or dealers in those securities, acting as principal. Accordingly, the Funds would not ordinarily pay significant brokerage commissions with respect to their securities transactions.

In the United States and in some other countries debt securities are traded principally in the over-the-counter market on a net basis through dealers acting for their own account and not as brokers. In other countries, both debt and equity securities are traded on exchanges at fixed commission rates. The cost of securities purchased from underwriters includes an underwriter's commission or concession, and the prices at which securities are purchased and sold from and to dealers include a dealer's mark-up or mark-down. The Adviser normally seeks to deal directly with the primary market makers or on major exchanges unless, in its opinion, better prices are available elsewhere. Subject to the requirement of seeking best execution, securities may, as authorized by each investment advisory contract, be bought from or sold to dealers who have furnished statistical, research and other information or services to the Adviser. At present, no arrangements for the recapture of commission payments are in effect.

During the fiscal year ended October 31, 2019, the Funds acquired securities issued by their regular brokers or dealers, or their parent companies, as reflected in the table below. The following shows the aggregate holdings of the securities of each such issuer as of October 31, 2019. (For these purposes a regular broker or dealer includes any of the (a) ten brokers or dealers that received the greatest dollar

amount of brokerage commissions by virtue of direct or indirect participation in the Trust’s portfolio transactions during the most recent fiscal year, (b) ten brokers or dealers that engaged as principal in the largest dollar amount of portfolio transactions of the Trust during its most recent fiscal year, or (c) ten brokers or dealers that sold the largest dollar amount of securities of the Funds during the Trust’s most recent fiscal year.)

Fund	Bank of New York	Credit Agricole	Deutsche Bank Securities, Inc.	Dreyfus	Natwest Markets PLC
U.S. Government Money Market Fund	\$1,200,000,000	\$110,000,000	\$500,000,000	\$213,208,914	\$500,000,000
	Societe Generale	Standard Chartered Bank	State Street Bank	Toronto Dominion Bank NY	
	\$1,600,000,000	\$300,000,000	\$1,100,000,000	\$450,000,000	

DISCLOSURE OF PORTFOLIO HOLDINGS

The Board has adopted policies and procedures relating to the disclosure of the Trust’s portfolio securities (the “Policy”). The Policy is designed to ensure that the disclosure of holdings information is necessary to the Trust’s operation or useful to the Trust’s shareholders without compromising the integrity or performance of the Trust. Disclosure of information regarding the portfolio holdings of the Funds occurs only upon the determination, by the Trust’s Chief Compliance Officer (“CCO”), that such disclosure is in the best interests of the Funds’ shareholders and that it does not present a conflict of interest between the shareholders and the Adviser, principal underwriter, or any affiliated person of the Fund, the Adviser, or its principal underwriter.

The Trust discloses a complete schedule of investments in each Semi-Annual Report and Annual Report to Shareholders. Semi-Annual and Annual Reports are distributed to shareholders and are also available, free of charge, on the EDGAR database on the SEC’s website at www.sec.gov and on the Trust’s website at <https://investorfunds.us.hsbc.com>.

The Funds will also disclose on the Adviser’s Web site: (i) within five business days after the end of each month, a complete schedule of portfolio holdings and certain other information, including the dollar-weighted average portfolio maturity and dollar-weighted average portfolio life of each Fund; (ii) each business day, (a) the percentage of each Fund’s total assets that are invested daily and weekly liquid assets, (b) each Fund’s daily net inflows or outflows, and (c) each Fund’s marked-to-market NAV per share. In addition, each Fund will file with the SEC on Form N-MFP, within five business days after the end of each month, more detailed portfolio holdings information of the Fund. The Funds’ Form N-MFP filings will be available on the SEC’s Web site, and the Adviser’s Web site will contain a link to such filings.

The Funds will also publicly disclose the complete schedule of each Fund’s portfolio holdings on a weekly or monthly basis. This information, which will include portfolio holdings, sector holdings and other characteristics, will generally be available on the Adviser’s Web site subject to a delay of five (5) business days. The disclosure of weekly portfolio holdings information, however, may not occur when monthly portfolio holdings information will be available shortly before or after the date on which the weekly portfolio holdings information would otherwise be available. Portfolio holdings information will be available until it is updated as of the following period. The information on the Adviser’s Web site is publicly available to all categories of persons.

The Trust or the Adviser may share non-public holdings information of the Trust on a more frequent basis with the Adviser and other service providers to the Trust (including the Trust’s custodian; the Sub-Administrator; and pricing services such as FT Interactive). In addition, the Trust may share non-public

holdings information with mutual fund ranking and rating services, including Standard & Poor's Corporation, Morningstar, Lipper Analytical Services, FactSet, Fitch Ratings, Inc. and Bloomberg L.P. These service providers and other entities owe contractual, fiduciary, or other legal duties of confidentiality to the Trust or the Adviser that foster reasonable expectations that holdings information will not be misused. The Trust's officers may authorize disclosure of the Trust's holdings portfolio information to service providers where such service provider needs information to fulfill its duties.

The Trust may also disclose information about portfolio holdings to mutual fund evaluation services that agree not to disclose the information to third parties and that enter into a Confidentiality Agreement. Such Confidentiality Agreement provides, among other things, that non-public portfolio holdings information will be kept confidential and that such information will be used solely for the purpose of analysis and evaluation of the portfolio. Disclosures may be made to other third parties under a Confidentiality Agreement satisfactory to Fund counsel and the Trust's CCO. The Confidentiality Agreement prohibits anyone in possession of non-public holdings information from purchasing or selling securities based on such information, or from disclosing such information to other persons, except for those who are actually engaged in, and need to know, such information to perform services for the portfolio.

Currently, the Trust has arrangements to provide additional disclosure of holdings information to the following evaluation services: Lipper Analytical Services (10 days after the end of each month), Morningstar (5 business days after the end of each month), Bloomberg L.P. (60 days after the end of each quarter), FactSet (daily), Fitch Ratings, Inc. (two times per month) and Standard & Poor's Corporation (between 3-5 days after the end of each week).

No compensation or other consideration is paid to or received by any party in connection with the disclosure of holdings information, including the Trust, the Adviser and its affiliates.

Pursuant to the Policy, the CCO may authorize exceptions and allow disclosures under other circumstances he or she deems appropriate. In addition, a Fund may disclose its holdings, as appropriate, in conformity with the foregoing principles. Compliance with the Policy (including the use of the portfolio holdings information) will be monitored by the CCO or his or her designee on a regular basis, and any violations constituting a "Material Compliance Matter" as defined under Rule 38a-1 under the 1940 Act will be reported by the CCO to the Board.

INVESTMENT RESTRICTIONS

Each Fund has adopted certain fundamental and non-fundamental investment restrictions. Fundamental investment restrictions may not be changed without approval by holders of a "majority of the outstanding shares" of the Fund, which, as used in this SAI, means the vote of the lesser of (i) 67% or more of the outstanding "voting securities" of the Fund present at a meeting, if the holders of more than 50% of the outstanding "voting securities" of the Fund are present or represented by proxy, or (ii) more than 50% of the outstanding "voting securities" of the Fund. The term "voting securities" as used in this paragraph has the same meaning as in the 1940 Act.

Notwithstanding anything contained herein to the contrary, the Funds will seek to comply with the maturity, quality, liquidity and diversification requirements of Rule 2a-7 under the 1940 Act, including the prohibition from acquiring an illiquid security if, immediately after the acquisition, a Fund would have more than 5% of its total assets invested in illiquid securities.

NON-FUNDAMENTAL RESTRICTIONS

Each of the Funds is subject to the following non-fundamental restriction, in addition to the fundamental restrictions set forth below under the headings for each Fund:

1. The Fund may not directly purchase securities or other instruments issued by companies that manufacture cluster munitions or anti-personnel mines. The Adviser uses the definitions within the 1997 Mine Ban Treaty and the 2008 Convention on Cluster Bombs for guidance and implementation. The Fund may purchase securities of registered investment companies, ETNs or other pooled vehicles that invest in companies that manufacture cluster munitions or anti-personnel mines.

FUNDAMENTAL RESTRICTIONS

U.S. GOVERNMENT MONEY MARKET FUND

As a matter of fundamental policy, the Trust, on behalf of the Fund:

1. may not borrow money, except that, as a temporary measure for extraordinary or emergency purposes, the Fund may borrow from banks in an amount not to exceed 1/3 of the value of the net assets of the Fund including the amount borrowed (moreover, the Trust (on behalf of the Fund) may not purchase any securities at any time at which borrowings exceed 5% of the total assets of the Fund) taken in each case at market value;
2. may not purchase any security or evidence of interest therein on margin, except that the Trust may obtain such short-term credit for the Fund as may be necessary for the clearance of purchases and sales of securities;
3. may not act as an underwriter of securities issued by others, except to the extent it could be considered an underwriter in the acquisition and disposition of restricted securities;
4. may make loans to the extent permitted under the 1940 Act and the rules and regulations thereunder;
5. may not purchase or sell real estate (including limited partnership interests, but excluding securities secured by real estate or interests therein), interests in oil, gas or mineral leases, commodities or commodity contracts in the ordinary course of business (the Trust reserves the freedom of action to hold and to sell for the Fund real estate acquired as a result of its ownership of securities);
6. may not “concentrate” its investments in any one industry (excluding the U.S. Government, its agencies or instrumentalities and repurchase agreements collateralized by such investments), except to the extent permitted under the 1940 Act and the rules and regulations thereunder; provided, however, that the Fund may invest without limitation in U.S. dollar-denominated obligations of U.S. banks, foreign branches of U.S. banks and U.S. branches of foreign banks;
7. may issue senior securities to the extent permitted under the 1940 Act and the rules and regulations thereunder;

8. may not pledge, mortgage or hypothecate for any purpose in excess of 10% of the net assets of the Fund (taken at market value);
9. may not sell any security which it does not own, unless, by virtue of its ownership of other securities, it has at the time of sale a right to obtain securities, without payment of further consideration, equivalent in kind and amount to the securities sold; and provided, that, if such right is conditional, the sale is made upon the same conditions;
10. may not invest for the purpose of exercising control or management;
11. may not, taken together with any investments described in Investment Restriction (14) below, invest more than 10% of the net assets of the Fund in securities that are not readily marketable, including debt securities for which there is no established market and fixed time deposits and repurchase agreements maturing in more than seven days;
12. may not purchase or retain any securities issued by an issuer any of whose officers, directors, trustees or security holders is an officer or Trustee of the Trust, or is an officer or director of the Adviser, if after the purchase of the securities of such issuer by the Trust, on behalf of the Fund, one or more of such persons owns beneficially more than 1/2 of 1% of the shares or securities, or both, all taken at market value, of such issuer, and such persons owning more than 1/2 of 1% of such shares or securities together own beneficially more than 5% of such shares or securities, or both, all taken at market value;
13. may not write, purchase or sell any put or call option or any combination thereof;
14. may not, taken together with any investments described in Investment Restriction (11) above, invest in securities which are subject to legal or contractual restrictions on resale (other than fixed time deposits and repurchase agreements maturing in not more than seven days) if, as a result thereof, more than 10% of the net assets of the Fund, (taken at market value) would be so invested (including fixed time deposits and repurchase agreements maturing in more than seven days);
15. may not purchase securities of any issuer if such purchase at the time thereof would cause more than 10% of the voting securities of such issuer to be held for the Fund; or
16. may not make short sales of securities or maintain a short position, unless, at all times when a short position is open, the Fund owns an equal amount of such securities or securities convertible into or exchangeable, without payment of any further consideration, for securities of the same issue as, and equal in amount to, the securities sold short, and unless not more than 10% of the net assets of the Fund (taken at market value) is held as collateral for such sales at any one time.

For the purposes of interpreting the fundamental policies, securities deemed to be liquid in accordance with the procedures adopted by the Board are not included in the limitation set forth in Items 11 and 14.

U.S. TREASURY MONEY MARKET FUND

As a matter of fundamental policy, the Trust, on behalf of the Fund:

1. may not purchase securities on margin (except for short-term credits necessary for the clearance of transactions) or make short sales of securities (the deposit or payment by the Fund of initial or maintenance margin in connection with futures contracts or related options transactions is not considered the purchase of a security on margin);
2. may not underwrite securities of other issuers, to the extent that the purchase of municipal obligations, or other permitted investments, directly from the issuer thereof or from an underwriter for an issuer and the later disposition of such securities in accordance with the Fund's investment program may be deemed to be an underwriting;
3. may not invest an amount equal to 10% or more of the value of its net assets in investments which are illiquid (including repurchase agreements and fixed time deposits not subject to withdrawal penalties having maturities of more than seven calendar days);
4. may not issue senior securities, borrow money or pledge or mortgage its assets, except the Fund may borrow from banks up to 33 1/3% of the current value of the total assets of the Fund and pledge up to 33 1/3% of its assets to secure such borrowings;
5. may not make loans or lend its portfolio securities;
6. may not purchase securities other than direct obligations of the U.S. Treasury or repurchase agreements pertaining thereto (there being no limit on the amount of the assets of the U.S. Treasury Fund which may be invested in the securities of any one issuer of such obligations); and
7. may not purchase or sell real estate (including limited partnership interests but excluding securities secured by real estate or interests therein), interests in oil, gas or mineral leases, commodities or commodity contracts in the ordinary course of business (the Trust reserves the freedom of action to hold and to sell for the Fund real estate acquired as a result of its ownership of securities).

For the purposes of interpreting the fundamental policies, securities deemed to be liquid in accordance with the procedures adopted by the Board are not included in the limitations set forth in Item 3.

DIVERSIFICATION AND OTHER MEASURES

Each Fund's diversification tests are measured at the time of initial purchase and calculated as specified in Rule 2a-7 under the 1940 Act, which may allow a Fund to exceed the limits specified in the Prospectus for certain securities subject to guarantees or demand features. A Fund will be deemed to satisfy the maturity requirements described in the Prospectus to the extent that the Fund satisfies the applicable maturity requirements in Rule 2a-7 under the 1940 Act. The definition of issuer for purposes of these investment restrictions is the same as that described under "Investment Objective, Policies and Restrictions" in this SAI for the purpose of diversification under the 1940 Act.

It is the intention of each Fund, unless otherwise indicated, that with respect to the Fund's policies that are the result of the application of law, the Fund will take advantage of the flexibility provided by rules or interpretations of the SEC currently in existence or promulgated in the future or changes to such laws.

PERCENTAGE AND RATING RESTRICTIONS

If a percentage restriction or a rating restriction on investment or utilization of assets set forth above or referred to in a Fund's Prospectus is adhered to at the time an investment is made or assets are so utilized, a later change in percentage resulting from changes in the value of the securities held by a Fund or a later change in the rating of a security held by a Fund is not considered a violation of policy. However, the Adviser will consider such change in its determination of whether to continue to hold the security and provided further, that the Adviser will take appropriate steps, which may include the disposition of portfolio securities, as may be necessary to satisfy the applicable requirements of the 1940 Act and/or the rules thereunder with respect to the Fund's investments in illiquid securities or any borrowings by the Fund.

MANAGEMENT OF THE TRUST

BOARD OF TRUSTEES

Overall responsibility for management of HSBC Funds (the "Trust") rests with the Board. The Trustees elect the officers of the Trust and appoint service providers to manage the Trust's day-to-day operations. The Trustees meet regularly to discuss and consider matters concerning the Trust and to oversee the Trust's activities, including the investment performance of the Funds and the operation of the Trust's compliance program, and to evaluate and address potential conflicts and risks associated with the Trust's activities.

Board Composition And Leadership Structure

The Trust has a Board of Trustees. The Board consists of five Trustees, four of whom are not "interested persons" (as that term is defined by Section 2(a)(19) of the 1940 Act) of the Trust (the "Independent Trustees"), and one of whom is an "interested person" of the Trust (the "Interested Trustee") by virtue of her employment with the Adviser. The Board is responsible for the overall management of the Trust, including general supervision and review of the Trust's investment activities. The Board elects the officers of the Trust who are responsible for administering the Trust's day-to-day operations. The Trust enters into agreements with various entities to manage the day-to-day operations of the Trust, including with the Adviser, the Subadvisers (as applicable), the administrator, the transfer agent, the distributor and the custodian. The Board is responsible for selecting these service providers (based on the recommendation of the Adviser), approving the terms of their contracts with the Trust and exercising general oversight of these service providers on an ongoing basis.

The Chairman of the Board, Mr. Robards, is an Independent Trustee, and, among other duties and responsibilities, serves as a point person for communications between the Trustees and the Trust's management. The Trustees interact directly with the Chairman, Chairs of the Trust's standing Committees, each other, the Trust's officers, and senior management of the Adviser and other service providers of the Trust at scheduled meetings and between meetings, as appropriate.

The Board has established the following standing committees: the Audit and Compliance Committee; the Valuation and Investment Oversight Committee; and the Nominating and Corporate Governance Committee (the "Committees") to facilitate the Trustees' effective oversight of the management of those aspects of the Trust's operations. Each Committee has a Chair, who is an Independent Trustee. Each Committee's responsibilities are discussed in greater detail below. By assigning areas of responsibility to committees of Trustees, and to the full Board, the Board's leadership structure enables it to exercise informed and independent judgment over the matters within its purview.

Board's Role In Risk Oversight Of The Trust

The Board, as a whole, considers risk management issues as part of its general oversight responsibilities throughout the year at regular Board meetings, as does each Committee of the Trust. The Board and its Committees consider risk management through, among other things, regular reports that have been developed by management, in consultation with the Board, its Committees, and counsel. These reports address investment, valuation, liquidity, operations, and compliance matters. The Board may also receive special written reports or presentations on cybersecurity and a variety of other risk issues, either upon request or upon the Adviser's initiative. In addition, the Valuation and Investment Oversight Committee of the Board meets regularly with the Adviser's internal risk department and Fund Pricing Group to review reports on their examinations of liquidity risks and their fair value determinations, respectively, on the Funds' investment portfolios.

With respect to investment risk, the Board receives regular written reports describing and analyzing the investment performance of the Funds, which may include the comparison of the Funds' performance to their respective benchmarks and/or peer groups when applicable. In addition, investment personnel for the Funds meet regularly with the Board to discuss Fund performance, including investment risk, liquidity and market updates. Also, to the extent that a Fund changes a particular investment strategy or invests in a new type of security that could have a material effect on the Fund's risk profile, the Board generally is consulted.

With respect to valuation, the Board receives regular written reports summarizing the discussions from the Adviser's internal Pricing and Valuation Committee meetings. The Board receives regular written reports that enable it to monitor the number of fair valued securities in a particular Fund, the reasons for the fair valuation and the methodology used to arrive at the fair value. In addition, the Trust's Audit and Compliance Committee reviews certain valuation matters with the Funds' Treasurer and the Trust's independent auditors in connection with the Committee's review of the results of the audit of the Funds' annual financial statements.

With respect to compliance risks, the Board and the Audit and Compliance Committee receive regular compliance reports and meets regularly with the CCO to discuss compliance issues, including compliance risks. In accordance with SEC rules, the Independent Trustees meet regularly in executive session with the CCO, and the CCO prepares and presents an annual written compliance report to the Board. The Board also meets regularly with the Chief Compliance Officer of the Adviser. The Board adopts compliance policies and procedures for the Trust and approves such procedures of certain of the Trust's service providers, such as the Adviser and the Subadvisers (as applicable). The compliance policies and procedures are specifically designed to detect and prevent violations of the federal securities laws.

Qualifications Of The Trustees

The names of the Trustees, their addresses, ages, positions held with the Trust, principal occupation(s) during the past five years, number of portfolios in the fund complex overseen, and other directorships held by each Trustee are set forth below.

TRUSTEES

Name ⁽¹⁾	Position(s) Held With Trust	Length of Time Served	Principal Occupation(s) During Past 5 Years	Portfolios in Fund Complex Overseen by Trustee ⁽²⁾	Other Directorships Held By Trustee During the Past 5 Years ⁽³⁾
Independent Trustees					
Thomas F. Robards Age: 73	Trustee and Chairman	2005 to present	Private Investor (2003 – present)	8	Ellington Residential Mortgage REIT (NYSE listed real estate investment trust) (2013 – present); and Ellington Financial LLC (NYSE listed financial services company) (2007 – present)
Marcia L. Beck Age: 64	Trustee	2008 to present	Private Investor (1999 – present)	8	None
Susan C. Gause Age: 67	Trustee	2013 to present	Private Investor (2003 – present)	8	Metropolitan Series Fund (2012 – present); and Met Investors Series Trust (2008 – present)
Susan S. Huang Age: 65	Trustee	2008 to present	Private Investor (2000 – present)	8	None
Interested Trustee					
Deborah A. Hazell ⁽⁴⁾ Age: 56	Trustee	2011 to present	Director and Chief Executive Officer, HSBC Global Asset Management (USA) Inc. (2011 – present)	8	None

⁽¹⁾ Each Independent Trustee may be contacted by writing to the Trustee, c/o DST Asset Manager Solutions, Inc., P.O. Box 219691, Kansas City, MO 64121-9691, Attn: Richard A. Fabietti. Ms. Hazell may be contacted by writing to 452 Fifth Avenue New York, NY 10018.

⁽²⁾ The “Fund Complex” is comprised of the 8 portfolios of HSBC Funds.

⁽³⁾ This column includes only directorships of companies required to report to the SEC under the Securities Exchange Act of 1934 (*i.e.*, “public companies”) or other investment companies registered under the 1940 Act.

⁽⁴⁾ Ms. Hazell is considered to be an “Interested Trustee” because she holds positions with HSBC Global Asset Management (USA) Inc.

OFFICERS

Name, Address and Age	Position(s) Held With Trust	Term of Office and Length of Time Served	Principal Occupation(s) During Past 5 Years
Richard A. Fabietti 452 Fifth Avenue New York, NY 10018 Age: 61	President	One year; 2004 to present	Senior Vice President, HSBC Global Asset Management (USA) Inc. (1998 – present)
James D. Levy 452 Fifth Avenue New York, NY 10018 Age: 56	Vice President	One year; 2014 to present	Vice President, Product Management, HSBC Global Asset Management (USA) Inc. (2014 – present); Vice President, Mutual Funds Product Development, GE Asset Management Inc. (2007 – 2014)

James M. Curtis 452 Fifth Avenue New York, NY 10018 Age: 51	Chief Legal Officer	One year; 2018 to present	Associate General Counsel, HSBC Technology & Services (USA) Inc. (2018-present); Associate General Counsel, HSBC Securities (USA) Inc. (2005 – 2017)

* Ms. Stuntebeck, Mr. Tzouganatos and Mr. Booth are also officers of certain other investment companies of which Citi Fund Services (or an affiliate) is the administrator or sub-administrator.

Trustee Experience, Qualifications, Attributes or Skills

The following provides an overview of the considerations that led the Board to conclude that each individual serving as a Trustee of the Trust should so serve. The current members of the Board joined at different points in time since 2005. Generally, no one factor was decisive in the original selection of an individual to join the Board. Among the factors the Board considered when concluding that an individual should serve on the Board were the following: (i) the individual’s business and professional experience and accomplishments, including prior experience in the financial services and investment management fields or on other boards; (ii) the individual’s ability to work effectively with other members of the Board; and (iii) how the individual’s skills, experiences and attributes would contribute to an appropriate mix of relevant skills and experience on the Board.

In addition to personal qualities, such as integrity, the role of an effective Trustee inherently requires the ability to comprehend, discuss and critically analyze materials and issues presented in exercising judgments and reaching informed conclusions relevant to his or her duties and obligations. The Board believes that the specific background of each Board member (including as set forth above) evidences such ability and is appropriate to his or her serving on the Board. The Chairman of the Board, Mr. Robards, has governance and operating experience in banking, brokerage and specialty finance companies. In addition, Mr. Robards serves and has served as a director of several public companies. Mses. Beck and Huang each have experience managing risk as well as portfolios of money market and fixed income instruments, respectively. Ms. Beck has asset management operating and leadership experience, having served as President and Trustee of the Goldman Sachs Mutual Funds, an unaffiliated mutual fund complex. Ms. Huang has asset management operating and leadership experience, having served as Senior Vice President of Schroder Investment Management, a global asset management company. Ms. Gause has significant experience in the financial services industry, having served as, among other things, Chief Executive Officer of Dresdner RCM Global Investors and Allianz Dresdner Asset Management, a global asset management company. In that position, Ms. Gause was responsible for the day-to-day activities of the investment adviser of various registered open-end funds. Ms. Hazell has significant experience in the financial services industry and is currently the Chief Executive Officer of HSBC Global Asset Management (USA) Inc. Previously, Ms. Hazell was the President and Chief Executive Officer of a global investment management firm that provided active, fixed income capabilities to institutional investors.

COMMITTEES

The Board currently has three standing committees: Audit and Compliance Committee, Valuation and Investment Oversight Committee, and Nominating and Corporate Governance Committee.

Audit and Compliance Committee

The Audit and Compliance Committee is comprised of all of the Independent Trustees of the Trust. The Audit and Compliance Committee is currently chaired by Ms. Beck. Ms. Beck, Mr. Robards and Ms. Gause are audit committee financial experts of the Trust. The primary purpose of the Audit and Compliance Committee is to oversee the accounting and financial reporting policies, practices and internal controls of the Trust. The Audit and Compliance Committee, among other things: (i) recommends to the Board the selection, retention, and termination of an independent public accounting firm; (ii) annually reviews the scope of the proposed audit and generally, the audit procedures to be utilized and the proposed audit fees; (iii) reviews the results of the annual audit with the independent auditors and any reports from the independent auditors concerning an audit, as presented to the Audit and Compliance Committee; (iv) reviews the annual financial statements of the Funds with management and the independent auditors; (v) approves the fees to be paid by the Trust to the independent auditors for its services; and (vi) reviews the adequacy and effectiveness of internal controls and procedures with management and the independent auditors. Committee responsibility for the Trust's compliance program, which includes, among other things, (i) reviewing recommendations made to the Board concerning the designation of a person to serve as the Trust's CCO pursuant to Rule 38a-1 under the 1940 Act; (ii) overseeing compliance by third-party service providers of the Trust's compliance program; (iii) assessing recommendations made by the CCO concerning changes; and (iv) additions to the Trust's compliance program, is also housed within the Audit and Compliance Committee. The Audit and Compliance Committee of the Trust met four times during the most recently completed fiscal year.

Valuation and Investment Oversight Committee

The Valuation and Investment Oversight Committee is comprised of all of the Trustees of the Trust. The Committee is currently chaired by Ms. Huang. The Valuation and Investment Oversight Committee, among other things: (i) oversees Fund management, investment risk management, performance and brokerage practices relating to the Funds; (ii) reviews certain proposals that the Adviser may wish to make concerning the Funds and their investments; (iii) oversees the implementation and operation of the Trust's Valuation Procedures, including the amortized cost method of valuation pursuant to Rule 2a-7 under the 1940 Act with respect to the HSBC Money Market Funds; (iv) oversees the processes relating to the assessment of the liquidity of the Funds' assets; (v) reviews the proxy voting guidelines, policies, and procedures; and (vi) oversees the performance of the investment subadvisers to the applicable series of the Trust. The Valuation and Investment Oversight Committee met four times during the most recently completed fiscal year.

Nominating and Corporate Governance Committee

The Nominating and Corporate Governance Committee is comprised of all of the Independent Trustees of the Trust. The Committee is currently chaired by Ms. Gause. This Committee, among other things: (i) makes nominations for trustee membership on the Board or a Committee; (ii) evaluates on a periodic basis the operations and effectiveness of the Board as a whole; (iii) periodically reviews the composition of the Board to determine whether it may be appropriate to add individuals with different backgrounds or skills from those already on the Board; (iv) periodically reviews industry best practices and Board governance procedures and recommends appropriate changes to the full Board; (v) periodically reviews Trustee compensation and Committee responsibilities and recommends any appropriate changes to the full Board; (vi) reviews the retention of professional liability insurance (D&O/E&O Insurance) and investment company fidelity bonds; and (vii) reviews the independence and performance of the Independent Trustee counsel. The Nominating and Corporate Governance Committee also considers nominees recommended by shareholders. Such recommendations should be forwarded to the President of the Trust. The Nominating and Corporate Governance Committee met four times during the most recently completed fiscal year.

When evaluating a person as a potential nominee to serve as an Independent Trustee, the Nominating and Corporate Governance Committee may consider, among other factors: (i) whether or not the person is "independent" and whether the person is otherwise qualified under applicable laws and regulations to serve as a Trustee; (ii) whether or not the person is willing to serve, and willing and able to commit the time necessary for the performance of the duties of an Independent Trustee; (iii) the contribution that the person can make to the Board, with consideration being given to the person's business experience, education and such other factors as the Committee may consider relevant; (iv) the character and integrity of the person; (v) the desirable personality traits, including independence, leadership and the ability to work with the other members of the Board; and (vi) consistency with the 1940 Act.

The process of identifying nominees involves the consideration of candidates recommended by one or more of the following: current Independent Trustees, officers, and other sources that the Committee deems appropriate.

FUND OWNERSHIP

Listed below for each Trustee is a dollar range of securities beneficially owned in the Funds together with the aggregate dollar range of equity securities in all registered investment companies overseen by each Trustee in the HSBC Family of Funds, as of December 31, 2019 (unless otherwise stated).

Dollar Range of Equity Securities in:	Independent Trustees				Interested Trustee
	Marcia L. Beck	Susan C. Gause	Susan S. Huang	Thomas Robards	Deborah A. Hazell
U.S. Government Money Market Fund	\$50,001-\$100,000	\$10,001-\$50,000	\$10,001-\$50,000	Over \$100,000	None
U.S. Treasury Money Market Fund	None	None	None	None	None
Aggregate Dollar Range of Securities in All Registered Investment Companies Overseen By Trustee in HSBC Family of Funds	\$50,001-\$100,000	\$50,001-\$100,000	\$50,001-\$100,000	Over \$100,000	Over \$100,000

As of February 3, 2020, the Trustees and officers of the Trust as a group beneficially owned less than 1% of the outstanding shares of the Funds.

TRUSTEE AND OFFICER COMPENSATION

For the fiscal year ended October 31, 2019, the following compensation was paid to the Trustees:

Compensation From the Funds	Independent Trustees⁽¹⁾			
	Marcia L. Beck	Susan C. Gause	Susan S. Huang	Thomas F. Robards
U.S. Government Money Market Fund	\$20,587.50	\$20,187.50	\$20,187.50	\$23,037.50
U.S. Treasury Money Market Fund	\$20,587.50	\$20,187.50	\$20,187.50	\$23,037.50
Pension Or Retirement Benefits Accrued As Part Of The Funds' Expenses ⁽²⁾	N/A	N/A	N/A	N/A
Estimated Annual Benefits Upon Retirement	N/A	N/A	N/A	N/A
Total Compensation From Funds And Fund Complex ⁽³⁾ Paid To Trustees	\$204,000.00	\$200,000.00	\$200,000.00	\$228,500.00

⁽¹⁾ Ms. Hazell, an Interested Trustee, is not compensated from the Trust for her service as an Interested Trustee.

⁽²⁾ The Trust does not accrue pension or retirement benefits as part of Fund expenses, and Trustees of the Trust are not entitled to retirement benefits upon retirement from the Board.

⁽³⁾ For these purposes, the Fund Complex consisted of the 8 portfolios of HSBC Funds as of October 31, 2019.

None of the officers receive compensation directly from the Funds. Under a Services Agreement between the Trust and Citi (“Services Agreement”), Citi makes an individual available to serve as the Trust’s CCO. Under the Services Agreement, Citi also provides infrastructure and support in implementing the written policies and procedures comprising the Funds’ Compliance Program. This includes providing support services to the CCO, developing standards for reports to the Board by Citi and other service providers, and assisting in preparing or providing documentation for the Board to make findings and conduct reviews pertaining to the Funds’ Compliance Program and related policies and procedures of Fund service providers. For the services provided under the Services Agreement, the Trust currently pays Citi \$313,915 per annum, plus certain out of pocket expenses. Citi pays the salary and other compensation earned by any such individuals as employees of Citi. The Services Agreement also governs Citi’s provision of regulatory administration and fund accounting services to the Funds. For more information about these services, respectively, see “Administrator and Sub-Administrator” and “Fund Accounting Agent.”

INVESTMENT ADVISER

HSBC Global Asset Management (USA) Inc. is the investment adviser to the Funds pursuant to an investment advisory contract (the “Advisory Contract”) with the Trust. For investment advisory services, the Adviser is entitled to a fee from each Fund, which is accrued daily and paid monthly, and which is based on the Fund’s daily net assets, at an annual rate of 0.10%.

The Adviser has entered into a contractual expense limitation agreement (“Agreement”) with the Funds with respect to the Class E Shares, Class I Shares, Intermediary Shares and Intermediary Service Shares under which it will limit total expenses of a Fund (excluding interest, taxes, brokerage commissions, extraordinary expenses and estimated indirect expenses attributable to a Fund’s investments in investment companies.) The expense limitations shall be in effect until March 1, 2021. The Agreement shall terminate upon the termination of the Advisory Contract between the Trust and the Adviser, or may be terminated upon written notice to the Adviser by the Board.

For the fiscal years ended October 31, 2019, 2018, and 2017, the aggregate amount of advisory fees incurred by each Fund was:

Fund	2019[^]	2018[^]	2017[^]
U.S. Government Money Market Fund	\$13,884,140	\$10,471,003	\$10,854,052
U.S. Treasury Money Market Fund	\$1,821,502	\$1,955,197	\$1,825,974

[^] Expense does not include deductions for waivers.

The Advisory Contract for each Fund will continue in effect through December 31, 2020. Thereafter, the Advisory contract will continue in effect with respect to each Fund for successive periods not to exceed one (1) year provided such continuance is approved at least annually by (i) the holders of a majority of the outstanding voting securities of the Funds or by the Board, and (ii) a majority of the Trustees of the Trust who are not parties to the Advisory Contract or “interested persons” (as defined in Section 2(a)(19) of the 1940 Act) of any such party. Notwithstanding the foregoing, the Advisory Contract may be terminated with respect to a Fund without penalty by either party on 60 days’ written notice and will terminate automatically in the event of its assignment within the meaning of the 1940 Act.

The Adviser, located at 452 Fifth Avenue, New York, New York 10018, is a wholly-owned subsidiary of HSBC Bank, which is a wholly-owned subsidiary of HSBC USA Inc., a registered bank holding company. No securities or instruments issued by HSBC USA Inc. or HSBC Bank USA, N.A. will be purchased for a Fund.

The Advisory Contract for the Funds provides that the Adviser will manage the portfolio of each Fund and will furnish to each of the Funds investment guidance and policy direction in connection therewith. The Adviser has agreed to provide the Trust with, among other things, information relating to composition, credit conditions and average maturity of the portfolio of each Fund. Pursuant to the Advisory Contract, the Adviser also furnishes to the Board periodic reports on the investment performance of each Fund.

The Adviser and the Trust have also entered into an Operational Support Services Agreement, under which the Adviser provides certain support services in connection with the operation of certain Classes of shares of the Funds. For its services, the Adviser is entitled to a fee from each Fund, computed daily and paid monthly, equal on an annual basis to 0.10% of the Fund's average daily net assets, with the exception of assets attributable to Class E and Class I Shares.

For the fiscal years ended October 31, 2019, 2018, and 2017, the aggregate amount of operational support services fees incurred by each Fund was:

Fund	2019[^]	2018[^]	2017[^]
U.S. Government Money Market Fund	\$4,027,521	\$3,665,718	\$4,297,338
U.S. Treasury Money Market Fund	\$1,193,050	\$1,351,515	\$1,189,635

[^] Expense does not include deductions for waivers.

If the Adviser were prohibited from performing any of its services for the Trust under the Advisory Contract or the Operational Support Services Agreement, it is expected that the Board would recommend to the Funds' shareholders that they approve new agreements with another entity or entities qualified to perform such services and selected by the Board.

The investment advisory services of the Adviser provided to the Funds are not exclusive under the terms of the Advisory Contract. The Adviser is free to and does render investment advisory services to others.

The Trust and the Adviser have each received an exemptive order from the SEC that allows the Adviser to enter into new investment sub-advisory contracts and to make material changes to existing sub-advisory contracts with certain unaffiliated subadvisers with the approval of the Board, but without shareholder approval. This authority is subject to certain conditions, including the requirement that the Trustees (including a majority of Independent Trustees) of the Trust must approve any new or amended agreements with subadvisers. In accordance with the exemptive order received from the SEC, an information statement providing details about the appointment of the new subadviser will be mailed to shareholders within 90 days of the change in subadviser. Shareholders will also receive an information statement describing material changes to a sub-advisory contract between the Adviser and a subadviser within 90 days of the material change. The Adviser remains responsible for the performance of each Fund, oversees subadvisers to ensure compliance with each Fund's investment policies and guidelines, and monitors each subadviser's adherence to its investment style and performance results in order to recommend any changes in a subadviser to the Board.

In the future, the Trust and the Adviser may, on behalf of the Government Money Market Fund, receive an additional exemptive order that would allow the Adviser to implement new investment sub-advisory contracts and to make material changes to existing sub-advisory contracts with subadvisers that are affiliated with the Adviser with the approval of the Board, but without shareholder approval. As with the current order, the new order would be subject to certain conditions, including that the Government Money Market Fund would notify shareholders and provide them with certain information upon the hiring of a subadviser.

None of the Funds covered by this SAI currently uses the services of a subadviser.

DISTRIBUTION PLANS-CLASS A, CLASS C, AND CLASS D SHARES ONLY

The Trust has adopted Distribution Plans (the “Distribution Plans”) with respect to the Class A Shares (the “Class A Plan”), the Class C Shares (the “Class C Plan”), and the Class D Shares (the “Class D Plan”) of the Funds. The Distribution Plans provide that they may not be amended to increase materially the costs which the Class A Shares, Class C Shares and Class D Shares may bear pursuant to the Class A Plan, Class C Plan or Class D Plan without approval by shareholders of the Class A Shares, Class C Shares or Class D Shares, respectively, and that any material amendments of the Distribution Plans must be approved by the Board, and by the Independent Trustees of the Trust that have no direct or indirect financial interest in the operation of the Distribution Plans or in any related agreement (“Qualified Trustees”), by vote cast in person at a meeting called for the purpose of considering such amendments. The selection and nomination of the Qualified Trustees has been committed to the discretion of the Independent Trustees. The Distribution Plans have been approved, and are subject to annual approval, by the Board and by the Qualified Trustees, by vote cast in person at a meeting called for the purpose of voting on the Distribution Plans. The Board approved the Distribution Plans to stimulate sales of shares of the Funds in the face of competition from a variety of other investment companies and financial products. In approving the Distribution Plans, the Board considered the potential advantages to shareholders of the Funds of continued growth of the asset bases of the Funds (including greater liquidity, more investment flexibility and possible achievement of greater economies of scale). In adopting the Class A Plan, Class C Plan and Class D Plan, the Trustees considered alternative methods to distribute the Class A Shares, Class C Shares and Class D Shares and to reduce each class’ expense ratio. The Trustees concluded that there was a reasonable likelihood that each Distribution Plan will benefit the respective class and that class’ shareholders. The Distribution Plans are terminable with respect to the Class A Shares, Class C Shares or Class D Shares at any time by a vote of a majority of the Qualified Trustees or by vote of the holders of a majority of that class.

For the fiscal years ended October 31, 2019, 2018, and 2017, the aggregate amount of distribution fees incurred by each Fund was:

Fund	2019[^]	2018[^]	2017[^]
U.S. Government Money Market Fund	\$0	\$0	\$214
U.S. Treasury Money Market Fund	\$0	\$0	\$0

[^] Expense does not include deductions for waivers.

THE DISTRIBUTOR

The Distributor, a wholly-owned subsidiary of Foreside Financial Group, LLC, is a member of FINRA. The Distributor’s address is Three Canal Plaza, Suite 100, Portland, ME 04101. Foreside serves as distributor to the Funds under a Distribution Agreement with the Trust (the “Distribution Agreement”). Unless otherwise terminated, the Distribution Agreement will continue in effect for successive annual periods if, as to each Fund, such continuance is approved at least annually by (i) the vote of a majority of those members of the Board who are not parties to the Distribution Agreement or interested persons (as defined in the 1940 Act) of any such party, cast in person at a meeting for the purpose of voting on such approval and (ii) by the vote of the Board or the vote of a majority of the outstanding voting securities of such Fund. Under the terms of the Distribution Agreement, Foreside acts as the agent of the Trust in connection with the continuous offering of shares of the Funds. The Distributor continually distributes shares of the Funds on a best efforts basis. The Distributor is not affiliated with the Adviser, Citi, or any of their affiliates. The Distributor has no obligation to sell any specific quantity of Fund shares. The

Distributor and its officers have no role in determining the investment policies or which securities are to be purchased or sold by the Trust.

Foreside has entered into a Distribution Services Agreement with the Adviser in connection with Foreside's services as distributor of the Funds pursuant to which the Adviser undertakes to pay Foreside amounts owed to Foreside under the terms of the Distribution Agreement to the extent that the Funds are not otherwise authorized to make such payments. The payments made by the Adviser to the Distributor do not represent an additional expense to a Fund or its shareholders.

Pursuant to the Distribution Plans adopted by the Trust, the Distributor is reimbursed by the Funds monthly for costs and expenses incurred by the Distributor in connection with the distribution of Class A Shares, Class C Shares and Class D Shares of the Funds and for the provision of certain shareholder services with respect to these Shares. Payments to the Distributor are for various types of activities, including: (1) payments to broker-dealers which advise shareholders regarding the purchase, sale or retention of Class A Shares, Class C Shares and Class D Shares of the Funds and which provide shareholders with personal services and account maintenance services ("service fees"), (2) payments to employees of the Distributor, and (3) printing and advertising expenses. Pursuant to the Class A and Class D Plans, the amount of the Distributor's reimbursement from a Fund may not exceed, on an annual basis, 0.25% of the average daily net assets of the Fund represented by Class A Shares and Class D Shares, respectively, outstanding during the period for which payment is being made. Pursuant to the Class C Plan, such payments by the Distributor to broker-dealers may be in amounts on an annual basis of up to 0.75% of a Fund's average daily net assets as presented by Class C Shares outstanding during the period for which payment is being made. The aggregate fees paid to the Distributor pursuant to the Distribution Plans, and to shareholder servicing agents ("Shareholder Servicing Agents") pursuant to the Shareholder Services Plan (as discussed below), will not exceed, on an annual basis, 0.60%, 1.00%, 0.25%, 0.10%, 0.05% and 0.10%, of a Fund's average daily net assets represented by Class A Shares, Class C Shares, Class D Shares, Class E Shares, Intermediary Shares and Intermediary Service Shares, respectively, outstanding during the period for which payment is being made. Salary expenses of Foreside personnel who are responsible for marketing shares of the various series of the Trust may be allocated to such series on the basis of average net assets; travel expenses are allocated to, or divided among, the particular series for which they are incurred. The distribution fees collected from the Funds by Foreside are used to pay commissions for the sale of Fund shares.

The Funds are not liable for distribution and shareholder servicing expenditures made by the Distributor in any given year in excess of the maximum amount payable under the Distribution Plans in that year.

PAYMENTS TO FINANCIAL INTERMEDIARIES

The Adviser and/or its affiliates may, out of their own resources, and without cost to any Fund, provide compensation, which may be significant, to selected financial intermediaries to promote the sale, distribution and/or servicing of shares of the Funds ("Payments"). These arrangements are sometimes referred to as "revenue sharing" arrangements. Since these Payments are made out of the resources of the Adviser and/or its affiliates, they do not represent an additional charge to the Funds or their shareholders. Accordingly, these Payments are not reflected in the fee and expense tables in the Prospectus. In addition, these Payments do not change the price paid by investors for the purchase of a Fund's shares or the amount a Fund receives as proceeds from such purchases. These Payments are in addition to commissions and 12b-1 fees, shareholder servicing fees and sales charges borne by shareholders.

The Adviser and/or its affiliates make these Payments primarily to compensate financial intermediaries for, among other things: marketing shares of the Funds, which may consist of Payments relating to the inclusion of the Funds on preferred or recommended fund lists or in certain sales programs from time to

time sponsored by the financial intermediaries; educational programs; scheduled interactions with the financial intermediaries' registered representatives or salespersons, including at conferences or seminars; provision of training and educational programs; marketing support fees for providing assistance in promoting the sale of Fund shares; and/or other specified and relevant services intended to assist in the sale, distribution, and/or servicing of Fund shares. With respect to certain financial intermediaries and related fund "supermarket" platform arrangements, the Funds and/or the Adviser, rather than the Distributor, typically enter into such agreements. These financial intermediaries may charge a fee for their services. These financial intermediaries may otherwise act as processing agents and are responsible for promptly transmitting purchase, redemption and other requests to the Funds.

In addition, the Adviser and/or its affiliates may, out of their own resources, and without cost to any Fund, make Payments (including through sub-transfer agency and networking arrangements) for sub-accounting, administrative and/or shareholder processing services that are in addition to the transfer agent, shareholder administration, servicing and processing fees paid by the Funds. These Payments may exceed amounts earned on these assets by the Adviser and/or its affiliates for the performance of these or similar services.

Generally, the Adviser and/or its affiliates negotiate the amount of Payments on an individual basis with each financial intermediary. In determining the amount of Payments to be made, the Adviser and/or its affiliates may consider a number of factors, including, without limitation, asset mix and length of relationship with the financial intermediary; the size of the customer/shareholder base of the financial intermediary; the manner in which customers of the financial intermediary make investments in the Funds; the nature and scope of services provided by the financial intermediary; and the costs incurred by the financial intermediary in connection with maintaining the infrastructure necessary or desirable to support investments in the Funds along with any other relevant factor that the Funds deem appropriate. Historically, these Payments have generally been structured as a percentage of average net assets attributable to the financial intermediary, but may also be structured as a fixed dollar amount, or a combination of the two, or may be calculated on another appropriate basis. Typically, the annual Payments to a financial intermediary are not expected to exceed 0.25% of a Fund's average net assets. The Adviser and/or its affiliates expect to periodically determine the advisability of continuing these Payments.

For the year ended December 31, 2019, the Adviser and/or its affiliates made Payments, related to 2019, out of their own assets to approximately 21 financial intermediaries, totaling approximately \$5.2 million (excluding Payments made through sub-transfer agency and networking arrangements and certain other types of Payments described below), with respect to all funds of the Trust (including the Funds in this SAI). During this time, the Adviser has also made similar payments to its affiliates.

Periodically, and where appropriate, the Adviser and/or its affiliates may enter into similar arrangements with other financial intermediaries. Thus, the number of financial intermediaries that receive Payments is subject to change at any time without notice.

From time to time, and subject to applicable regulations, the Adviser and/or its affiliates may also be involved in cash and non-cash compensation arrangements with financial intermediaries to promote the sale of Fund shares in the form of, for example: occasional gifts; occasional meals, tickets or other entertainment; and/or sponsorship support of regional or national events. Subject to applicable FINRA regulations and other legal requirements, the Adviser and/or its affiliates may pay costs and expenses associated with these efforts (e.g., travel, lodging, entertainment and meals). Other compensation may also be offered from time to time to the extent not prohibited by applicable federal or state laws or FINRA regulations. This compensation is not included in, and is made in addition to, the Payments described above.

The Adviser and/or its affiliates may be incentivized to make Payments since they promote the sale and retention of Fund shares to clients of the financial intermediaries. When financial intermediaries sell or retain more shares of the Funds, the Adviser and/or its affiliates benefit from the incremental management and other fees paid by the Funds with respect to those assets.

The compensation or reimbursement received by financial intermediaries through commissions, sales charges, fees payable from the Funds, and/or revenue sharing arrangements may be more or less than the overall compensation or reimbursement on similar or other products and may influence your financial intermediary to introduce and recommend the Funds over other similar investment options. In addition, depending on the arrangements in place at any particular time, this compensation or reimbursement creates a conflict of interest for financial intermediaries as they may have a financial incentive for recommending a Fund (or a particular share class of a Fund) over another investment.

Although a Fund may use financial intermediaries that sell Fund shares to effect transactions for the Fund's portfolio, the Fund and the Adviser will not consider the sale of Fund shares as a factor when choosing financial intermediaries to effect those transactions.

Shareholders may obtain more information about these arrangements, including the conflicts of interests that such arrangements create, from their financial intermediaries and should so inquire if they would like additional information. Shareholders are encouraged to ask their financial intermediary how their respective financial intermediary will be compensated for investments made in the Funds.

Investors who purchase shares through financial intermediaries will be subject to the procedures of those intermediaries through which they purchase shares, which may include charges, investment minimums, cutoff times and other restrictions in addition to, or different from, those listed herein. Information concerning any charges or services will be provided to customers by the financial intermediary through which they purchase shares. Investors purchasing shares of the Funds through financial intermediaries should acquaint themselves with their financial intermediary's procedures and should read the Prospectus in conjunction with any materials and information provided by their financial intermediary. The financial intermediary, and not its customers, will be the shareholder of record, although costumers may have the right to vote shares depending upon their arrangement with the financial intermediary. The Distributor does not receive compensation from the Funds for its distribution services except the distribution/service fees with respect to the shares of those classes for which a Rule 12b-1 Plan is effective. However, the Adviser pays the Distributor a fee for certain distribution-related services.

ADMINISTRATOR AND SUB-ADMINISTRATOR

Pursuant to an Administration Services Agreement, the Adviser serves as the Trust's administrator (the "Administrator"), and in that role oversees and coordinates the activities of other service providers, and monitors certain aspects of the Trust's operations. Pursuant to a Sub-Administration Services Agreement (the "Sub-Administration Agreement"), the Administrator has retained Citi, whose address is 4400 Easton Commons, Suite 200, Columbus, Ohio 43219, as sub-administrator (the "Sub-Administrator"). Citi served as the administrator (rather than sub-administrator) through June 30, 2006. Management and administrative services of the Administrator and Sub-Administrator include providing office space, equipment and clerical personnel to the Funds and supervising custodial, auditing, valuation, bookkeeping, regulatory and dividend disbursing services.

Pursuant to the Services Agreement, Citi also provides the Funds with various other services, which include certain regulatory and compliance services, as well as fund accounting services. The Administrator and Citi provide certain persons satisfactory to the Board to serve as officers of the Trust.

Such officers, as well as certain other employees of the Trust, may be directors, officers or employees of the Administrator, Citi or their affiliates. Citi may waive a portion of its fee.

The Administration Services Agreement was renewed for the one (1) year period ending December 31, 2020, and may be terminated upon not more than 60 days' written notice by either party.

The administration fee primarily consists of an asset-based fee accrued daily and paid monthly at an annual rate of:

\$0-\$10 billion.....	0.0400%
\$10 billion - \$20 billion.....	0.0350%
\$20 billion - \$50 billion.....	0.0265%
In excess of \$50 billion.....	0.0245%

The sub-administration fee primarily consists of an asset-based fee payable to Citi by the Administrator on the first business day of each month, or at such times as Citi shall request, at an annual rate of:

Up to \$10 billion.....	0.0200%
\$10 billion - \$20 billion.....	0.0150%
\$20 billion - \$50 billion.....	0.0065%
In excess of \$50 billion.....	0.0045%

The fee rate and breakpoints are determined on the basis of the aggregate average daily net assets of the HSBC Family of Funds. The total administration fee to be paid to the Administrator and Citi is allocated to each of the funds in the HSBC Family of Funds based upon its proportionate share of the aggregate net assets of the HSBC Family of Funds, and then allocated to each class of shares on a class basis.

For the fiscal years ended October 31, 2019, 2018, and 2017, the aggregate amount of administration fees incurred by each Fund was:

Fund	2019[^]	2018[^]	2017[^]
U.S. Government Money Market Fund	\$5,316,605	\$4,068,605	\$4,222,538
U.S. Treasury Money Market Fund	\$698,551	\$759,465	\$710,029

[^] Expense does not include deductions for waivers.

TRANSFER AGENT

Under a Transfer Agency Services Agreement, DST Asset Manager Solutions, Inc. acts as transfer agent (“Transfer Agent”) for the Trust. The Transfer Agent maintains an account for each shareholder of record, performs other transfer agency functions and acts as dividend disbursing agent for the Trust. The principal business address of DST Asset Manager Solutions, Inc. is 2000 Crown Colony Drive, Quincy, Massachusetts 02169-0953.

CUSTODIAN

Pursuant to a Custodian Agreement, Northern Trust Company, 50 South LaSalle Street, Chicago, Illinois 60603, acts as the custodian of each Fund’s assets (the “Custodian”). The Custodian’s responsibilities include safeguarding and controlling each Fund’s cash and securities, handling the receipt and delivery of securities, determining income and collecting interest on each Fund’s investments, maintaining books of original entry for portfolio and fund accounting and other required books and accounts in order to calculate the daily NAV of Shares of each Fund. Securities held for each Fund may be deposited into the Federal Reserve-Treasury Department Book Entry System or the Depository Trust Company. The

Custodian does not determine the investment policies of the Funds or decide which securities will be purchased or sold for a Fund. For its services, the Custodian receives such compensation as may from time to time be agreed upon by it and the Trust.

FUND ACCOUNTING AGENT

Pursuant to the Services Agreement, Citi also serves as fund accounting agent to each Fund. For the fiscal years ended October 31, 2019, October 31, 2018 and October 31, 2017, the aggregate amount of fund accounting fees incurred by each Fund was:

Fund	2019	2018	2017
U.S. Government Money Market Fund	\$67,107	\$68,444	\$85,721
U.S. Treasury Money Market Fund	\$57,887	\$56,921	\$74,384

SHAREHOLDER SERVICES PLAN AND SHAREHOLDER SERVICING AGENTS

The Trust has adopted a Shareholder Services Plan with respect to the Class A Shares, Class C Shares, Class D Shares, Class E Shares, Intermediary Shares and Intermediary Service Shares which provides that the Trust may obtain the services of certain financial institutions and securities brokers, as Shareholder Servicing Agents that shall, as agents for their customers who purchase the Funds' Class A Shares, Class C Shares, Class D, Class E Shares, Intermediary Shares and Intermediary Service Shares, perform certain shareholder account, administrative and service functions for such customers, and may enter into agreements providing for the payment of fees for such services. The Shareholder Services Plan continues in effect indefinitely if such continuance is specifically approved at least annually by a vote of both a majority of the Trustees and a majority of the Trustees who are not "interested persons" of the Trust and who have no direct or indirect financial interest in the operation of the Shareholder Services Plan or in any agreement related to such Plan ("Qualified Trustees"). The Shareholder Services Plan may be terminated at any time by a vote of a majority of the Qualified Trustees or with respect to a particular Class of Shares by a majority vote of the outstanding voting securities of that class. The Shareholder Services Plan may not be amended to increase materially the amount of permitted expenses thereunder with respect to the Class A Shares, Class C Shares, Class D Shares, Class E Shares, Intermediary Shares or Intermediary Service Shares without the approval of a majority of shareholders of the particular class, and may not be materially amended in any case without a vote of the majority of both the Trustees and the Qualified Trustees.

The Trust has entered into a shareholder servicing agreement (a "Shareholder Servicing Agreement") with certain Shareholder Servicing Agents, including HSBC, pursuant to which the Shareholder Servicing Agent, as agent for its customers, among other things: answers customer inquiries regarding account status and history, the manner in which purchases, exchanges and redemptions of Class A Shares, Class C Shares, Class D Shares, Class E Shares, Intermediary Shares and Intermediary Service Shares of the Funds may be effected and certain other matters pertaining to the Funds; assists shareholders in designating and changing dividend options, account designations and addresses; provides necessary personnel and facilities to establish and maintain shareholder accounts and records; assists in processing purchase and redemption transactions; arranges for the wiring of funds; transmits and receives funds in connection with customer orders to purchase or redeem Shares; verifies and guarantees shareholder signatures in connection with redemption orders and transfers and changes in shareholder-designated accounts; furnishes (either separately or on an integrated basis with other reports sent to a shareholder by a Shareholder Servicing Agent) monthly and year-end statements and confirmations of purchases and redemptions; transmits, on behalf of the Trust, proxy statements, annual reports, updated prospectuses and other communications from the Trust to the Funds' shareholders; receives, tabulates and transmits to the Trust proxies executed by shareholders with respect to meetings of shareholders of the Funds or the Trust;

and provides such other related services as the Trust or a shareholder may request. With respect to Class A Shares, Class C Shares, Class D Shares, Class E Shares, Intermediary Shares and Intermediary Service Shares, each Shareholder Servicing Agent receives a fee from the Funds for these services, which may be paid periodically, determined by a formula based upon the number of accounts serviced by such Shareholder Servicing Agent during the period for which payment is being made, the level of activity in accounts serviced by such Shareholder Servicing Agent during such period, and the expenses incurred by such Shareholder Servicing Agent.

The Trust understands that some Shareholder Servicing Agents also may impose certain conditions on their customers, subject to the terms of the Prospectus, in addition to or different from those imposed by the Trust, such as requiring a different minimum initial or subsequent investment, account fees (a fixed amount per transaction processed), compensating balance requirements (a minimum dollar amount a customer must maintain in order to obtain the services offered), or account maintenance fees (a periodic charge based on a percentage of the assets in the account or of the dividends paid on those assets). Each Servicing Agent has agreed to transmit to its customers who are holders of Shares appropriate prior written disclosure of any fees that it may charge them directly and to provide written notice at least 30 days prior to the imposition of any transaction fees. Conversely, the Trust understands that certain Shareholder Servicing Agents may credit to the accounts of their customers from whom they are already receiving other fees amounts not exceeding such other fees or the fees received by the Shareholder Servicing Agent from the Fund with respect to those accounts.

For the fiscal year ended October 31, 2019, 2018, and 2017, the Funds incurred the following shareholder servicing expenses:

Fund	2019[^]	2018[^]	2017[^]
U.S. Government Money Market Fund	\$4,550,519	\$4,301,412	\$4,463,528
U.S. Treasury Money Market Fund	\$631,123	\$653,020	\$674,044

[^] Expense does not include deductions for waivers.

FEDERAL BANKING LAW

The Gramm-Leach-Bliley Act of 1999 repealed certain provisions of the Glass-Steagall Act that had previously restricted the ability of banks and their affiliates to engage in certain mutual fund activities. Nevertheless, HSBC Bank’s and the Adviser’s activities remain subject to, and may be limited by, applicable federal banking law and regulations. HSBC Bank and the Adviser believe that they possess the legal authority to perform the services for the Funds contemplated by the Prospectus, this SAI, and the Advisory Contract without violation of applicable statutes and regulations. If future changes in these laws and regulations were to limit the ability of HSBC Bank and the Adviser to perform these services, the Board would review the Trust’s relationship with HSBC Bank and the Adviser and consider taking all actions necessary in the circumstances, which could include recommending to shareholders the selection of another qualified adviser or, if that course of action appeared impractical, that the Funds be liquidated.

Entities that are part of banking organizations, such as the Adviser and its affiliates, are subject to extensive government regulation. Government regulation may change frequently and may have significant effects, including limiting the ability of the Adviser and its affiliates from engaging in certain trading activities, which may adversely impact a Fund. For example, the so-called “Volcker Rule” prohibits the Adviser and its affiliates from engaging in certain trading activities. A Fund may be adversely impacted by this rule if the Adviser or its affiliates own 25% or more of a Fund’s shares outside of any seeding period permitted by the rule. These restrictions may prevent a Fund from maintaining

sufficient seed capital and may cause the Fund to liquidate at the end of the period if the Fund is not able to achieve sufficient scale. Other restrictions, including restrictions on trading and transactions with affiliates, can also apply. Funds that are not managed by entities that are part of banking organizations are not subject to these limitations.

EXPENSES

Except for the expenses paid by the Adviser and the Distributor, the Funds bear all costs of their operations. Expenses attributable to a class ("Class Expenses") shall be allocated to that class only. Class Expenses with respect to the Class A Shares, Class C Shares, Class D Shares, Class E Shares, Intermediary Shares and Intermediary Service Shares must include payments made pursuant to their respective Distribution Plan or Shareholder Services Plan. In the event a particular expense is not reasonably allocable by class or to a particular class, it shall be treated as a Fund expense or a Trust expense. Trust expenses directly related to a Fund are charged to the Fund; other expenses are allocated among the applicable series of the Trust in relation to the net assets of each Fund equally or another appropriate basis.

PROXY VOTING

The Trust has adopted Proxy Voting Policies that delegate the responsibility of voting proxies to the Adviser. In an effort to avoid conflicts of interest, the Adviser has, in turn, engaged Institutional Shareholder Services Inc. ("ISS") to provide proxy voting and related services and has delegated responsibility for voting proxies on behalf of the Funds to ISS. A summary of ISS' proxy voting guidelines is attached as an appendix to this SAI.

Information regarding how the Funds voted proxies relating to portfolio securities during the 12-month period ending June 30, 2019 is available (i) without charge, upon request, by calling 1-800-782-8183; and (ii) on the SEC's website at <http://www.sec.gov>.

DETERMINATION OF NET ASSET VALUE

The net asset value per share (NAV) of each of the Funds is determined every hour starting at 10:00 a.m. Eastern time on each day on which U.S. bond markets are open for trading (a "Money Market Business Day"). The final NAV is determined at 5:00 p.m. Eastern time for the Government Money Market Fund and at 2:00 p.m. Eastern time for the U.S. Treasury Money Market Fund. The Funds reserve the right to amend the times at which they determine NAV, or to determine NAV more or less frequently. An order for shares of any Fund received in good order on a Money Market Business Day prior to the last determination of the NAV for that Fund will receive the dividend declared for the Fund on that Money Market Business Day. An order for shares of a Fund received in good order on a Money Market Business Day after the last NAV determination for that Fund will be effected at the first NAV determined on the next Money Market Business Day, and will start earning dividends on that Money Market Business Day.

In the event the Board deems it necessary to establish NAVs for one or more Funds by utilizing available market quotations instead of the amortized cost method, the Board may discontinue the hourly calculation of NAVs for one or more Funds, in favor of a once-daily NAV calculation. In such circumstances, the NAV for the Funds would be determined daily at 5:00 p.m. Eastern Time for the Government Money Market Fund and at 2:00 p.m. Eastern Time for the U.S. Treasury Money Market Fund, until such time as the Board determines to reinstate the hourly NAV calculations. It is anticipated that the NAV of each class of shares will remain constant at \$1.00, although no assurance can be given that the net asset value will remain constant on a continuing basis.

The Trust uses the amortized cost method to determine the value of each Fund's portfolio securities pursuant to Rule 2a-7 under the 1940 Act. The amortized cost method involves valuing an obligation at its cost and amortizing any discount or premium over the period until maturity, regardless of the impact of fluctuating interest rates on the market value of the security. During these periods, the yield to a shareholder may differ somewhat from that which could be obtained from a similar fund which utilizes a method of valuation based upon market prices. Thus, during periods of declining interest rates, if the use of the amortized cost method resulted in a lower value of a Fund's portfolio on a particular day, a prospective investor in the Fund would be able to obtain a somewhat higher yield than would result from an investment in a fund utilizing solely market values, and existing Fund shareholders would receive correspondingly less income. The converse would apply during periods of rising interest rates.

Rule 2a-7 provides that, in order to value its portfolio using the amortized cost method, a Fund must maintain a dollar-weighted average portfolio maturity of 60 days or less and a dollar-weighted average portfolio life of 120 days or less (as calculated in accordance with Rule 2a-7) and only purchase securities having remaining maturities of (or deemed maturities of) 397 days or less, which are determined by the Trust's Board to be of high quality with minimal credit risks. Pursuant to Rule 2a-7, the Board has established procedures designed to stabilize, to the extent reasonably possible, the price per share of the Fund, as computed for the purpose of sales and redemptions, at \$1.00. Such procedures include review of a Fund's portfolio holdings by the Board to determine whether the NAV of the Fund calculated by using available market quotations deviates from the \$1.00 per share valuation based on amortized cost. The extent of any deviation is examined by the Board. If such deviation exceeds \$0.050, the Board will promptly consider what action, if any, will be initiated. In the event the Board determines that a deviation exists which may result in material dilution or other unfair results to investors or existing shareholders, the Board will take such corrective action as it regards as necessary and appropriate, which may include suspending redemptions in order to liquidate a Fund in an orderly manner, selling portfolio instruments prior to maturity to realize capital gains or losses or to shorten average portfolio maturity, withholding part or all of dividends or establishing a NAV per share by using available market quotations.

Subject to the Trust's compliance with applicable regulations, the Trust on behalf of each Fund has reserved the right to pay the redemption or repurchase price of shares, either totally or partially, by a distribution in kind of portfolio securities (instead of cash), as applicable. The securities so distributed would be valued at the same amount as that assigned to them in calculating the NAV for the shares being sold. If a shareholder received a distribution in kind, the shareholder could incur brokerage or other charges in converting the securities to cash.

PURCHASE OF SHARES

Shares may be purchased through the Funds, Shareholder Servicing Agents or Securities Brokers (as defined below). Class A Shares and Class Y Shares of the Funds are continuously offered for sale at NAV (normally \$1.00 per share) with no front-end sales charge to the public, and to customers of securities brokers that have entered into a dealer agreement with the Distributor ("Securities Brokers") or a financial institution, including a federal or state-chartered bank, trust company or savings and loan association, that has entered into a Shareholder Servicing Agreement with the Trust or the Distributor (together with Securities Brokers, "Servicing Agents"). Class Y Shares are subject to certain minimum investment requirements, as are Class E, Intermediary Shares, Intermediary Service Shares and Class I Shares. Class E shares are offered primarily for investments through portal providers, intermediaries (anyone facilitating the purchase of the Funds by their clients), and institutional direct clients, if they meet the minimum investment. Class I Shares are offered primarily for direct investment by institutional investors. In addition, investment companies and products advised by the Adviser or its affiliates, employees of the Adviser, and members of the Board are eligible to invest in Class I Shares. Class D shares are similar to Class A shares, except that Class D shares are offered to clients of the Adviser and its

affiliates and are subject to lower operating expenses. Intermediary Shares and Intermediary Service Shares are offered primarily through intermediaries and bank sweep programs.

Class C Shares of the Funds are not offered for sale but are only offered as an exchange option for Class C shareholders of the Trust's other investment portfolios who wish to exchange some or all of those Class C shares for Class C Shares of the Funds. Although Class C Shares of the Funds are not subject to a sales charge when a shareholder exchanges Class C shares of another Trust portfolio for Class C Shares of the Fund, they may be subject to a contingent deferred sales charge when they are redeemed. See "Contingent Deferred Sales Charge ("CDSC") -- Class C Shares" below. Class C Shares are also available to customers or HSBC sweep programs.

An order to purchase shares of the Funds that is received in good order prior to the close of business on a Money Market Business Day is effected on that day at the next determined NAV per share. Shares purchased earn dividends from and including the day the purchase is effected. The Trust intends the Funds to be as fully invested at all times as is reasonably practicable in order to enhance the yield on its assets. Each Shareholder Servicing Agent or Securities Broker is responsible for and required to promptly forward orders for Shares to the Fund's transfer agent.

While there is no sales load on purchases of shares, the Distributor may receive fees from the Funds. See "Management of the Trust" and "The Distributor" above. Other funds which have investment objectives similar to those of the Funds but which do not pay some or all of such fees from their assets may offer a higher yield.

All purchase payments are invested in full and fractional Shares. The Trust reserves the right to cease offering shares for sale at any time or to reject any order for the purchase of Shares.

EXCHANGE PRIVILEGE

By contacting the Transfer Agent or his Shareholder Servicing Agent or his Securities Broker, a shareholder of the Funds may exchange some or all of his Shares for shares of a corresponding class of another fund within the HSBC Family of Funds. By contacting the Transfer Agent or his Shareholder Servicing Agent or his Securities Broker, a shareholder of a Fund may exchange some or all of his Shares at NAV without a sales charge for Shares of the same class offered with the same or lower sales charge by another fund within the HSBC Family of Funds. Exchanges for Shares with a higher sales charge may be made upon payment of the sales charge differential.

An investor will receive Class A Shares of the Money Market Funds in exchange for Class A Shares of another fund within the HSBC Family of Funds, unless the investor is eligible to receive Class D Shares of the Money Market Funds, in which case the investor may receive Class D Shares of a Money Market Fund in exchange for such Class A Shares. Class D Shares may be exchanged for Class D Shares of other Money Market Funds. Class C Shares may be exchanged for shares of the same class of one or more of the Money Market Funds or other funds within the HSBC Family of Funds at NAV. Class E Shares, Intermediary Shares, Intermediary Service Shares, Class I Shares and Class Y Shares may be exchanged for a corresponding class of the Money Market Funds or exchanged for Class I Shares of non-money market funds within the HSBC Family of Funds at NAV without a front-end sales charge provided that the amount to be exchanged meets the applicable minimum investment requirements. In each case, the exchange is conditioned upon being made in states where it is legally authorized. Exchanges of Class A Shares for Class A Shares of one or more funds within the HSBC Family of Funds may be made upon payment of the applicable sales charge, unless previously paid or otherwise exempt. Shareholders of Class A Shares and Class D Shares of the Funds who were shareholders as of December 31, 1997 will be grandfathered with respect to the funds within the HSBC Family of Funds and will be exempt from

having to pay a sales charge on any new purchases of Class A Shares or Class D Shares of the Funds. An exchange of Class C Shares will not affect the holding period of the Class C Shares for purposes of determining the CDSC, if any, upon redemption. An exchange may result in a change in the number of Shares held, but not in the value of such Shares immediately after the exchange. Each exchange involves the redemption of the Shares to be exchanged and the purchase of the shares of the other funds within the HSBC Family of Funds, which may produce a gain or loss for tax purposes.

The exchange privilege (or any aspect of it) may be changed or discontinued upon 60 days written notice to shareholders and is available only to shareholders in states in which such exchanges may be legally made. A shareholder considering an exchange should obtain and read the prospectus of the other funds within the HSBC Family of Funds into which the exchange will be made and consider the differences in investment objectives and policies before making any exchange.

An exchange is considered a sale of shares and may result in a capital gain or loss for federal income tax purposes. A shareholder wishing to exchange his or her Shares may do so by contacting the Trust at 800-782-8183, by contacting his or her broker-dealer or by providing written instruction to the Trust.

IN-KIND PURCHASES

The Trust, in its discretion, may permit purchases of Fund shares by means of in-kind contributions of portfolio securities under certain circumstances. An in-kind contribution must be made in the form of securities that are permissible investments for the Funds as described in the Prospectus. In connection with an in-kind securities purchase, the Funds will require, among other things, that the securities be valued in the same manner as they would be valued for purposes of computing a Fund's NAV; that the Funds receive satisfactory assurances that they will have good and marketable title to the securities received by them; and that the securities be in proper form for transfer to the Funds. In addition, the Funds generally will not accept securities of any issuer unless they are liquid, have a readily ascertainable market value, and are not subject to restrictions on resale.

The Funds will not be liable for any brokerage commission or fee (except for customary transfer fees) in connection with an in-kind purchase of Fund shares. Your broker may impose a fee in connection with processing your in-kind purchase of Fund shares. An investor contemplating an in-kind purchase of Fund shares should consult his or her tax adviser to determine the tax consequences under Federal and state law of making such a purchase.

AUTOMATIC INVESTMENT PLAN

The Trust offers a plan for regularly investing specified dollar amounts (\$25.00 minimum in monthly, quarterly, semi-annual or annual intervals) in the Funds. If an Automatic Investment Plan is selected, subsequent investments will be automatic and will continue until such time as the Trust and the investor's bank are notified to discontinue further investments. Due to the varying procedures to prepare, process and to forward bank withdrawal information to the Trust, there may be a delay between the time of the bank withdrawal and the time the money reaches the Funds. The investment in the Funds will be made at the NAV per share determined on the day that both the check and the bank withdrawal data are received in required form by the Fund's transfer agent. Further information about the Automatic Investment Plan may be obtained from Citi at the telephone number listed under "Shareholder Inquiries."

For further information on how to purchase Shares, an investor should contact the Funds directly at HSBC Funds, PO Box 219691, Kansas City, MO 64121-9691 or by calling 1-800-782-8183.

PURCHASES THROUGH A SHAREHOLDER SERVICING AGENT OR A SECURITIES BROKER

Shareholder Servicing Agents and Securities Brokers, if applicable, may offer services to their customers, including specialized procedures for the purchase and redemption of Shares, such as pre-authorized or automatic purchase and redemption programs and “sweep” checking programs. Each Shareholder Servicing Agent and Securities Broker may establish its own terms, conditions and charges, including limitations on the amounts of transactions, with respect to such services. Charges for these services may include fixed annual fees, account maintenance fees and minimum account balance requirements. The effect of any such fees will be to reduce the net return on the investment of customers of that Shareholder Servicing Agent or Securities Broker. Conversely, certain Servicing Agents may (although they are not required by the Trust to do so) credit to the accounts of their customers from whom they are already receiving other fees amounts not exceeding such other fees or the fees received by the Servicing Agent from the Funds, which will have the effect of increasing the net return on the investment of such customers of those Servicing Agents.

Shareholder Servicing Agents and Securities Brokers may transmit purchase payments on behalf of their customers by wire directly to the Funds’ custodian bank by following the procedures described above.

For further information on how to direct a Securities Broker, if applicable, or a Shareholder Servicing Agent to purchase Shares, an investor should contact his Securities Broker or his Shareholder Servicing Agent.

CONVERSION FEATURE -- CLASS C SHARES

Class C Shares of the Fund will convert automatically to Class A Shares of the same Fund (or Class D Shares, depending on your eligibility), after five years from the beginning of the calendar month in which the Class C Shares were originally purchased. After conversion, the shares will be subject to the lower distribution and shareholder servicing fees charged on Class A Shares (or Class D Shares) which will increase the shareholder’s investment return compared to the Class C Shares. A shareholder will not pay any sales charge or fees when his or her shares convert, nor will the transaction be subject to any tax. If an investor purchased Class C Shares of one fund which he or she exchanged for Class C Shares of another fund, the holding period will be calculated from the time of the original purchase of Class C Shares. The dollar value of Class A Shares (or Class D Shares) the investor receives will equal the dollar value of the Class C Shares converted.

LEVEL LOAD ALTERNATIVE -- CLASS C SHARES

Class C Shares of the Funds are available only by exchanging the Class C Shares of other HSBC Funds. If an investor exchanges Class C Shares of other HSBC Funds for Class C Shares of the Funds and wishes to sell his or her shares, the redemption may be subject to a 1.00% CDSC if the shares are redeemed less than one year after the original purchase of the Class C Shares. The CDSC will be assessed on the lesser of the current NAV or the NAV at the time of purchase.

REDEMPTION OF SHARES

A shareholder may redeem all or any portion of the Shares in his account at any time at the NAV per share (normally \$1.00 per share for the Funds) next calculated after a redemption request is received in good order by the Transfer Agent, with respect to Shares purchased directly through the Funds, or by his Securities Broker or his Shareholder Servicing Agent, if the Securities Broker or Shareholder Servicing Agent is authorized to receive orders for Fund shares on behalf of the Funds. Class A Shares, Class D Shares, Class E Shares, Class I Shares, Intermediary Shares, Intermediary Service Shares and Class Y

Shares may be redeemed without charge while Class C Shares may be subject to a CDSC. See “Level Load Alternative -- Class C Shares” above. See “Determination of Net Asset Value” above.

Except as otherwise set forth in the Prospectus, the proceeds of a redemption are normally paid from the Funds in U.S. dollars within one business day following the date on which the redemption is effected. The Funds may suspend the right of redemption and postpone for more than one day the date of payment upon redemption: (i) during periods in which there is a non-routine closure of the Fedwire or applicable Federal Reserve Banks, (ii) during periods when the New York Stock Exchange is closed other than for weekends and certain holidays or when trading on such Exchange is restricted, (iii) during periods in which, as a result of emergency, disposal, or evaluation of the NAV of the portfolio securities is not reasonably practicable, (iv) during periods in which the SEC has, by rule or regulation, deemed that trading shall be restricted or an emergency exists, (v) in certain circumstances when there has been a determination to liquidate a Fund, or (vi) for such other periods as the SEC may permit for your protection. To be in a position to eliminate excessive expenses, the Trust reserves the right to redeem upon not less than 30 days notice all Shares in an account which has a value below \$50.00, provided that such involuntary redemptions will not result from fluctuations in the value of Fund Shares. A shareholder will be allowed to make additional investments prior to the date fixed for redemption to avoid liquidation of the account.

Unless Shares have been purchased directly from the Funds, a shareholder may redeem Shares only by authorizing his Securities Broker, if applicable, or his Shareholder Servicing Agent to redeem such Shares on his behalf (since the account and records of such a shareholder are established and maintained by his Securities Broker or his Shareholder Servicing Agent). For further information as to how to direct a Securities Broker or a Shareholder Servicing Agent to redeem Shares, a shareholder should contact his Securities Broker or his Shareholder Servicing Agent.

The Board has adopted procedures that provide that redemptions by shareholders may be satisfied by the distribution of portfolio securities in-kind, reflecting the shareholder’s proportionate interest in the relevant Fund, subject to certain adjustments.

Redemption proceeds are generally paid in cash, but the Funds reserve the right to pay all or part of any redemption proceeds in-kind. However, the Funds have made an election pursuant to Rule 18f-1 under the 1940 Act to redeem shares of each Fund solely in cash up to the lesser of \$250,000 or 1.00% of the NAV of the Fund during any 90-day period for any one shareholder. The Funds reserve the right to pay all or part of other redemptions by a distribution of portfolio securities in kind from the applicable Fund’s portfolio. The securities distributed in kind would be valued at the same value as that assigned to them in calculating the NAV of the shares being redeemed. In the event a shareholder receives an in-kind distribution of portfolio securities, it would be the responsibility of the shareholder to dispose of the securities. The shareholder would be subject to the risks that the value of the securities would decline prior to their sale, that it would be difficult to sell the securities, and that brokerage fees could be incurred.

SYSTEMATIC WITHDRAWAL PLAN

Any shareholder who owns Shares with an aggregate value of \$10,000 or more may establish a Systematic Withdrawal Plan under which he redeems at NAV the number of full and fractional shares which will produce the monthly, quarterly, semi-annual or annual payments specified (minimum \$50.00 per payment). Depending on the amounts withdrawn, systematic withdrawals may deplete the investor’s principal. Investors contemplating participation in the Systematic Withdrawal Plan should consult their tax advisors. No additional charge to the shareholder is made for this service.

REDEMPTION OF SHARES PURCHASED DIRECTLY THROUGH THE FUNDS

Redemption by Letter. Redemptions may be made by letter to the Transfer Agent specifying the dollar amount or number of shares to be redeemed, account number and the Fund. The letter must be signed in exactly the same way the account is registered (if there is more than one owner of the Shares, all must sign). In connection with a written redemption request, all signatures of all registered owners or authorized parties must be guaranteed by an Eligible Guarantor Institution, which includes a domestic bank, broker, dealer, credit union, national securities exchange, registered securities association, clearing agency or savings association. The Transfer Agent, however, may reject redemption instructions if the guarantor is neither a member nor a participant in a signature guarantee program (currently known as “STAMP,” “SEMP,” or “NYSE MSP”). Corporations, partnerships, trusts or other legal entities may be required to submit additional documentation.

Redemption by Wire or Telephone. An investor may redeem shares of the Funds by wire or by telephone if he has checked the appropriate box on the Purchase Application or has filed a Telephone Authorization Form with the Trust. These redemptions may be paid from the Funds by wire or by check. The Trust reserves the right to refuse telephone wire redemptions and may limit the amount involved or the number of telephone redemptions. The telephone redemption procedure may be modified or discontinued at any time by the Trust. Instructions for wire redemptions are set forth in the Purchase Application. The Trust employs reasonable procedures to confirm that instructions communicated by telephone are genuine. For instance, the following information must be verified by the shareholder or Securities Broker at the time a request for a telephone redemption is effected: (1) shareholder’s account number; (2) shareholder’s social security number; and (3) name and account number of shareholder’s designated Securities Broker or bank. If the Trust fails to follow these or other established procedures, it may be liable for any losses due to unauthorized or fraudulent instructions.

CHECK REDEMPTION SERVICE

Shareholders may redeem Class A Shares or Class D Shares of the Funds by means of a Check Redemption Service. If Class A Shares or Class D Shares are held in book credit form and the Check Redemption Service has been elected on the Purchase Application on file with the Trust, redemptions of shares may be made by using redemption checks provided by the Trust. There is no charge for this service. Checks must be written for amounts of \$250 or more, may be payable to anyone and negotiated in the normal way. If more than one shareholder owns the Class A Shares or Class D Shares, all must sign the check unless an election has been made to require only one signature on checks and that election has been filed with the Trust.

Class A Shares and Class D Shares represented by a redemption check continue to earn daily dividends until the check clears the banking system. When honoring a redemption check, the Trust causes the redemption of exactly enough full and fractional Class A Shares and Class D Shares of the Funds from an account to cover the amount of the check. The Check Redemption Services may be terminated at any time by the Trust.

If the Check Redemption Service is requested for an account in the name of a corporation or other institution, additional documents must be submitted with the application, i.e., corporations (Certification of Corporate Resolution), partnerships (Certification of Partnership) and trusts (Certification of Trustees). In addition, since the share balance of the Fund account is changing on a daily basis, the total value of the Fund account cannot be determined in advance and the Fund account cannot be closed or entirely redeemed by check.

RETIREMENT PLANS

Class D Shares of the Funds are offered in connection with tax-deferred retirement plans. Application forms and further information about these plans, including applicable fees, are available from the Trust or the Distributor upon request. The tax law governing tax-deferred retirement plans is complex and changes frequently. Before investing in the Funds through one or more of these plans, an investor should consult his or her tax advisor.

INDIVIDUAL RETIREMENT ACCOUNTS (“IRAs”)

The shares may be used as a funding medium for an IRA. An Internal Revenue Service-approved IRA plan may be available from an investor’s Shareholder Servicing Agent. The minimum initial investment for an IRA is \$250; the minimum subsequent investment is \$100. In general, IRAs are available to individuals who receive compensation or earned income and their spouses whether or not they are active participants in a tax-qualified or Government-approved retirement plan. In general, an IRA contribution by an individual who participates, or whose spouse participates, in a tax-qualified or Government-approved retirement plan may not be deductible, in whole or in part, depending upon the individual’s income. Individuals also may establish an IRA to receive a “rollover” contribution of distributions from another IRA or a qualified plan. Tax advice should be obtained before planning a rollover or determining contribution limits.

DEFINED CONTRIBUTION PLANS

Investors who are self-employed may purchase shares of the Funds for retirement plans for self-employed persons who are known as defined contribution plans (formerly Keogh or H.R. 10 Plans). HSBC offers a prototype plan for money purchase and profit sharing defined contribution plans. The rules governing these plans are complex, and a tax advisor should be consulted.

SECTION 457 PLAN, 401(k) PLAN, 403(b) PLAN

The Funds may be used as an investment vehicle for certain deferred compensation plans provided for by Section 457 of the Code with respect to service for state governments, local governments, rural electric cooperatives and political subdivisions, agencies, instrumentalities, tax-exempt organizations and certain affiliates of such entities. The Funds may also be used as an investment vehicle for both 401(k) plans and 403(b) plans.

DIVIDENDS AND DISTRIBUTIONS

The Trust declares all of each Fund’s net investment income daily as a dividend to Fund shareholders. Dividends substantially equal to each Fund’s net investment income earned during the month are distributed in that month to the Fund’s shareholders of record. Generally, a Fund’s net investment income consists of the interest and dividend income it earns, less expenses. In computing interest income, premiums are not amortized nor are discounts accrued on long-term debt securities in the Funds, except as required for federal income tax purposes.

Shares begin accruing dividends on the day they are purchased. Dividends are distributed monthly. Unless a shareholder elects to receive dividends in cash (subject to the policies of the shareholder’s Shareholder Servicing Agent or Securities Broker), dividends are distributed in the form of additional shares of the Funds at the rate of one share (and fraction thereof) of the Fund for each one dollar (and fraction thereof) of dividend income.

Each Fund's net realized capital gains, if any, are distributed to shareholders annually. Additional distributions are also made to each Fund's shareholders to the extent necessary to avoid application of the 4% non-deductible federal excise tax on certain undistributed income and net capital gains of regulated investment companies. Unless a shareholder elects to receive dividends in cash, dividends are distributed in the form of additional shares of the Funds (purchased at their NAV without a sales charge).

For this purpose, the net income of the Funds (from the time of the immediately preceding determination thereof) consists of (i) all income accrued, less the amortization of any premium, on the assets of the Funds, less (ii) all actual and accrued expenses determined in accordance with generally accepted accounting principles. Interest income includes discount earned (including both original issue and market discount) on discount paper accrued ratably to the date of maturity and any net realized gains or losses on the assets of the Funds. Obligations held in a Fund's portfolio are valued at amortized cost, which the Trustees of the Trust have determined in good faith constitutes fair value for the purposes of complying with the 1940 Act. This method provides certainty in valuation, but may result in periods during which the stated value of an obligation held for a Fund is higher or lower than the price the Fund would receive if the obligation were sold. This valuation method will continue to be used until such time as the Trustees of the Trust determine that it does not constitute fair value for such purposes.

Since the net income of the Funds is declared as a dividend each time the net income of the Funds is determined, the NAV per share of the Funds is expected to remain at \$1.00 per share immediately after each such determination and dividend declaration. Any increase in the value of a shareholder's investment in the Funds, representing the reinvestment of dividend income, is reflected by an increase in the number of Shares in his account.

It is expected that the Funds will have a positive net income at the time of each determination thereof. If, for any reason, the net income of the Funds determined at any time is a negative amount, which could occur, for instance, upon default by an issuer of an obligation held in a Fund's portfolio, the negative amount with respect to each shareholder account would first be offset from the dividends declared during the month with respect to each such account. If and to the extent that such negative amount exceeds such declared dividends at the end of the month, the number of outstanding Fund shares would be reduced by treating each shareholder as having contributed to the capital of the Fund that number of full and fractional shares in the account of such shareholder which represents his proportion of the amount of such excess. Each shareholder will be deemed to have agreed to such contribution in these circumstances by his investment in the Funds. Thus, the NAV per share is expected to be maintained at a constant \$1.00.

DESCRIPTION OF SHARES, VOTING RIGHTS, AND LIABILITIES

The Trust's Amended and Restated Agreement and Declaration of Trust permits the Trustees to issue an unlimited number of full and fractional shares of beneficial interest (par value \$0.001 per share) and to divide or combine the shares into a greater or lesser number of shares without thereby materially changing the proportionate beneficial interests in the Trust. Currently, the Trust has 8 operational series of shares, each of which constitutes a separately managed "Fund." The Trust reserves the right to create additional series of shares. Currently, the Funds issue separate classes of shares as described under "General Information."

Subject to the distinctions permitted among classes of the Trust or any series as established by the Trustees consistent with the requirements of the 1940 Act, each share of the Trust or any series shall represent an equal beneficial interest in the net assets of the Trust or such series, and each shareholder of the Trust or any series shall be entitled to receive such shareholder's pro rata share of distributions of income and capital gains, if any, made with respect to the Trust or such series. Upon redemption of the shares of any series, the applicable shareholder shall be paid solely out of the funds and property of such

series of the Trust. Except as otherwise provided by the Trustees, shareholders shall have no preemptive or other right to subscribe to any additional shares or other securities issued by the Trust.

The Trustees may require shareholders to redeem shares for any reason under terms set by the Trustees. When issued, shares are fully paid and non-assessable. The Trustees may, however, cause shareholders, or shareholders of a particular series or class, to pay certain transfer agency, servicing or similar agent charges by setting off such charges due from such shareholder from declared but unpaid dividends owed such shareholder and/or by reducing the number of shares in the account of such shareholder by that number of full and/or fractional shares which represents the outstanding amount of such charges due from such shareholder.

Shareholders are entitled to one vote for each share held on matters on which they are entitled to vote (and a proportionate fractional vote for each fraction of a share). The Trust is not required and has no current intention to hold annual meetings of shareholders, although the Trust will hold special meetings of Fund shareholders when in the judgment of the Trustees of the Trust it is necessary or desirable to submit matters for a shareholder vote or as otherwise required by the 1940 Act or other applicable federal law. It is not anticipated that the Trust will hold shareholders' meetings unless required by law or its Amended and Restated Agreement and Declaration of Trust or By-Laws. On any matters submitted to a vote of the shareholders, all shares of the Trust then entitled to vote shall be voted in aggregate, except: (i) when required by the 1940 Act, shares shall be voted by individual series or class; (ii) when the matter involves any action that the Trustees have determined will affect only the interests of one or more series, then only shareholders of such series shall be entitled to vote thereon; and (iii) when the matter involves any action that the Trustees have determined will affect only the interests of one or more classes, then only the shareholders of such class or classes shall be entitled to vote thereon. Accordingly, shareholders of each series generally vote separately, for example, to approve investment advisory contracts or changes in fundamental investment policies or restrictions, but shareholders of all series may vote together to the extent required under the 1940 Act, such as in the election or selection of Trustees, principal underwriters and accountants for the Trust. Under certain circumstances, the shareholders of one or more series could control the outcome of these votes.

Shares of each class of a series represent an equal pro rata interest in such series and, generally, have identical voting, dividend, liquidation, and other rights, preferences, powers, terms and conditions, except that: (i) each class shall have a different designation; (ii) each class of shares shall bear any class expenses; and (iii) each class shall have separate voting rights on any matter submitted to shareholders in which the interests of one class differ from the interests of any other class. Upon liquidation or dissolution of a Fund, shareholders of the Fund would generally be entitled to share pro rata in the net assets of the Fund's available for distribution to shareholders.

The shareholders of the Funds have the power to vote only: (i) for the election or removal of Trustees as and to the extent provided in the Trust's Amended and Restated Agreement and Declaration of Trust; (ii) with respect to such additional matters relating to the Trust as may be required by federal law including the 1940 Act, or any registration of the Trust with the SEC (or any successor agency) or any state; and (iii) as the Trustees may otherwise consider necessary or desirable in their sole discretion.

The Trust is an entity of the type commonly known as a "Delaware statutory trust." Under Delaware law and the Trust's Amended and Restated Agreement and Declaration of Trust, shareholders are entitled to the same limitation of personal liability extended to shareholders of corporations organized under Delaware law. Therefore, shareholders generally will not be subject to personal liability for Fund obligations. The risk that a shareholder will incur personal liability for Fund obligations is limited to the circumstances in which a state court may not apply Delaware law or the terms of the Trust's Amended and Restated Agreement and Declaration of Trust.

OWNERSHIP OF THE FUNDS

As of February 3, 2020, the following persons owned of record 5% or more of a Fund or class of shares:

Fund/Class	Percent of the Class Total Assets Held by the Shareholder

*Entity owned more than 25% of the outstanding shares of the Fund. A shareholder owning of record or beneficially more than 25% of a Fund's outstanding shares may be considered a control person and could have a more significant effect on matters presented at a shareholders' meeting than votes of other shareholders.

TAXATION

FEDERAL INCOME TAX

The following is a summary of certain U.S. federal income tax issues concerning the Funds and their shareholders. The Funds may also be subject to state, local, foreign or other taxes not discussed below. This discussion does not purport to be complete or to address all tax issues relevant to each shareholder. Prospective investors should consult their own tax advisors with regard to the federal, state, foreign and other tax consequences to them of the purchase, ownership or disposition of Fund shares. This discussion is based upon present provisions of the Code, the regulations promulgated thereunder, and judicial and administrative authorities, all of which are subject to change, which change may be retroactive. Future changes in tax laws may adversely impact the Funds and their shareholders.

The Funds each intend to be taxed as a regulated investment company under Subchapter M of the Code. Accordingly, each Fund must, among other things, (a) derive in each taxable year at least 90% of its gross income from dividends, interest, payments with respect to certain securities loans, and gains from the sale or other disposition of stock, securities, or foreign currencies, net income derived from an interest in a qualified publicly traded partnership, or other income derived with respect to its business of investing in such stock, securities or currencies; and (b) diversify its holdings so that, at the end of each fiscal quarter, (i) at least 50% of the value of the Fund's total assets is represented by cash and cash items, U.S. Government securities, the securities of other regulated investment companies and other securities, with such other securities limited, in respect of any one issuer, to an amount not greater than 5% of the value of the Fund's total assets and 10% of the outstanding voting securities of such issuer, and (ii) not more than 25% of the value of its total assets is invested in the securities of any one issuer (other than U.S. Government securities and the securities of other regulated investment companies), in two or more issuers

that the Fund controls and which are engaged in the same or similar trades or businesses, or of one or more qualified publicly traded partnerships.

As a regulated investment company, each Fund generally is not subject to U.S. federal income tax on income and gains that it distributes to shareholders, if at least 90% of the Fund's investment company taxable income (which includes, among other items, dividends, interest and the excess of any net short-term capital gains over net long-term capital losses) for the taxable year is distributed (*i.e., the 90% distribution requirement*). The Funds intend to distribute all or substantially all of such income.

Amounts not distributed on a timely basis in accordance with a calendar year distribution requirement are subject to a nondeductible 4% excise tax. To prevent imposition of the excise tax, each Fund must generally distribute for each calendar year an amount equal to the sum of (1) at least 98% of its ordinary income (taking into account certain deferrals and elections) for the calendar year, (2) at least 98.2% of the excess of its capital gains over capital losses for the 12-month period ending October 31 of the calendar year, and (3) all such ordinary income and capital gains for previous years that were not distributed during such years.

A distribution will be treated as paid during the calendar year if it is declared by a Fund in October, November or December of that year with a record date in such month and paid by the Fund during January of the following year. Such distributions will be taxable to shareholders in the calendar year in which the distributions are declared, rather than the calendar year in which the distributions are received.

For federal income tax purposes, the Funds are generally permitted to carry forward a net capital loss in any year to offset its own capital gains, if any, during subsequent taxable years. As of October 31, 2019, the Funds had the following capital loss carryforwards for federal income tax purposes which may be carried forward indefinitely with the retained tax character as set forth in the table below:

Fund	Short-Term Amount	Long-Term Amount	Total
U.S. Government Money Market Fund	\$17,309	\$0	\$17,309
U.S. Treasury Money Market Fund	\$0	\$0	\$0

These amounts are available to be carried forward to offset future net capital gains to the extent permitted by the Code and applicable tax regulations.

DISTRIBUTIONS IN GENERAL

Distributions of investment company taxable income generally are taxable to shareholders as ordinary income. It is not expected that such distributions will be eligible for the dividends-received deduction for corporations or for treatment as "qualified dividend income" for individuals.

If for any taxable year a Fund does not qualify for federal tax treatment as a regulated investment company, all of the Fund's net taxable investment income would (unless certain cure provisions apply) be subject to federal and, potentially, state income tax at regular corporate rates without any deduction for distributions to its shareholders. In such event, dividend distributions (including amounts derived from interest on municipal securities) would be taxable to a Fund's shareholders to the extent of the Fund's current and accumulated earnings and profits.

The excess of long-term capital gains over net short-term capital losses realized, if any, distributed and properly reported by the Funds, whether received in cash or reinvested in Funds, will generally be taxable to shareholders as long-term capital gain, regardless of how long a shareholder has held Fund shares. Long-term capital gain distributions, if any, made to individuals are generally subject to a maximum federal income tax rate of 15% or 20%, depending on whether the individual's income exceeds certain threshold amounts. Distributions of any net short-term capital gains from assets held for one year or less will be taxed as ordinary income. Distributions will be subject to these capital gains rates regardless of how long a shareholder has held Fund shares. Shareholders receiving distributions in the form of additional shares will be taxed on the amount of such distribution and will have a cost basis for federal income tax purposes in each share received equal to the amount of the cash the shareholder could have received. Shareholders will be notified annually as to the federal tax status of distributions.

An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from a Fund and net gains from redemptions or other taxable dispositions of Fund shares) of U.S. individuals, estates and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds certain threshold amounts.

Distributions in excess of a Fund's current and accumulated earnings and profits are treated as a tax-free return of a shareholder's investment to the extent of the shareholder's basis in the shares, and generally as capital gain thereafter. A return of capital, which for tax purposes is treated as a return of a shareholder's investment, reduces the shareholder's basis in shares, thus reducing any loss or increasing any gain on a subsequent taxable disposition of shares. A distribution will reduce a Fund's NAV per share and may be taxable to a shareholder as ordinary income or capital gain even though, from an economic standpoint, the distribution may constitute a return of capital.

SALE, EXCHANGE OR REDEMPTION OF SHARES

Upon disposition (by redemption, repurchase, sale or exchange) of Fund shares, a shareholder may realize a taxable gain or loss depending upon his basis in his shares. Realization of such a gain or loss is considered unlikely because of each Fund's policy to attempt to maintain a \$1.00 per share NAV. With respect to any gain or loss recognized on the sale or exchange of shares of a Fund, unless a shareholder chooses to adopt a simplified "NAV method" of accounting (described below), the amount of any gain or loss and the rate of tax will depend mainly upon how much the shareholder paid for the shares, how much the shareholder sells them for, and how long the shareholder held them. In this case, any gain or loss generally will be treated as short-term capital gain or loss if the shareholder held its shares as capital assets for one year or less, and long-term capital gain or loss if the shareholder held its shares as capital assets for more than one year. The maximum individual tax rate applicable to long-term capital gains is generally 15% or 20%, depending on whether the individual's income exceeds certain threshold amounts. Any loss realized on a sale or exchange of Fund shares also will be disallowed to the extent that the shares disposed of are replaced (including replacement through reinvesting of dividends and capital gain distributions in the Fund) within a period of 61 days beginning 30 days before and ending 30 days after the disposition of the shares. In such a case, the basis of the shares acquired will be adjusted to reflect the disallowed loss.

If a shareholder elects to adopt the simplified "NAV method" of accounting, rather than compute gain or loss on every taxable sale or other disposition of shares of a Fund as described above, the shareholder would determine gain or loss based on the change in the aggregate value of its Fund shares during a computation period (such as the shareholder's taxable year), reduced by the shareholder's net investment (i.e., purchases minus sales) in those Fund shares during the computation period. Under the simplified

“NAV method,” any resulting capital gain or loss would be reportable on a net basis and would generally be treated as a short-term capital gain or loss.

ORIGINAL ISSUE DISCOUNT/MARKET DISCOUNT

Market Discount. If a Fund purchases a debt security in the secondary market at a price lower than the stated redemption price at maturity of such debt security, the excess of the stated redemption price over the purchase price is “market discount.” If the amount of market discount is more than a de minimis amount, a portion of such market discount must be included as ordinary income (not capital gain) by a Fund in respect of each taxable year in which the Fund owns an interest in such debt security and receives a principal payment on it. In particular, a Fund will be required to allocate that principal payment first to the portion of the market discount on the debt security that has accrued but has not previously been includable in income. In general, the amount of market discount that must be included for each period is equal to the lesser of (i) the amount of market discount accruing during such period (plus any accrued market discount for prior periods not previously taken into account) or (ii) the amount of the principal payment with respect to such period. Generally, market discount accrues on a daily basis for each day the debt security is held by a Fund, at a constant rate over the time remaining to the debt security’s maturity or, at the election of the Fund, at a constant yield to maturity, which takes into account the semi-annual compounding of interest. Gain realized on the disposition of a market discount obligation must be recognized as ordinary interest income (not capital gain) to the extent of the “accrued market discount” not previously taken into account.

Original Issue Discount. Certain debt securities acquired by a Fund may be treated as debt securities that were originally issued at a discount. Very generally, original issue discount is defined as the difference between the price at which a security was issued and its stated redemption price at maturity. Although a Fund receives no actual cash income from such a discount, original issue discount that accrues on debt securities in a given year generally are treated for federal income tax purposes as interest and, therefore, such income would be subject to the distribution requirements applicable to regulated investment companies. Some debt securities may be purchased by a Fund at a discount that exceeds the original issue discount on such debt securities, if any. This additional discount generally represents market discount for federal income tax purposes (see above).

BACKUP WITHHOLDING

The Trust will be required to report to the Internal Revenue Service (the “IRS”) all distributions by the Funds except in the case of certain exempt shareholders. All such distributions generally will be subject to withholding of federal income tax at a current rate of 24% (“backup withholding”) in the case of nonexempt shareholders if (1) the shareholder fails to furnish the Funds with and to certify the shareholder’s correct taxpayer identification number or social security number, (2) the IRS notifies the shareholder or the Funds that the shareholder has failed to report properly certain interest and dividend income to the IRS and to respond to notices to that effect, or (3) when required to do so, the shareholder fails to certify that he is not subject to backup withholding. If the withholding provisions are applicable, any such distributions whether reinvested in additional shares or taken in cash, will be reduced by the amounts required to be withheld. Any amounts withheld may be credited against the shareholder’s federal income tax liability. Investors may wish to consult their tax advisors about the applicability of the backup withholding provisions.

OTHER TAXATION

Distributions may be subject to additional state and local taxes, depending on each shareholder's particular situation.

FOREIGN SHAREHOLDERS

Taxation of a shareholder who, as to the United States, is a nonresident alien individual, foreign trust or estate, or foreign corporation ("foreign shareholder"), depends on whether the income from a Fund is "effectively connected" with a U.S. trade or business carried on by such shareholder. If the income from a Fund is not effectively connected with a U.S. trade or business carried on by a foreign shareholder, ordinary income dividends (including distributions of any net short-term capital gains) will generally be subject to U.S. withholding tax at the rate of 30% (or lower treaty rate) upon the gross amount of the dividend. Note that the preferential rate of tax applicable to qualified dividend income (discussed above) does not apply to dividends paid to foreign shareholders. Such a foreign shareholder would generally be exempt from U.S. federal income tax on gains realized on the sale of shares of a Fund, and distributions of net long-term capital gains that are reported as capital gain dividends. If the income from a Fund is effectively connected with a U.S. trade or business carried on by a foreign shareholder, then ordinary income dividends, capital gain dividends and any gains realized upon the sale of shares of a Fund will be subject to U.S. federal income tax at the rates applicable to U.S. citizens or domestic corporations. If the Fund elects to report distributions of U.S. source interest and short-term capital gains, such distributions may be paid to foreign shareholders free of withholding. However, depending on the circumstances, the Fund may report all, some or none of the Fund's potentially eligible dividends as eligible for this exemption, and a portion of the Fund's distributions (e.g. interest from non-U.S. sources or any foreign currency gains) would be ineligible for this potential exemption from withholding.

The tax consequences to a foreign shareholder entitled to claim the benefits of an applicable tax treaty may be different from those described herein. Foreign shareholders are urged to consult their own tax advisers with respect to the particular tax consequences to them of an investment in the Funds, including the applicability of the U.S. estate tax and foreign taxes.

The Funds are required to withhold U.S. tax (at a 30% rate) on payments of taxable dividends made to certain non-U.S. entities that fail to comply (or be deemed compliant) with extensive reporting and withholding requirements designed to inform the U.S. Department of the Treasury of U.S.-owned foreign investment accounts. Shareholders may be requested to provide additional information to the Funds to enable the Funds to determine whether withholding is required.

OTHER INFORMATION

CAPITALIZATION

The Trust is an open-end, management investment company formed as a statutory trust under the laws of the State of Delaware on March 2, 2016. The Funds were previously series of HSBC Funds, a different legal entity organized as a Massachusetts business trust (the "Predecessor Trust"). In 2016, at a special meeting of shareholders, the shareholders of each series of the Predecessor Trust (the "Predecessor Funds") approved the reorganization of the Predecessor Funds with and into corresponding "shell" series of the Trust. The shell series of the Trust succeeded to the accounting and performance histories of the Predecessor Funds. Any historical information provided for a Fund that relates to periods prior to June 24, 2016 is that of the corresponding Predecessor Fund.

The Predecessor Trust was a Massachusetts business trust established under a Declaration of Trust dated April 22, 1987, as a successor to two previously-existing Massachusetts business trusts, Fund Trust Tax-Free Trust (organized on July 30, 1986) and Fund Vest (organized on July 17, 1984, and since renamed Fund Source). Prior to October 3, 1994, the name of the Predecessor Trust was “Fund Trust.” Prior to April 12, 2001, the name of the Predecessor Trust was “Republic Funds.” Prior to February 28, 2012, the name of the Predecessor Trust was “HSBC Investor Funds.”

The capitalization of the Trust consists solely of an unlimited number of shares of beneficial interest with a par value of \$0.001 each. The Board may establish additional series (with different investment objectives and fundamental policies) and classes of shares within each series at any time in the future. Establishment and offering of additional classes or series will not alter the rights of the Funds’ shareholders.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board has appointed PricewaterhouseCoopers LLP (“PwC”) as the independent registered public accounting firm of the Trust. PwC audits the Trust’s annual financial statements and prepares the Trust’s income tax returns. PwC’s address is 300 Madison Ave, New York, NY 10017.

COUNSEL

Dechert LLP, 1900 K Street, N.W., Washington, D.C. 20006, advises on certain legal matters in connection with the shares of the Funds offered by the Trust, and also acts as counsel to the Trust. Stradley Ronon Stevens & Young, LLP, 2000 K Street, N.W. Suite 700, Washington, D.C. 20006, acts as counsel to the Independent Trustees of the Trust.

CODE OF ETHICS

The Trust, the Adviser and Citi each has adopted a code of ethics, as required by applicable law, including Rule 17j-1 under the 1940 Act, which is designed to prevent affiliated persons of the Trust, the Adviser and Citi from engaging in deceptive, manipulative, or fraudulent activities in connection with securities held or to be acquired by the Funds (which may also be held by persons subject to a code). Each Code sets forth restrictions with respect to certain transactions and contains preclearance and reporting obligations.

REGISTRATION STATEMENT

This SAI and the Prospectus do not contain all the information included in the Trust’s registration statement filed with the SEC under the 1933 Act with respect to shares of the Funds; certain portions of which have been omitted pursuant to the rules and regulations of the SEC. The registration statement, including the exhibits filed therewith, may be obtained on the SEC’s website at <http://www.sec.gov> or copies of this information may be obtained after paying a duplicating fee, by electronic request, at the following email address: publicinfo@sec.gov.

Statements contained herein and in the Prospectus as to the contents of any contract or other document referred to are not necessarily complete, and, in each instance, reference is made to the copy of such contract or other document which was filed as an exhibit to the registration statement, each such statement being qualified in all respects by such reference.

FINANCIAL STATEMENTS

The Funds' current audited financial statements dated October 31, 2019 have been audited by PwC, an independent registered public accounting firm, as indicated in its report with respect thereto, and are incorporated herein by reference from the Annual Report of the Funds dated October 31, 2019 as filed with the SEC. Copies of the report will be provided without charge to each person receiving this SAI.

SHAREHOLDER INQUIRIES

All shareholder inquiries should be directed to the Trust, P.O. Box 219691, Kansas City, MO 64121-9691.

GENERAL AND ACCOUNT INFORMATION: (800) 782-8183 (TOLL FREE)

APPENDIX A

DESCRIPTION OF SECURITY RATINGS

STANDARD & POOR'S

Long-Term Issue Credit Ratings

Issue credit ratings are based, in varying degrees, on Standard & Poor's analysis of the following considerations:

- Likelihood of payment – capacity and willingness of the obligor to meet its financial commitment on an obligation in accordance with the terms of the obligation;
- Nature of and provisions of the obligation;
- Protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

Issue ratings are an assessment of default risk, but may incorporate an assessment of relative seniority or ultimate recovery in the event of default. Junior obligations are typically rated lower than senior obligations, to reflect the lower priority in bankruptcy, as noted above. (Such differentiation may apply when an entity has both senior and subordinated obligations, secured and unsecured obligations, or operating company and holding company obligations.)

AAA An obligation rated 'AAA' has the highest rating assigned by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

AA An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB, B, CCC, CC, and C Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

BB An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

CCC An obligation rated 'CCC' is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC An obligation rated 'CC' is currently highly vulnerable to nonpayment.

C A 'C' rating is assigned to obligations that are currently highly vulnerable to nonpayment, obligations that have payment arrearages allowed by the terms of the documents, or obligations of an issuer that is the subject of a bankruptcy petition or similar action which have not experienced a payment default. Among others, the 'C' rating may be assigned to subordinated debt, preferred stock or other obligations on which cash payments have been suspended in accordance with the instrument's terms or when preferred stock is the subject of a distressed exchange offer, whereby some or all of the issue is either repurchased for an amount of cash or replaced by other instruments having a total value that is less than par.

D An obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation, including a regulatory capital instrument, are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of similar action if payments on an obligation are jeopardized. An obligation's rating is lowered to 'D' upon completion of a distressed exchange offer, whereby some or all of the issue is either repurchased for an amount of cash or replaced by other instruments having a total value that is less than par.

Plus (+) or Minus (-) The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

NR This indicates that no rating has been requested, that there is insufficient information on which to base a rating, or that Standard & Poor's does not rate a particular obligation as a matter of policy.

Municipal Short-Term Note Ratings

A Standard & Poor's U.S. municipal note rating reflects Standard & Poor's opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, Standard & Poor's analysis will review the following considerations:

- Amortization schedule – the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment – the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Note rating symbols are as follows:

SP-1 Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

SP-2 Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

SP-3 Speculative capacity to pay principal and interest.

Short-Term Issue Credit Ratings

A-1 A short-term obligation rated 'A-1' is rated in the highest category by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

A-2 A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

A-3 A short-term obligation rated 'A-3' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

Variable Rate Demand Obligations:

Standard & Poor's assigns "dual" ratings to all debt issues that have a put option or demand feature as part of their structure. The first rating addresses the likelihood of repayment of principal and interest as due, and the second rating addresses only the demand feature. The long-term rating symbols are used for bonds to denote the long-term maturity and the short-term rating symbols for the put option (for example, 'AAA/A-1+'). With U.S. municipal short-term demand debt, note rating symbols are used with the short-term issue credit rating symbols (for example, 'SP-1+/A-1+').

MOODY'S INVESTORS SERVICE ("Moody's")

Long-Term Obligation Ratings

Moody's long-term ratings are opinions of the relative credit risk of financial obligations with an original maturity of one year or more. They address the possibility that a financial obligation will not be honored as promised. Such ratings use Moody's Global Scale and reflect both the likelihood of default and any financial loss suffered in the event of default.

Aaa Obligations rated Aaa are judged to be of the highest quality, with minimal credit risk.

Aa Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

A Obligations rated A are considered upper-medium grade and are subject to low credit risk.

Baa Obligations rated Baa are subject to moderate credit risk. They are considered medium grade and as such may possess certain speculative characteristics.

Ba Obligations rated Ba are judged to have speculative elements and are subject to substantial credit risk.

B Obligations rated B are considered speculative and are subject to high credit risk.

Caa Obligations rated Caa are judged to be of poor standing and are subject to very high credit risk.

Ca Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

C Obligations rated C are the lowest rated class and are typically in default, with little prospect for recovery of principal or interest.

Note Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the

modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

U.S. Municipal Short Term Obligation Ratings

MIG 1 This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

MIG 2 This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

MIG 3 This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

SG This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Demand Obligation Ratings

In the case of variable rate demand obligations (VRDOs), a two-component rating is assigned; a long or short-term debt rating and a demand obligation rating. The first element represents Moody's evaluation of the degree of risk associated with scheduled principal and interest payments. The second element represents Moody's evaluation of the degree of risk associated with the ability to receive purchase price upon demand ("demand feature"), using a variation of the MIG rating scale, the Variable Municipal Investment Grade or VMIG rating.

When either the long- or short-term aspect of a VRDO is not rated, that piece is designated NR, e.g., Aaa/NR or NR/VMIG 1.

VMIG rating expirations are a function of each issue's specific structural or credit features.

VMIG 1 This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

VMIG 2 This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

VMIG 3 This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

SG This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have an investment grade short-term rating or may lack the structural and/or legal protections necessary to ensure the timely payment of purchase price upon demand.

Short-Term Obligation Ratings

Moody's short-term ratings are opinions of the ability of issuers to honor short-term financial obligations. Ratings may be assigned to issuers, short-term programs or to individual short-term debt instruments. Such obligations generally have an original maturity not exceeding thirteen months, unless explicitly noted.

Moody's employs the following designations to indicate the relative repayment ability of rated issuers:

P-1 Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

P-2 Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

P-3 Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short term obligations.

NP Issuers (or supporting institutions) rated “Not Prime” do not fall within any of the Prime rating categories.

Note: Canadian issuers rated P-1 or P-2 have their short-term ratings enhanced by the senior-most long-term rating of the issuer, its guarantor or support-provider.

FITCH, INC. (“Fitch Ratings”)

Corporate Finance Obligations – Long-Term Rating Scales

Ratings of individual securities or financial obligations of a corporate issuer address relative vulnerability to default on an ordinal scale. In addition, for financial obligations in corporate finance, a measure of recovery given default on that liability is also included in the rating assessment. This notably applies to covered bonds ratings, which incorporate both an indication of the probability of default and of the recovery given a default of this debt instrument.

The relationship between issuer scale and obligation scale assumes an historical average recovery of between 30%–50% on the senior, unsecured obligations of an issuer. As a result, individual obligations of entities, such as corporations, are assigned ratings higher, lower, or the same as that entity's issuer rating or Issuer Default Rating (“IDR”).

AAA Highest credit quality. ‘AAA’ denotes the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for timely payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA Very high credit quality. ‘AA’ ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A High credit quality. ‘A’ ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

BBB Good credit quality. ‘BBB’ ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate but adverse business or economic conditions are more likely to impair this capacity.

BB Speculative. ‘BB’ ratings indicate an elevated vulnerability to credit risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial alternatives may be available to allow financial commitments to be met.

B Highly speculative. ‘B’ ratings indicate that material credit risk is present.

CCC Substantial credit risk. ‘CCC’ ratings indicate that substantial credit risk is present.

CC Very high levels of credit risk. 'CC' ratings indicate very high levels of credit risk.

C Exceptionally high levels of credit risk. 'C' indicates exceptionally high levels of credit risk.

Defaulted obligations typically are not assigned 'D' ratings, but are instead rated in the 'B' to 'C' rating categories, depending upon their recovery prospects and other relevant characteristics. This approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

Notes: The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' obligation rating category, or to corporate finance obligation ratings in the categories below 'B'.

The subscript 'emr' is appended to a rating to denote embedded market risk which is beyond the scope of the rating. The designation is intended to make clear that the rating solely addresses the counterparty risk of the issuing bank. It is not meant to indicate any limitation in the analysis of the counterparty risk, which in all other respects follows published Fitch criteria for analyzing the issuing financial institution. Fitch does not rate these instruments where the principal is to any degree subject to market risk.

Short-Term Ratings Assigned to Obligations in Corporate, Public and Structured Finance

A short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity or security stream and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-Term Ratings are assigned to obligations whose initial maturity is viewed as "short term" based on market convention. Typically, this means up to 13 months for corporate, sovereign, and structured obligations, and up to 36 months for obligations in U.S. public finance markets.

F-1 Highest short-term credit quality. Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

F-2 Good short-term credit quality. Good intrinsic capacity for timely payment of financial commitments.

F-3 Fair short-term credit quality. The intrinsic capacity for timely payment of financial commitments is adequate.

B Speculative short-term credit quality. Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

C High short-term default risk. Default is a real possibility.

RD Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Applicable to entity ratings only.

D Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

RESTRICTED B-1

The policies contained herein are a sampling only of selected key ISS U.S. proxy voting guidelines, and are not intended to be exhaustive. The complete guidelines can be found at:

<https://www.issgovernance.com/policy-gateway/voting-policies/>

Board of Directors

Voting on Director Nominees in Uncontested Elections

 **General Recommendation:** Generally vote for director nominees, except under the following circumstances (with new nominees¹ considered on case-by-case basis):

Independence

Vote against² or withhold from non-independent directors (Executive Directors and Non-Independent Non-Executive Directors per ISS' Classification of Directors) when:

- Independent directors comprise 50 percent or less of the board;
- The non-independent director serves on the audit, compensation, or nominating committee;
- The company lacks an audit, compensation, or nominating committee so that the full board functions as that committee; or
- The company lacks a formal nominating committee, even if the board attests that the independent directors fulfill the functions of such a committee.

Composition

Attendance at Board and Committee Meetings: Generally vote against or withhold from directors (except nominees who served only part of the fiscal year³) who attend less than 75 percent of the aggregate of their board and committee meetings for the period for which they served, unless an acceptable reason for absences is disclosed in the proxy or another SEC filing. Acceptable reasons for director absences are generally limited to the following:

- Medical issues/illness;
- Family emergencies; and
- Missing only one meeting (when the total of all meetings is three or fewer).

¹ A "new nominee" is a director who is being presented for election by shareholders for the first time. Recommendations on new nominees who have served for less than one year are made on a case-by-case basis depending on the timing of their appointment and the problematic governance issue in question.

² In general, companies with a plurality vote standard use "Withhold" as the contrary vote option in director elections; companies with a majority vote standard use "Against". However, it will vary by company and the proxy must be checked to determine the valid contrary vote option for the particular company.

³ Nominees who served for only part of the fiscal year are generally exempted from the attendance policy.

In cases of chronic poor attendance without reasonable justification, in addition to voting against the director(s) with poor attendance, generally vote against or withhold from appropriate members of the nominating/governance committees or the full board.

If the proxy disclosure is unclear and insufficient to determine whether a director attended at least 75 percent of the aggregate of his/her board and committee meetings during his/her period of service, vote against or withhold from the director(s) in question.

Overboarded Directors: Generally vote against or withhold from individual directors who:

- Sit on more than five public company boards; or
- Are CEOs of public companies who sit on the boards of more than two public companies besides their own— withhold only at their outside boards⁴.

Diversity: For companies in the Russell 3000 or S&P 1500 indices, generally vote against or withhold from the chair of the nominating committee (or other directors on a case-by-case basis) at companies where there are no women on the company's board. Mitigating factors include:

- Until Feb. 1, 2021, a firm commitment, as stated in the proxy statement, to appoint at least one woman to the board within a year;
- The presence of a woman on the board at the preceding annual meeting and a firm commitment to appoint at least one woman to the board within a year; or
- Other relevant factors as applicable.

Responsiveness

Vote case-by-case on individual directors, committee members, or the entire board of directors as appropriate if:

- The board failed to act on a shareholder proposal that received the support of a majority of the shares cast in the previous year or failed to act on a management proposal seeking to ratify an existing charter/bylaw provision that received opposition of a majority of the shares cast in the previous year. Factors that will be considered are:
 - Disclosed outreach efforts by the board to shareholders in the wake of the vote;
 - Rationale provided in the proxy statement for the level of implementation;
 - The subject matter of the proposal;
 - The level of support for and opposition to the resolution in past meetings;
 - Actions taken by the board in response to the majority vote and its engagement with shareholders;
 - The continuation of the underlying issue as a voting item on the ballot (as either shareholder or management proposals); and
 - Other factors as appropriate.
- The board failed to act on takeover offers where the majority of shares are tendered;

⁴ Although all of a CEO's subsidiary boards with publicly-traded common stock will be counted as separate boards, ISS will not recommend a withhold vote for the CEO of a parent company board or any of the controlled (>50 percent ownership) subsidiaries of that parent but may do so at subsidiaries that are less than 50 percent controlled and boards outside the parent/subsidiary relationships.

- At the previous board election, any director received more than 50 percent withhold/against votes of the shares cast and the company has failed to address the issue(s) that caused the high withhold/against vote.

Vote case-by-case on Compensation Committee members (or, in exceptional cases, the full board) and the Say on Pay proposal if:

- The company's previous say-on-pay received the support of less than 70 percent of votes cast. Factors that will be considered are:
 - The company's response, including:
 - Disclosure of engagement efforts with major institutional investors, including the frequency and timing of engagements and the company participants (including whether independent directors participated);
 - Disclosure of the specific concerns voiced by dissenting shareholders that led to the say-on-pay opposition;
 - Disclosure of specific and meaningful actions taken to address shareholders' concerns;
 - Other recent compensation actions taken by the company;
 - Whether the issues raised are recurring or isolated;
 - The company's ownership structure; and
 - Whether the support level was less than 50 percent, which would warrant the highest degree of responsiveness.
- The board implements an advisory vote on executive compensation on a less frequent basis than the frequency that received the plurality of votes cast.

Accountability

Problematic Takeover Defenses/Governance Structure

Poison Pills: Vote against or withhold from all nominees (except new nominees¹, who should be considered case-by-case) if:

- The company has a poison pill that was not approved by shareholders⁵. However, vote case-by-case on nominees if the board adopts an initial pill with a term of one year or less, depending on the disclosed rationale for the adoption, and other factors as relevant (such as a commitment to put any renewal to a shareholder vote).
- The board makes a material adverse modification to an existing pill, including, but not limited to, extension, renewal, or lowering the trigger, without shareholder approval.

Classified Board Structure: The board is classified, and a continuing director responsible for a problematic governance issue at the board/committee level that would warrant a withhold/against vote recommendation is not up for election. All appropriate nominees (except new) may be held accountable.

Removal of Shareholder Discretion on Classified Boards: The company has opted into, or failed to opt out of, state laws requiring a classified board structure.

Director Performance Evaluation: The board lacks mechanisms to promote accountability and oversight, coupled with sustained poor performance relative to peers. Sustained poor performance is measured by one-, three-, and

⁵ Public shareholders only, approval prior to a company's becoming public is insufficient.

five-year total shareholder returns in the bottom half of a company's four-digit GICS industry group (Russell 3000 companies only). Take into consideration the company's operational metrics and other factors as warranted. Problematic provisions include but are not limited to:

- A classified board structure;
- A supermajority vote requirement;
- Either a plurality vote standard in uncontested director elections, or a majority vote standard in contested elections;
- The inability of shareholders to call special meetings;
- The inability of shareholders to act by written consent;
- A multi-class capital structure; and/or
- A non-shareholder-approved poison pill.

Unilateral Bylaw/Charter Amendments and Problematic Capital Structures: Generally vote against or withhold from directors individually, committee members, or the entire board (except new nominees¹, who should be considered case-by-case) if the board amends the company's bylaws or charter without shareholder approval in a manner that materially diminishes shareholders' rights or that could adversely impact shareholders, considering the following factors:

- The board's rationale for adopting the bylaw/charter amendment without shareholder ratification;
- Disclosure by the company of any significant engagement with shareholders regarding the amendment;
- The level of impairment of shareholders' rights caused by the board's unilateral amendment to the bylaws/charter;
- The board's track record with regard to unilateral board action on bylaw/charter amendments or other entrenchment provisions;
- The company's ownership structure;
- The company's existing governance provisions;
- The timing of the board's amendment to the bylaws/charter in connection with a significant business development; and
- Other factors, as deemed appropriate, that may be relevant to determine the impact of the amendment on shareholders.

Unless the adverse amendment is reversed or submitted to a binding shareholder vote, in subsequent years vote case-by-case on director nominees. Generally vote against (except new nominees¹, who should be considered case-by-case) if the directors:

- Classified the board;
- Adopted supermajority vote requirements to amend the bylaws or charter; or
- Eliminated shareholders' ability to amend bylaws.

Problematic Capital Structure - Newly Public Companies: For newly public companies⁶, generally vote against or withhold from the entire board (except new nominees¹, who should be considered case-by-case) if, prior to or in connection with the company's public offering, the company or its board implemented a multi-class capital structure in which the classes have unequal voting rights without subjecting the multi-class capital structure to a reasonable time-based sunset. In assessing the reasonableness of a time-based sunset provision, consideration will be given to the company's lifespan, its post-IPO ownership structure and the board's disclosed rationale for the

⁶ Newly-public companies generally include companies that emerge from bankruptcy, spin-offs, direct listings, and those who complete a traditional initial public offering.

sunset period selected. No sunset period of more than seven years from the date of the IPO will be considered to be reasonable.

Continue to vote against or withhold from incumbent directors in subsequent years, unless the problematic capital structure is reversed or removed.

Problematic Governance Structure - Newly Public Companies: For newly public companies⁶, generally vote against or withhold from directors individually, committee members, or the entire board (except new nominees¹, who should be considered case-by-case) if, prior to or in connection with the company's public offering, the company or its board adopted the following bylaw or charter provisions that are considered to be materially adverse to shareholder rights:

- Supermajority vote requirements to amend the bylaws or charter;
- A classified board structure; or
- Other egregious provisions.

A reasonable sunset provision will be considered a mitigating factor.

Unless the adverse provision is reversed or removed, vote case-by-case on director nominees in subsequent years.

Management Proposals to Ratify Existing Charter or Bylaw Provisions: Vote against/withhold from individual directors, members of the governance committee, or the full board, where boards ask shareholders to ratify existing charter or bylaw provisions considering the following factors:

- The presence of a shareholder proposal addressing the same issue on the same ballot;
- The board's rationale for seeking ratification;
- Disclosure of actions to be taken by the board should the ratification proposal fail;
- Disclosure of shareholder engagement regarding the board's ratification request;
- The level of impairment to shareholders' rights caused by the existing provision;
- The history of management and shareholder proposals on the provision at the company's past meetings;
- Whether the current provision was adopted in response to the shareholder proposal;
- The company's ownership structure; and
- Previous use of ratification proposals to exclude shareholder proposals.

Restrictions on Shareholders' Rights

Restricting Binding Shareholder Proposals: Generally vote against or withhold from the members of the governance committee if:

- The company's governing documents impose undue restrictions on shareholders' ability to amend the bylaws. Such restrictions include but are not limited to: outright prohibition on the submission of binding shareholder proposals or share ownership requirements, subject matter restrictions, or time holding requirements in excess of SEC Rule 14a-8. Vote against or withhold on an ongoing basis.

Submission of management proposals to approve or ratify requirements in excess of SEC Rule 14a-8 for the submission of binding bylaw amendments will generally be viewed as an insufficient restoration of shareholders' rights. Generally continue to vote against or withhold on an ongoing basis until shareholders are provided with an unfettered ability to amend the bylaws or a proposal providing for such unfettered right is submitted for shareholder approval.

Problematic Audit-Related Practices

Generally vote against or withhold from the members of the Audit Committee if:

- The non-audit fees paid to the auditor are [excessive](#);
- The company receives an adverse opinion on the company's financial statements from its auditor; or
- There is persuasive evidence that the Audit Committee entered into an inappropriate indemnification agreement with its auditor that limits the ability of the company, or its shareholders, to pursue legitimate legal recourse against the audit firm.

Vote case-by-case on members of the Audit Committee and potentially the full board if:

- Poor accounting practices are identified that rise to a level of serious concern, such as: fraud; misapplication of GAAP; and material weaknesses identified in Section 404 disclosures. Examine the severity, breadth, chronological sequence, and duration, as well as the company's efforts at remediation or corrective actions, in determining whether withhold/against votes are warranted.

Problematic Compensation Practices

In the absence of an Advisory Vote on Executive Compensation (Say on Pay) ballot item or in egregious situations, vote against or withhold from the members of the Compensation Committee and potentially the full board if:

- There is an unmitigated misalignment between CEO pay and company performance ([pay for performance](#));
- The company maintains significant [problematic pay practices](#); or
- The board exhibits a significant level of [poor communication and responsiveness](#) to shareholders.

Generally vote against or withhold from the Compensation Committee chair, other committee members, or potentially the full board if:

- The company fails to include a Say on Pay ballot item when required under SEC provisions, or under the company's declared frequency of say on pay; or
- The company fails to include a Frequency of Say on Pay ballot item when required under SEC provisions.

Generally vote against members of the board committee responsible for approving/setting non-employee director compensation if there is a pattern (i.e. two or more years) of awarding excessive non-employee director compensation without disclosing a compelling rationale or other mitigating factors.

Problematic Pledging of Company Stock:

Vote against the members of the committee that oversees risks related to pledging, or the full board, where a significant level of pledged company stock by executives or directors raises concerns. The following factors will be considered:

- The presence of an anti-pledging policy, disclosed in the proxy statement, that prohibits future pledging activity;
- The magnitude of aggregate pledged shares in terms of total common shares outstanding, market value, and trading volume;
- Disclosure of progress or lack thereof in reducing the magnitude of aggregate pledged shares over time;
- Disclosure in the proxy statement that shares subject to stock ownership and holding requirements do not include pledged company stock; and
- Any other relevant factors.

Governance Failures

Under extraordinary circumstances, vote against or withhold from directors individually, committee members, or the entire board, due to:

- Material failures of governance, stewardship, risk oversight⁷, or fiduciary responsibilities at the company;
- Failure to replace management as appropriate; or
- Egregious actions related to a director's service on other boards that raise substantial doubt about his or her ability to effectively oversee management and serve the best interests of shareholders at any company.

Voting on Director Nominees in Contested Elections

Vote-No Campaigns

- **General Recommendation:** In cases where companies are targeted in connection with public “vote-no” campaigns, evaluate director nominees under the existing governance policies for voting on director nominees in uncontested elections. Take into consideration the arguments submitted by shareholders and other publicly available information.

Proxy Contests/Proxy Access — Voting for Director Nominees in Contested Elections

- **General Recommendation:** Vote case-by-case on the election of directors in contested elections, considering the following factors:
- Long-term financial performance of the company relative to its industry;
 - Management's track record;
 - Background to the contested election;
 - Nominee qualifications and any compensatory arrangements;
 - Strategic plan of dissident slate and quality of the critique against management;
 - Likelihood that the proposed goals and objectives can be achieved (both slates); and
 - Stock ownership positions.

In the case of candidates nominated pursuant to proxy access, vote case-by-case considering any applicable factors listed above or additional factors which may be relevant, including those that are specific to the company, to the nominee(s) and/or to the nature of the election (such as whether there are more candidates than board seats).

Independent Board Chair

- **General Recommendation:** Generally vote for shareholder proposals requiring that the board chair position be filled by an independent director, taking into consideration the following:
- The scope and rationale of the proposal;
 - The company's current board leadership structure;
 - The company's governance structure and practices;
 - Company performance; and
 - Any other relevant factors that may be applicable.

The following factors will increase the likelihood of a “for” recommendation:

⁷ Examples of failure of risk oversight include but are not limited to: bribery; large or serial fines or sanctions from regulatory bodies; significant adverse legal judgments or settlement; or hedging of company stock.

- A majority non-independent board and/or the presence of non-independent directors on key board committees;
- A weak or poorly-defined lead independent director role that fails to serve as an appropriate counterbalance to a combined CEO/chair role;
- The presence of an executive or non-independent chair in addition to the CEO, a recent recombination of the role of CEO and chair, and/or departure from a structure with an independent chair;
- Evidence that the board has failed to oversee and address material risks facing the company;
- A material governance failure, particularly if the board has failed to adequately respond to shareholder concerns or if the board has materially diminished shareholder rights; or
- Evidence that the board has failed to intervene when management's interests are contrary to shareholders' interests.

Proxy Access

 **General Recommendation:** Generally vote for management and shareholder proposals for proxy access with the following provisions:

- **Ownership threshold:** maximum requirement not more than three percent (3%) of the voting power;
- **Ownership duration:** maximum requirement not longer than three (3) years of continuous ownership for each member of the nominating group;
- **Aggregation:** minimal or no limits on the number of shareholders permitted to form a nominating group;
- **Cap:** cap on nominees of generally twenty-five percent (25%) of the board.

Review for reasonableness any other restrictions on the right of proxy access.

Generally vote against proposals that are more restrictive than these guidelines.

Shareholder Rights & Defenses

Ratification Proposals: Management Proposals to Ratify Existing Charter or Bylaw Provisions

 **General Recommendation:** Generally vote against management proposals to ratify provisions of the company's existing charter or bylaws, unless these governance provisions align with best practice.

In addition, voting against/withhold from individual directors, members of the governance committee, or the full board may be warranted, considering:

- The presence of a shareholder proposal addressing the same issue on the same ballot;
- The board's rationale for seeking ratification;
- Disclosure of actions to be taken by the board should the ratification proposal fail;
- Disclosure of shareholder engagement regarding the board's ratification request;
- The level of impairment to shareholders' rights caused by the existing provision;
- The history of management and shareholder proposals on the provision at the company's past meetings;
- Whether the current provision was adopted in response to the shareholder proposal;
- The company's ownership structure; and
- Previous use of ratification proposals to exclude shareholder proposals.

Capital/Restructuring

Common Stock Authorization

 **General Recommendation:** Vote for proposals to increase the number of authorized common shares where the primary purpose of the increase is to issue shares in connection with a transaction on the same ballot that warrants support.

Vote against proposals at companies with more than one class of common stock to increase the number of authorized shares of the class of common stock that has superior voting rights.

Vote against proposals to increase the number of authorized common shares if a vote for a reverse stock split on the same ballot is warranted despite the fact that the authorized shares would not be reduced proportionally.

Vote case-by-case on all other proposals to increase the number of shares of common stock authorized for issuance. Take into account company-specific factors that include, at a minimum, the following:

- Past Board Performance:
 - The company's use of authorized shares during the last three years;
- The Current Request:
 - Disclosure in the proxy statement of the specific purposes of the proposed increase;
 - Disclosure in the proxy statement of specific and severe risks to shareholders of not approving the request; and
 - The dilutive impact of the request as determined relative to an allowable increase calculated by ISS (typically 100 percent of existing authorized shares) that reflects the company's need for shares and total shareholder returns.

ISS will apply the relevant allowable increase below to requests to increase common stock that are for general corporate purposes (or to the general corporate purposes portion of a request that also includes a specific need):

- A. Most companies: **100 percent** of existing authorized shares.
- B. Companies with less than 50 percent of existing authorized shares either outstanding or reserved for issuance: **50 percent** of existing authorized shares.
- C. Companies with one- and three-year total shareholder returns (TSRs) in the bottom 10 percent of the U.S. market as of the end of the calendar quarter that is closest to their most recent fiscal year end: **50 percent** of existing authorized shares.
- D. Companies at which both conditions (B and C) above are both present: **25 percent** of existing authorized shares.

If there is an acquisition, private placement, or similar transaction on the ballot (not including equity incentive plans) that ISS is recommending FOR, the allowable increase will be the greater of (i) twice the amount needed to support the transactions on the ballot, and (ii) the allowable increase as calculated above.

Share Repurchase Programs

 **General Recommendation:** For U.S.-incorporated companies, and foreign-incorporated U.S. Domestic Issuers that are traded solely on U.S. exchanges, vote for management proposals to institute open-market share repurchase plans in which all shareholders may participate on equal terms, or to grant the board authority to conduct open-market repurchases, in the absence of company-specific concerns regarding:

- Greenmail,
- The use of buybacks to inappropriately manipulate incentive compensation metrics,
- Threats to the company's long-term viability, or
- Other company-specific factors as warranted.

Vote case-by-case on proposals to repurchase shares directly from specified shareholders, balancing the stated rationale against the possibility for the repurchase authority to be misused, such as to repurchase shares from insiders at a premium to market price.

Share Repurchase Programs Shareholder Proposals

 **General Recommendation:** Generally vote against shareholder proposals prohibiting executives from selling shares of company stock during periods in which the company has announced that it may or will be repurchasing shares of its stock. Vote for the proposal when there is a pattern of abuse by executives exercising options or selling shares during periods of share buybacks.

- Financial issues - company's financial situation; degree of need for capital; use of proceeds; effect of the financing on the company's cost of capital;
- Management's efforts to pursue other alternatives;
- Control issues - change in management; change in control, guaranteed board and committee seats; standstill provisions; voting agreements; veto power over certain corporate actions; and
- Conflict of interest - arm's length transaction, managerial incentives.

Vote for the debt restructuring if it is expected that the company will file for bankruptcy if the transaction is not approved.

Mergers and Acquisitions

 **General Recommendation:** Vote case-by-case on mergers and acquisitions. Review and evaluate the merits and drawbacks of the proposed transaction, balancing various and sometimes countervailing factors including:

- *Valuation* - Is the value to be received by the target shareholders (or paid by the acquirer) reasonable? While the fairness opinion may provide an initial starting point for assessing valuation reasonableness, emphasis is placed on the offer premium, market reaction, and strategic rationale.
- *Market reaction* - How has the market responded to the proposed deal? A negative market reaction should cause closer scrutiny of a deal.
- *Strategic rationale* - Does the deal make sense strategically? From where is the value derived? Cost and revenue synergies should not be overly aggressive or optimistic, but reasonably achievable. Management should also have a favorable track record of successful integration of historical acquisitions.
- *Negotiations and process* - Were the terms of the transaction negotiated at arm's-length? Was the process fair and equitable? A fair process helps to ensure the best price for shareholders. Significant negotiation "wins" can also signify the deal makers' competency. The comprehensiveness of the sales process (e.g., full auction, partial auction, no auction) can also affect shareholder value.
- *Conflicts of interest* - Are insiders benefiting from the transaction disproportionately and inappropriately as compared to non-insider shareholders? As the result of potential conflicts, the directors and officers of the company may be more likely to vote to approve a merger than if they did not hold these interests. Consider whether these interests may have influenced these directors and officers to support or recommend the merger. The CIC figure presented in the "ISS Transaction Summary" section of this report is an aggregate figure that can in certain cases be a misleading indicator of the true value transfer from shareholders to insiders. Where such figure appears to be excessive, analyze the underlying assumptions to determine whether a potential conflict exists.
- *Governance* - Will the combined company have a better or worse governance profile than the current governance profiles of the respective parties to the transaction? If the governance profile is to change for the worse, the burden is on the company to prove that other issues (such as valuation) outweigh any deterioration in governance.

Compensation

Executive Pay Evaluation

Underlying all evaluations are five global principles that most investors expect corporations to adhere to in designing and administering executive and director compensation programs:

1. Maintain appropriate pay-for-performance alignment, with emphasis on long-term shareholder value: This principle encompasses overall executive pay practices, which must be designed to attract, retain, and appropriately motivate the key employees who drive shareholder value creation over the long term. It will take into consideration, among other factors, the link between pay and performance; the mix between fixed and variable pay; performance goals; and equity-based plan costs;
2. Avoid arrangements that risk "pay for failure": This principle addresses the appropriateness of long or indefinite contracts, excessive severance packages, and guaranteed compensation;
3. Maintain an independent and effective compensation committee: This principle promotes oversight of executive pay programs by directors with appropriate skills, knowledge, experience, and a sound process for compensation decision-making (e.g., including access to independent expertise and advice when needed);
4. Provide shareholders with clear, comprehensive compensation disclosures: This principle underscores the importance of informative and timely disclosures that enable shareholders to evaluate executive pay practices fully and fairly;
5. Avoid inappropriate pay to non-executive directors: This principle recognizes the interests of shareholders in ensuring that compensation to outside directors is reasonable and does not compromise their independence and ability to make appropriate judgments in overseeing managers' pay and performance. At the market level, it may incorporate a variety of generally accepted best practices.

Advisory Votes on Executive Compensation—Management Proposals (Say-on-Pay)

 **General Recommendation:** Vote case-by-case on ballot items related to executive pay and practices, as well as certain aspects of outside director compensation.

Vote against Advisory Votes on Executive Compensation (Say-on-Pay or “SOP”) if:

- There is an unmitigated misalignment between CEO pay and company performance (pay for performance);
- The company maintains significant problematic pay practices;
- The board exhibits a significant level of [poor communication and responsiveness](#) to shareholders.

Vote against or withhold from the members of the Compensation Committee and potentially the full board if:

- There is no SOP on the ballot, and an against vote on an SOP would otherwise be warranted due to pay-for-performance misalignment, problematic pay practices, or the lack of adequate responsiveness on compensation issues raised previously, or a combination thereof;
- The board fails to respond adequately to a previous SOP proposal that received less than 70 percent support of votes cast;
- The company has recently practiced or approved problematic pay practices, such as option repricing or option backdating; or
- The situation is egregious.

Primary Evaluation Factors for Executive Pay

Pay-for-Performance Evaluation

ISS annually conducts a pay-for-performance analysis to identify strong or satisfactory alignment between pay and performance over a sustained period. With respect to companies in the S&P1500, Russell 3000, or Russell 3000E Indices⁸, this analysis considers the following:

1. Peer Group⁹ Alignment:
 - The degree of alignment between the company's annualized TSR rank and the CEO's annualized total pay rank within a peer group, each measured over a three-year period.
 - The rankings of CEO total pay and company financial performance within a peer group, each measured over a three-year period.
 - The multiple of the CEO's total pay relative to the peer group median in the most recent fiscal year.
2. Absolute Alignment¹⁰ – the absolute alignment between the trend in CEO pay and company TSR over the prior five fiscal years – i.e., the difference between the trend in annual pay changes and the trend in annualized TSR during the period.

⁸ The [Russell 3000E](#) Index includes approximately 4,000 of the largest U.S. equity securities.

⁹ The revised peer group is generally comprised of 14-24 companies that are selected using market cap, revenue (or assets for certain financial firms), GICS industry group, and company's selected peers' GICS industry group, with size constraints, via a process designed to select peers that are comparable to the subject company in terms of revenue/assets and industry, and also within a market-cap bucket that is reflective of the company's. For Oil, Gas & Consumable Fuels companies, market cap is the only size determinant.

If the above analysis demonstrates significant unsatisfactory long-term pay-for-performance alignment or, in the case of companies outside the Russell indices, a misalignment between pay and performance is otherwise suggested, our analysis may include any of the following qualitative factors, as relevant to an evaluation of how various pay elements may work to encourage or to undermine long-term value creation and alignment with shareholder interests:

- The ratio of performance- to time-based incentive awards;
- The overall ratio of performance-based compensation to fixed or discretionary pay;
- The rigor of performance goals;
- The complexity and risks around pay program design;
- The transparency and clarity of disclosure;
- The company's peer group benchmarking practices;
- Financial/operational results, both absolute and relative to peers;
- Special circumstances related to, for example, a new CEO in the prior FY or anomalous equity grant practices (e.g., bi-annual awards);
- Realizable pay¹¹ compared to grant pay; and
- Any other factors deemed relevant.

Problematic Pay Practices

The focus is on executive compensation practices that contravene the global pay principles, including:

- Problematic practices related to non-performance-based compensation elements;
- Incentives that may motivate excessive risk-taking or present a windfall risk; and
- Pay decisions that circumvent pay-for-performance, such as options backdating or waiving performance requirements.

Problematic Pay Practices related to Non-Performance-Based Compensation Elements

Pay elements that are not directly based on performance are generally evaluated case-by-case considering the context of a company's overall pay program and demonstrated pay-for-performance philosophy. Please refer to ISS' [U.S. Compensation Policies FAQ](#) document for detail on specific pay practices that have been identified as potentially problematic and may lead to negative recommendations if they are deemed to be inappropriate or unjustified relative to executive pay best practices. The list below highlights the problematic practices that carry significant weight in this overall consideration and may result in adverse vote recommendations:

- Repricing or replacing of underwater stock options/SARs without prior shareholder approval (including cash buyouts and voluntary surrender of underwater options);
- Extraordinary perquisites or tax gross-ups;
- New or materially amended agreements that provide for:
 - Excessive termination or CIC severance payments (generally exceeding 3 times base salary and average/target/most recent bonus);
 - CIC severance payments without involuntary job loss or substantial diminution of duties ("single" or "modified single" triggers) or in connection with a problematic Good Reason definition;
 - CIC excise tax gross-up entitlements (including "modified" gross-ups);

¹⁰ Only Russell 3000 Index companies are subject to the Absolute Alignment analysis.

¹¹ ISS research reports include realizable pay for S&P1500 companies.

- Multi-year guaranteed awards that are not at risk due to rigorous performance conditions;
- Liberal CIC definition combined with any single-trigger CIC benefits;
- Insufficient executive compensation disclosure by externally-managed issuers (EMIs) such that a reasonable assessment of pay programs and practices applicable to the EMI's executives is not possible;
- Any other provision or practice deemed to be egregious and present a significant risk to investors.

Compensation Committee Communications and Responsiveness

Consider the following factors case-by-case when evaluating ballot items related to executive pay on the board's responsiveness to investor input and engagement on compensation issues:

- Failure to respond to majority-supported shareholder proposals on executive pay topics; or
- Failure to adequately respond to the company's previous say-on-pay proposal that received the support of less than 70 percent of votes cast, taking into account:
 - Disclosure of engagement efforts with major institutional investors, including the frequency and timing of engagements and the company participants (including whether independent directors participated);
 - Disclosure of the specific concerns voiced by dissenting shareholders that led to the say-on-pay opposition;
 - Disclosure of specific and meaningful actions taken to address shareholders' concerns;
 - Other recent compensation actions taken by the company;
 - Whether the issues raised are recurring or isolated;
 - The company's ownership structure; and
 - Whether the support level was less than 50 percent, which would warrant the highest degree of responsiveness.

Equity-Based and Other Incentive Plans

Please refer to ISS' [U.S. Equity Compensation Plans FAQ](#) document for additional details on the Equity Plan Scorecard policy.

 **General Recommendation:** Vote case-by-case on certain equity-based compensation plans¹² depending on a combination of certain plan features and equity grant practices, where positive factors may counterbalance negative factors, and vice versa, as evaluated using an "Equity Plan Scorecard" (EPSC) approach with three pillars:

- **Plan Cost:** The total estimated cost of the company's equity plans relative to industry/market cap peers, measured by the company's estimated Shareholder Value Transfer (SVT) in relation to peers and considering both:
 - SVT based on new shares requested plus shares remaining for future grants, plus outstanding unvested/unexercised grants; and
 - SVT based only on new shares requested plus shares remaining for future grants.
- **Plan Features:**

¹² Proposals evaluated under the EPSC policy generally include those to approve or amend (1) stock option plans for employees and/or employees and directors, (2) restricted stock plans for employees and/or employees and directors, and (3) omnibus stock incentive plans for employees and/or employees and directors; amended plans will be further evaluated case-by-case.

- Quality of disclosure around vesting upon a change in control (CIC);
 - Discretionary vesting authority;
 - Liberal share recycling on various award types;
 - Lack of minimum vesting period for grants made under the plan;
 - Dividends payable prior to award vesting.
- **Grant Practices:**
- The company's three-year burn rate relative to its industry/market cap peers;
 - Vesting requirements in CEO's recent equity grants (3-year look-back);
 - The estimated duration of the plan (based on the sum of shares remaining available and the new shares requested, divided by the average annual shares granted in the prior three years);
 - The proportion of the CEO's most recent equity grants/awards subject to performance conditions;
 - Whether the company maintains a sufficient claw-back policy;
 - Whether the company maintains sufficient post-exercise/vesting share-holding requirements.

Generally vote against the plan proposal if the combination of above factors indicates that the plan is not, overall, in shareholders' interests, or if any of the following egregious factors ("overriding factors") apply:

- Awards may vest in connection with a liberal change-of-control definition;
- The plan would permit repricing or cash buyout of underwater options without shareholder approval (either by expressly permitting it – for NYSE and Nasdaq listed companies – or by not prohibiting it when the company has a history of repricing – for non-listed companies);
- The plan is a vehicle for problematic pay practices or a significant pay-for-performance disconnect under certain circumstances;
- The plan is excessively dilutive to shareholders' holdings;
- The plan contains an evergreen (automatic share replenishment) feature; or
- Any other plan features are determined to have a significant negative impact on shareholder interests.

Social and Environmental Issues

Global Approach

Issues covered under the policy include a wide range of topics, including consumer and product safety, environment and energy, labor standards and human rights, workplace and board diversity, and corporate political issues. While a variety of factors goes into each analysis, the overall principle guiding all vote recommendations focuses on how the proposal may enhance or protect shareholder value in either the short or long term.

 **General Recommendation:** Generally vote case-by-case, examining primarily whether implementation of the proposal is likely to enhance or protect shareholder value. The following factors will be considered:

- If the issues presented in the proposal are more appropriately or effectively dealt with through legislation or government regulation;
- If the company has already responded in an appropriate and sufficient manner to the issue(s) raised in the proposal;
- Whether the proposal's request is unduly burdensome (scope or timeframe) or overly prescriptive;
- The company's approach compared with any industry standard practices for addressing the issue(s) raised by the proposal;
- Whether there are significant controversies, fines, penalties, or litigation associated with the company's environmental or social practices;

- If the proposal requests increased disclosure or greater transparency, whether reasonable and sufficient information is currently available to shareholders from the company or from other publicly available sources; and
- If the proposal requests increased disclosure or greater transparency, whether implementation would reveal proprietary or confidential information that could place the company at a competitive disadvantage.

Climate Change/Greenhouse Gas (GHG) Emissions

▷ **General Recommendation:** Generally vote for resolutions requesting that a company disclose information on the financial, physical, or regulatory risks it faces related to climate change on its operations and investments or on how the company identifies, measures, and manages such risks, considering:

- Whether the company already provides current, publicly-available information on the impact that climate change may have on the company as well as associated company policies and procedures to address related risks and/or opportunities;
- The company's level of disclosure compared to industry peers; and
- Whether there are significant controversies, fines, penalties, or litigation associated with the company's climate change-related performance.

Generally vote for proposals requesting a report on greenhouse gas (GHG) emissions from company operations and/or products and operations, unless:

- The company already discloses current, publicly-available information on the impacts that GHG emissions may have on the company as well as associated company policies and procedures to address related risks and/or opportunities;
- The company's level of disclosure is comparable to that of industry peers; and
- There are no significant, controversies, fines, penalties, or litigation associated with the company's GHG emissions.

Vote case-by-case on proposals that call for the adoption of GHG reduction goals from products and operations, taking into account:

- Whether the company provides disclosure of year-over-year GHG emissions performance data;
- Whether company disclosure lags behind industry peers;
- The company's actual GHG emissions performance;
- The company's current GHG emission policies, oversight mechanisms, and related initiatives; and
- Whether the company has been the subject of recent, significant violations, fines, litigation, or controversy related to GHG emissions.

Board Diversity

▷ **General Recommendation:** Generally vote for requests for reports on a company's efforts to diversify the board, unless:

- The gender and racial minority representation of the company's board is reasonably inclusive in relation to companies of similar size and business; and
- The board already reports on its nominating procedures and gender and racial minority initiatives on the board and within the company.

Vote case-by-case on proposals asking a company to increase the gender and racial minority representation on its board, taking into account:

- The degree of existing gender and racial minority diversity on the company's board and among its executive officers;
- The level of gender and racial minority representation that exists at the company's industry peers;
- The company's established process for addressing gender and racial minority board representation;
- Whether the proposal includes an overly prescriptive request to amend nominating committee charter language;
- The independence of the company's nominating committee;
- Whether the company uses an outside search firm to identify potential director nominees; and
- Whether the company has had recent controversies, fines, or litigation regarding equal employment practices.

Gender, Race, or Ethnicity Pay Gap

- ▷ **General Recommendation:** Generally vote case-by-case on requests for reports on a company's pay data by gender, race, or ethnicity, or a report on a company's policies and goals to reduce any gender, race, or ethnicity pay gap, taking into account:
- The company's current policies and disclosure related to both its diversity and inclusion policies and practices and its compensation philosophy on fair and equitable compensation practices;
 - Whether the company has been the subject of recent controversy, litigation, or regulatory actions related to gender, race, or ethnicity pay gap issues; and
 - Whether the company's reporting regarding gender, race, or ethnicity pay gap policies or initiatives is lagging its peers.

Sustainability Reporting

- ▷ **General Recommendation:** Generally vote for proposals requesting that a company report on its policies, initiatives, and oversight mechanisms related to social, economic, and environmental sustainability, unless:
- The company already discloses similar information through existing reports or policies such as an environment, health, and safety (EHS) report; a comprehensive code of corporate conduct; and/or a diversity report; or
 - The company has formally committed to the implementation of a reporting program based on Global Reporting Initiative (GRI) guidelines or a similar standard within a specified time frame.

Lobbying

- ▷ **General Recommendation:** Vote case-by-case on proposals requesting information on a company's lobbying (including direct, indirect, and grassroots lobbying) activities, policies, or procedures, considering:
- The company's current disclosure of relevant lobbying policies, and management and board oversight;
 - The company's disclosure regarding trade associations or other groups that it supports, or is a member of, that engage in lobbying activities; and
 - Recent significant controversies, fines, or litigation regarding the company's lobbying-related activities.

Political Contributions

- ▷ **General Recommendation:** Generally vote for proposals requesting greater disclosure of a company's political contributions and trade association spending policies and activities, considering:
- The company's policies, and management and board oversight related to its direct political contributions and payments to trade associations or other groups that may be used for political purposes;
 - The company's disclosure regarding its support of, and participation in, trade associations or other groups that may make political contributions; and
 - Recent significant controversies, fines, or litigation related to the company's political contributions or political activities.

Vote against proposals barring a company from making political contributions. Businesses are affected by legislation at the federal, state, and local level; barring political contributions can put the company at a competitive disadvantage.

Vote against proposals to publish in newspapers and other media a company's political contributions. Such publications could present significant cost to the company without providing commensurate value to shareholders.

We empower investors and companies to build
for long-term and sustainable growth by providing
high-quality data, analytics, and insight.

GET STARTED WITH ISS SOLUTIONS

Email sales@issgovernance.com or visit issgovernance.com for more information.

Founded in 1985, the Institutional Shareholder Services group of companies ("ISS") is the world's leading provider of corporate governance and responsible investment solutions alongside fund intelligence and services, events, and editorial content for institutional investors, globally. ISS' solutions include objective governance research and recommendations; responsible investment data, analytics, and research; end-to-end proxy voting and distribution solutions; turnkey securities class-action claims management (provided by Securities Class Action Services, LLC); reliable global governance data and modeling tools; asset management intelligence, portfolio execution and monitoring, fund services, and media. Clients rely on ISS' expertise to help them make informed investment decisions.
